Future genius, men of science In a half developed state— But they will be—yes they will be Though 'tis long, 'tis long to wait.

From the lofty heights of classics— Heights we cannot hope to reach, Our existence is prosaic Fate has destined us—to teach, You gaze calmly down upon us, Pitying glances, kindly cast, But we find a satisfaction

Knowing that it cannot last. When you deign to beam upon us Smiles that vary with the time We must recognize the favor Humbly worship at your shrine.

Granted—that you're simply lovely— From your fevered intellect Could you not—brilliant sollegians Other themes for songs select?

Though your sonnet fails in metre, Lost forever—is the rhyme— It would be much more effective Had you slight regard for time.

Was it a fresh inspiration? No Alas! it was not so—
'Pis'the same—the very "chestnut Sung to " trainers" long ago.

## The Mother's Column

and Rearing of Children. How to Promote the Baby's Health

(Specially selected for the Farmer.)

The first right of a baby or a child be comfortable, and here only The first right of a baby or a child is to be comfortable, and here only mother love is wise. The little thing with delicate skin and heart and lungs be used again. So heated milk will the blood began to ooze out through sible until the hoarseness is recovered to be used again. So heated milk will the blood began to ooze out through sible until the hoarseness is recovered. with delicate skin and heart and lungs eases. One point is overlooked in the skin beneath the steel chain shill the skin beneath the steel chain the skin beneath the steel chain shill the skin beneath the steel ch baby's hand out of a dozen actu. ally warm as it should be. The nurses or mixing food, should be filtered, would be break it or the careless mothers active and boiled and grated by pouring back question all asked, or the careless mothers active and stirring, are warm enough, and theory runs that warm rooms make children tender. They are born tender and need tender treatment to allow them to gain attength. Delicate babies need recome kept at 90 degrees the first few months to maintain life, as the most eminent doctors prescribe. The wery warm, very equable, very pure.

They should be warm with light perpetual need of handkerchief; keep Mr. Wilson had looked calmly on. clothing indoors, for who has not seen them well fed, and strike off all dyschildren absolutely weighed down with thick clothing so they could neither run nor play with freedom. If they cry, nervously, soothe them have nudressed a little girl kept by outdoor siring, or a warm bath, or clothed these and other feats showing contact the showing co

may have this weakness fixed for life layers is not spanning, out a warm in the first year by breathing vitiated bath whenever the fits of crying come in reason, that the tests were brought about. SIMON NEALIS. Phœnix Square, North Side, Fredericton.

THE ORIGINAL is the ONLY FIRST-CLASS WOOD COOK that has an individuality of its own, distinguishing it from the every day construction offered in First-Class Stoves. The ORIGINAL furths every piedge that is made for it, and stands to-day unequalled as a marvel of beauty and pactical utility.

Modern ideas and new improvements, make it the most economical and convenient stove ever placed on the market. It has the largest High Oven, largest top, largest reservoir, largest fire box and flues. Its value is apparent at sight, and builds its own reputation. The lower oven door drop and forms a substantial flush oven shell, while the upper one retains the heat that is wasted trom every swinging oven door Cook Stove.

I also keep the NOVEL STANDARD, the latest and most modern COAL COOK in the market. The points of construction are similar to the Original Cook, and a sister stove for burning coal.
