ANOTHER CREDIT.

By Courier Leased Wire

Washington, Nov. 1.—A credit of $435,000,000 was made to Great Britain to-day by the Treasury to cover British expenditures in this country up to January 1, 1918. This brings the total loans to Great Britain to $1,860,000,000 and total loans to the allies to $3,566,400,000.

KILLED AT FRONT.

By Courier Leased Wire

Toronto, Nov. 1.—News has been received here that Major Jaffray Eaton, of a Grey county battalion, has been killed at the front. He is 32 years of age, the son of Christopher Eaton of Owen Sound, and grandson of the late Senator Jaffray. For some years he was on the staff of The Globe in this city. He was unmarried and is survived by his mother.

NEWS OF NORFOLK

Less Than Fifty Per Cent of Men Examined Are In Class A

MEDICAL BOARD SITS

Hallowe'en Passed off With Quiet Celebrations Last Night

Write Simcoe Agency, Box 311, or phone 856-3 all matters regarding delivery or subscriptions, news items or advertisements.

(From Our Own Correspondent).

Simcoe, Nov. 1.—The Medical Board examined here yesterday 3.. men, bringing the total up to 439. distributed as follows: A., 204; B., 87; C., 64; D., 26; E., 58. Of these 61 were examined at Hagersville, but many of them were from Norfolk, and many Haldimand men came up to Norfolk for examination at Dover or Waterford, so that possibly the total of Norfolk men examined is about 40?. or one-fifth of the estimate of 2,000.

Hallowe'en.

Up to a late hour last night no damage to property had been reported, and no contemptible pranks had been perpetrated about town. After an early tea scores of boys in girls' costumes and girls in boys' costumes paraded the streets to the general enjoyment of spectators. One young fellow forgetting his attire, in an attempt to pass astride a hydrant or tie-post, hung by the skirt for some time till relieved.

A charivari party, who advised a newly wed groom of their intentions, received such a heart melting petition for a postponement of the affair and gave such profuse promises for the early future that the "boys" held off.

A bevy of the masqueraders behaved as if a bomb had dropped among them when Alderman Cropp turned on that giant siren auto alarm, which, by the way, would make a first-rate attachment for the chemical auto truck.

Church parties were held by the young folks in some of the congregations.

An organization of the annual masquerade with prizes for leading features would make Hallowe'en a night to which all might look forward. This has been suggested.

Odd Ends of News.

Our historic sketch of yesterday has raised the question, "When and by whom were the apple trees along the L. E. and N., east of the Simcoe depot, planted?" Through the appearance of the article we came by other data regarding early days and learned that a direct route to Brantford be

Not a New Mail Line,

but the revival of the pioneer route of which we may have something to say later. In fact, we contemplate a series of Saturday articles regarding matters of pioneer days and shall be pleased to receive material or suggestions as to where it may be obtained for such articles, from any of our readers.

Mrs. Bently received word that the Military Medal received by her husband, L. C. Bently, is to be sent home for safekeeping.

The ground was white with snow for an hour or so yesterday forenoon, first of the season.

Car lots of potatoes from outside are being brought in to the factories and for domestic consumption. Some local grown tubers have not yet been dug and some farmers are holding for higher prices.

The Geo. W. Lea Estate is rebuilding the ovens and bakeshop at the rear of the Robinson street store.

Port Dover, Nov. 1.—A heavy south-wester on Tuesday afternoon raised the water over the dock here and washed away the timbers of the breakwater along the east of the slip, leaving the stones and boulders in the open cribbing to the mercy of the waves. A good sou'-easter might easily dump the whole material into the channel and destroy the last vestige of artificial protection to the fishing tugs in their accustomed berths, or smash them against their moorings. The condition is one of much concern to the fishermen.

Mrs. Hayman held an auction sale on Saturday and left for St. Thomas to join her husband.

Corp. Sam. H. Morris, of the former 133rd, is reported wounded and gassed. He worked on the Maple Leaf staff before enlisting.

Edward Holden, of this place, died in London, England, on Saturday, October 25th. The remains are being brought here for interment from the residence of Mr. Geo. Holden.

Foreman Thos. Cooper, for thirty year or so in the employ of the Penman Company, has been lured to Hamilton by a sharp upward turn in the graph of wages.

The Port got an inch or so of snow to-day and the lake was dirty for the fishermen.

EDISON PHONOGRAPHS.

The name Edison, and what it stands for, applies to phonographs, they are unquestionably the best. They are sold on reasonable terms of payment and give great satisfaction. H. J. Smith and Co. would consider it a pleasure to show you the Edison line, which they carry complete.

Convalescence after pneumonia, typhoid fever and the grip, is sometimes merely apparent, not real. To make it real and rapid, there is no other tonic so highly to be recommended as Hood's Sarsaparilla. Thousands so testify. Take Hood's.

GRANDMA NEVER LET HER HAIR GET GRAY

Kept Her Locks Youthful, dark and glossy with common garden Sage and Sulphur

When you darken your hair with Sage Tea and Sulphur, no one can tell, because it's done so naturally, so evenly. Preparing this mixture, though, at home is mussy, and troublesome. At little cost you can buy at any drug store the ready-to-use preparation, improved by the addition of other ingredients called "Wyeth's Sage and Sulphur Compound." You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning all gray hair disappears, and after another application or two, your hair becomes beautifully darkened, glossy and luxuriant.

Gray, faded hair, though no disgrace, is a sign of old age, and as we all desire a youthful and attractive appearance, get busy at once with Wyeth's Sage and Sulphur Compound, and look years younger. This ready to use preparation is a delightful toilet requisite and not a medicine. It is not intended for the cure, mitigation or prevention of disease.

SOLDIER HUSBAND HANDY ABOUT HOUSE

Not all Wounded Need New Trades but Vocational Training has other Uses

Many visitors in the convalescent homes and sanatoria wonder why the inevitable wood-working shops conducted by the Military Hospitals Commission's vocational training branch is such a popular feature with the soldier patients. They can see at a glance that most of the men working at the benches have no intention of making their living as carpenters. The Commission has even been critized thoughtlessly for emphasizing this trade.

Only one tenth of all the convalescent soldiers passing through the M. H. C. institutions require to learn new trades in order to obtain positions, Vocational training is provided for all, however, for a variety of reasons. Occupation is recommended by the medical officers as an important factor in hastening recovery. Useful occupation assists in gradually restoring the soldier to civilian life.

"Jack of all Trades"

The period of convalescene for most soldiers after their return to Canada is not long enough to permit learning a new trade, even if that were desirable. But it is long enough for a man to learn something about tools. He can master the art of mending broken chairs which will occur in his household. He can learn to put up that bit of shelfing which will be the one detail lacking in his clothes cupboard. A thousand little jobs that crop up in a well regulated family cost the average city man real money, but a convalescent soldier who takes advantage of the opportunities presented in the M. H. C. wood-working shops will be able to keep his wages for other uses.

Gardeners Developed

Other opportunities accrue from the vocational training however, for it has many sides. The so-called amateur gardener will have fewer amateurish characteristics if he lets the garden instructor at the convalescent home show him how to tend his back yard plot. The man who longs to keep chickens in his back shed may acquire from an expert poultry instructor some of the indiosyncracies of egg producers.

It may be, however, that the boy who enlisted two or three years ago was striving to get promotion at his job, but lacked some detail of knowledge or was just a little shy on some of the fine points of elementary education. Classes in general school and commerical subjects are at his disposal.

Medical Value

Although it may have been on the advice of the medical men that vocational classes were opened, for all convalescent soldiers, the classes have proved to be of great intrinsic as well as indirect value. Few men with ambition overlook the opportunity the classes present, and the period of convalescence usually fits a returned soldier to be either a better worker or a better husband than he might otherwise have been.

IT WOULD BE GOOD POLICY.

and a money-saving proposition, if you would secure that new piano for the home without delay. Like everything else, the manufacturers are obliged to advance the price—and they are likely to be much higher in the near future. If interested call and see H. J. Smith and Co.

BEERSHEEBA TAKEN.

By Courier Leased Wire

London, Nov. 1.—That Beersheeba, in Palestine, has been captured by the British, it is announced officially.

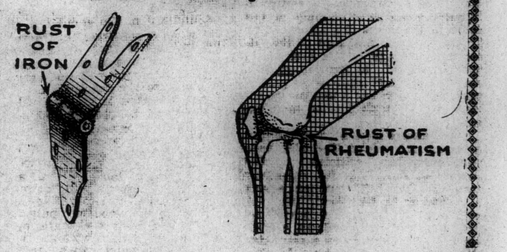
DRINK HOT WATER AND RID JOINTS OF RHEUMATIC RUST

Why rheumatism and lumbago sufferers should drink phosphated hot water each morning before [illegible]



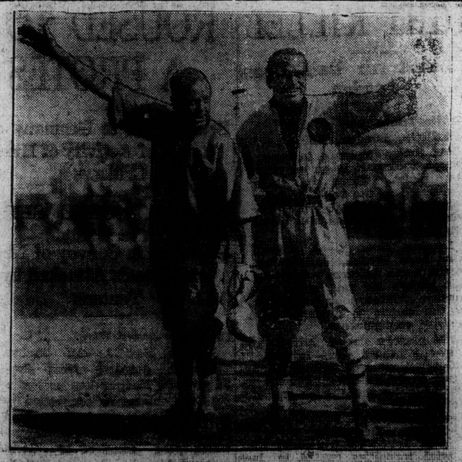
Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste material, toxins and ptomaine-like poisons, called uric acid, is formed and then sucked into the blood where it continues to circluate, collecting grain by grain in the joints of the body much like rust collects on the hinge as shown above.

Men and women who suffer from lumbago, rheumatism or sore, stiff, aching joints should begin drinking phosphated hot water, not as a means to magic relief from pain, but to prevent more uric acid forming in the system. Before eating breakfast each morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This will first neutralize and then wash out of the stomach, liver, kidneys and bowels the previous day's accumulation of toxins and poisons, thus, cleansing, sweetening, and freshening the entire alimentary canal, each morning, before putting more food into the stomach.

A quarter pound of limestone phosphate costs very little at the drug store, but is sufficient to make any rheumatic or lumbago sufferer an enthusiast on the morning inside bath.

Millions of people keep their joints free from these rheumatic acids by practicing this daily internal sanitation. A glass of hot water with a teaspoonful of limestone phosphate, drank before breakfast, is wonderfully invigorating; besides, it is an excellent health measure because it cleanses the alimentary organs of all the waste, gases and sour fermentations, making one look and feel clean, sweet and fresh all day.

Those who try this for one week many find themselves free from sick headaches, constipation, bilious attacks, sallowness, nasty breath and stomach acidity.



FAIRBANK'S AND SUNDAY'S BALL TEAMS PLAY FOR SOLDIERS.

Right to left: Douglas Fairbanks, celebrated movie star, and Billy Sunday the famous evangelist, had their nines out for a ball game in Los Angeles the proceeds to buy sporting goods for the soldiers and other fighters in Uncle Sam's service. Doug's' team had the edge on the Sunday nine and the game went to them by the very close score of 1 to 0.
