The foregoing cursory view will give an idea of the extensiveness of the prevailing destitution and must mpress the fact that it affects thousands. If it does that, there must also ollow as a consequence, the concluson that the present state was not brought about by any act of theirs, that the circumstance in which they find themselves was not through any fault of theirs, but the result of world-wide economic and industrial onditions over which they, as a soltary unit had no deciding control. Must we, therefore, penalize those men by giving pauper relief, by the dole? Are they to lose an irreplaceable manhood and self respect because there is lack of prudence utilized in choosing the means to be adopted for the alleviaton of their present wretched circumstances. The men, because they are men, ask for employment. It is only fair, that in the interest of the country generally, and of the men themselves that the matter be given serious consideration by those in authority. M. P. GIBBS.

to the ballroom and after being briefly introduced by Mr. A. K.
