CAMPBELLTON, N. B.

## DECLARES WAR ON LIQUOR TRAFFIC

Toronto, June 5.—At the close of the Presbyterian Pre-assembly Conference yesterday afternoon, a resolution calling for a demonstration act to prohibit the manufacture, importation and sale of intoxicating liquors was carried with great enthusiasm. It was presented by Dr. A. S. Grant.

Dr. Grant is not given to emotion but there was a glint of moisture in his eye as he spoke to the audience.

"God will not save Canada," he said, "until Christian men look to the liquor traffic and say: 'Get off the mat.' My soul is pained with in me because the young men are going down. I want the congress of this church to give an expression on the drink question. I am looking for vengeance, and I want it, said he, amid a torrent of applause.

He deprecated all the talk about the budget when it came before the assembly committee. The Presbyterian Church has committed itself in theory, but you are afraid to take your stand, you are afraid of the vested interests. What right has a British man to deal out poison to people in this country? He asked, amid a frantic outburst of cheering.

Cut out this business and you cut out the nerve of the evil that is demoralizing the land. If you are going to build up the kingdom of God in Canada, we must root it out."

The enthusiasm broke loose right here. Men got upon their seats and yelled, women and men waved their handkerchiefs, and the place was pandemonium for some minutes.

Quietly and with a dignity of his own this strange man who has consecrated his life to doing good for others, read the following resolution:

"1.—Whereas, recent scientific investigation has revealed that alcohol is a poison and injurious to life, even when taken in small quantities; and,

2.—Whereas, the liquor traffic has become a great economic burden; and,

3.—Whereas, the enemy of all social progress, and the cause of much social distress in efficiency, poverty, insanity, crime, and death; and,

4.—Whereas, the highest development of individual and national life demands the suppression of the liquor traffic; and,

5.—Whereas, the progress of the kingdom of God is greatly hindered through the traffic in intoxicating liquors;

"Be it therefore resolved,—

"1.—That in the opinion of this congress, consisting of all the ministers and representative laymen from all the congregations of the Presbyterian Church in Canada, the time has come when legislation should be secured in Canada, prohibiting the manufacture, importation and sale of intoxicating liquor for beverage purposes.

"2.—That this resolution be forwarded to the general assembly for action.

"3.—That it be a suggestion to the assembly to invite all other religious bodies and temperance organizations to co-operate in a work having for its object the total suppression of the liquor traffic in Canada."

There was another demonstration at its close, and the place simmered with excitement. All the champions of temperance were gathered there, and one of them said, with a ring in his voice:

"War has been declared!"

That was the note of the end of the meeting.

Rev. G. P. Tattier and wife and Mr. J. O. Shear returned home on Tuesday, from attending the great Presbyterian Congress.

They report having a grand time, one or two of the main subjects brought up and enlarged upon by the congress and assembly was the grand stand they took on church union and the temperance question, the latter being unanimous, that all would endeavor to work and pray for the stamping out of the great curse, strong drink, as a body would endeavor to secure government support. Upwards of 6000 ministers and their wives and elders attended the congress and assembly from all over Canada. There was a great feeling of brotherly love and christian spirit manifested such as was never known before and will surely have a lasting influence on all who had the high honor of being present. On Saturday the 10th, the city of Toronto gave to all the delegates a warm reception. The Mayor gave the address of welcome, about 6000 were present on the beautiful University grounds. One of the great features was the grand brass band and the Highland pipes all dressed in uniform (the kilts). All street cars in the city gave free fare to all delegates during the whole congress.

### OPENING OF CANAL

New York, June 9.—By January 1, 1915, anything that floats can pass through the Panama Canal between the Atlantic and Pacific Oceans," declared Col. George W. Goethals, chief engineer of the canal zone, who arrived here tonight on the steamer Pastores, from Colon.

"I shall send a vessel through the canal just as soon as we get water into it," continued the chief engineer. "I promised that the Fram, used by Amundsen, in discovering the South Pole, should go first, but the initial passage will probably be made by a smaller craft."

Of the frequent landslides reported along the canal, Colonel Goethals said such slips are to be expected until the high banks become eroded to a gradient sufficient to overcome gravity.

## LINE BLOCKED BY WRECK AT BATHURST

Early Thursday evening, June 5th No. 10 way freight, east bound from Newcastle, side-swiped McKenzies west bound special on the east switch at Bathurst station, with the result that the line was blocked for some time and the west bound Maritime express (33) was delayed for about three hours. Apart from the delay the accident was a slight one, and the damage to the rolling stock and roadbed did not amount to much. The way-freight which ran into the was special in charge of Conductor Steve Nickerson of Moncton and Engineer Orville Gilker, of the town.

The accident was caused primarily by the short siding at Bathurst which was not long enough to contain the whole of McKenzies special. The special had a cross on the way freight, at Bathurst, and the only way in which the cross could be accomplished under the circumstances was for the special to pull up through the siding to the west switch let the freight pull down the main line until clear of the switch and then for the special to pull out for Campbellton and thus clear the east switch and main line beyond and thus allow the freight to proceed.

The wayfreight in carrying out the above manoeuvre failed to stop before the east switch was clear, with the result that her engine side swiped the special, smashing a car loaded with lime which was situated about ten cars from the van. No one was injured in the collision.
