America Canadian Tonnel The reader will very likely know that the Great Western Bailway Comeast of First street, and will reach the long will be enabled more largely to profit first arch in a distance of 47 feet by the presence of a large body of miners.

Thence a double track tunnel or coverated way. From the Detroit portal the circular form of the tunnel proper is desired, in so fer as the development of Omiceca is concerned. reached in a distance of 92 feet. From that point there will be two single track tunnels extending to the portal on the Canadian side, from which an open cutting will extend for about half a mile, and thence the track will make a junction with the Great Western in a distance of one-third of a mile

to accommodate a double track; because by be greatly lessened, and also for the important consideration that, in the event of an accident or any other obstruction occurring in one tunnel, the other will still be ready for use, and the passage of trains be not even temporarily prevented. The tunnels will be cylindrical in form, and will run parallel, 50 feet apart. The interior diameter of each is 18 feet skripches. The shell of brick masony will be two feet thick in all that part of the line under the bed of the river, but at each bank this will be request to one foot six inches. In addition to the main tunnels, a small drainage tunnel, with an interior diameter of five feet will be built, extending across the river considerably below the main's THE PANTHER! -About one o'clock yes-

nel and he approaches, including a perma nent double track, with steel rails, right of way, etc., amount to \$2,560,000. It is thought it will require about two years to complete

The Canadian Parliament during its the Detroit River Tunner Company. The felte stags characteristic advertise ment company has a capital of three millions. and is composed equally of Americans, and Canadians. This will be the great tude of the plan of its construction, in the capacity which it will afford under which will be conducted within the dark recess, it will have no rival upon the continent. Truly Canada bide fair to excel in the magnitude of her engineering works, to The loternational Bailway. with its innumerable bridges of from, five millions and has no equal; and now the Great Western seeking conmeans of a tunnet system without a parallel. Next will come the Canadian Paorie Railway, doabiles; with its iron bridges and, in all probability, with its tunnel system overcoming the ed to threaten its progress to Esquimalt. Who will say that the young Empire of the North West is not on the high road to great ness Logs gyave, H & silaut

## An Important Class

The miners arriving from week to week and wending their way to our new Eldorado are for the most part representative men who have some from various mining locali-ties on the Pacific slope and whose report will attract or repel many waiting thousands, it remains now for the colonial authorities eccording as their verdict is a verable or the to continue the improvement to the juncreverse. Other things being equal we cannot regard the miners, man for man, as being of equal importance to the solony with the agriculturiets; but it must be admitted that in point of lact the minera constitute a very important class in British Coinmbia at the present time, and doubtless will continue to to which we have allided is, therefore, one star, 25th Apr

pany (Canada) and the Michigan Central Railway Company (US) have been supersonally confirmed or aven approximately confirmed or aven approximately confirmed on Government street, and the large cutting on Government street, and the large cutting of a railway tunnel under the Defroit Company with what has been already placed and improved for company the work in the connection is made by means of large stem forry boats, constructed of iron, but in addition to the usual inconvention in addition to the usual inconvention but in addition to the usual inconvention in made by means of large stem forry boats, constructed of iron, but in addition to the usual inconvention in made by means of large for the other of floating. We are a ware had in addition to the usual inconvention in made by means of large for the other of the other structures are projected. This work being as much Canadian as it is American, a brief description of it may not prove altogether unitaristing. On the prove altogether unitaristing, on the Province of the other of onr to the writer, and should the good re ports which brought them to our shores be

## The "City of Boston."

The St John's Telegraph says: It was stated n this paper on Friday morning that a bottle containing a slip of paper, purporting to have been cast eyerboard from the City of Boston, had been preked up at Caney, Cape, a few miles north of Shediac. There is no doubt whatever of the finding of such a bottle. It was found on the beach by some frenchmen who, on being informed that the document which it contained was of importance, refused to allow it to be further handled and carried it to allow it to be further handled, and carried it to their houses, believing money would be paid them for surrendering the property. On Saturday the Rev Mr Connelly, B O priest of the district, learning the facts of the case, exerted his influence to obtain the bottle and paper. A telegram on Saturday, to the Telegraph and Journal, 8838.
The document is now in possession. Rev Mr.

Connolly, who deserves thanks for the trouble be has taken in getting it. The following is a
