BACK REQUEST

Whole Dominion Represented in Request for Lowering Tariff Bars.

WINNIPEG, Dec. 6 .- The combined farmers' organizations of all Canada, representing 60,000 affiliated farmers, known as the Council of Agriculture, has adopted a political platform for the bringing about of economic, political and social reforms. The platform was formulated in Winnipeg last week,

and announced today. The reforms aimed at include the amendment of the tariff laws by reducing the duty on goods imported from Great Britain to half the rates charged under the general tariff, and further reductions in the remaining tariff, such as will insure complete free trade between Great Britain and Canada within

More Radical Than 1911 Pact. It also urges that the reciprocity greement with the United States e accepted by the Parliament of nada, and that all foodstuffs not duded in the reciprocity agreeent of 1911 be placed on the free list, that agricultural implements, farm machinery, vehicles, fertilizers, coal, lumber, cement, illuminating, fuel and lubricating oils be placed on the free list. The farmers ask that the customs tariff on all the necessities of life be materially reduced, and that all tariff concessions granted to other countries be extended to Great Britain.

Direct Taxation Urged. For the purpose of raising an additional revenue to make up for the reduction caused by the pro-posed tariff reforms, direct taxation on certain things is proposed. These include a tax on unimproved land values, on all incomes over \$4,000, an inheritance tax on large estates, and a tax on the profits, over ten per cent, of corporations. The farmers' representatives be lieve in the nationalization of all railways and express companies, that natural resources be only let out on short term leases by public auction, the publicity of all politi-cal campaign funds, contributions and expenditure before or after election, abolition of the patronage system, federal franchise to women, full provincial autonomy in liquor ation, including manufacture, export and import, and direct legislation, including initiative, referendum and the right of recall.

British Plantation Rubber Is Saving Canada Millions

Low Prices of Rubbers and Overshoes Due to Britain's Control of Situation

Here in Canada many of us have fallen into the truly Angio-Saxon habit of considering the "Mother of Parliaments" slow and a bit behind the times. The present price of rubber, when its cause is revealed, affords one of the many proofs that such an opinion is away off the mark.

Thanks to great rubber plantations established, in the face of criticism and ridicule, many years before in her tropical Dominions, Great Britain at the outbreak of the war held a firm and tightening grip on the world's supply of raw rubber-a grip reinforced by her dominating navy. From 60% in 1914, the production of these plantations has grown this year to 75% of the whole world's output, leaving only about half the requirements of the United States alone to come from all other sources.

The result has been that the needs of the Allies, enormous though they are, have been plentifully supplied, while Germany has been reduced to registered mails and the "Deutschland" in desperate attempts to mitigate her rubber famine. Neutrals have been allowed all the rubber they want, at prices actually lower than before the war, so long as they prevent any of it from reaching the enemy, while Canada and other parts of the Empire have an abundant supply at equally favorable Government-regu-

In this foresight and generosity of the British Government lies the reason why rubber alone, of all the great staples, has not gone up in price—why rubbers and overshoes, in spite of increased cost of fabric, chemicals and labor, are as inexpensive thereased cost of faoric, chemicals and faori, are as incapensive as ever, while shoes are costing several dollars a pair more. Wearing rubbers or overwhoes through this winter to protect these expensive shoes is more than practical thrift—it is grade. ful patriotism, for in thus saving leather we make it easier for secure the absolutely necessary supplies of
