All cakes are dough, but the doughnut with the hole in the centre is not all cake.
In revising the tariff Minister Fielding should place a prohibitory duty on the Yankee cyclone.
An enterprising Detroit hatter is giving a set of detachable car muffs with every straw hat he sells.
Five cent strawberries do not seem to have the same rich flavor as the two for a quarter article.
During John D. Rockefeller's sojourn in London additional guards have been placed around Westminster Abbey.
After all the commissions are appointed there will still be room for a commission to investigate the commissions.
The Fathers of Confederation are nearly all dead, but we still have the Daughters of the Empire.
The different denominations are all in favor of organic union, but the trouble is who is going to play the organ.
FLANNELS.
Took them off at noon
Put them on at night
Woke up in the morning
Flannels out of sight.
Vacation days are almost here
Looked forward to with hope and fear,
A time for pleasure fun and sport
Harvest time for the summer resort.
If Evangelist Torrey wishes to make an impression on our legislators at Ottawa he should avoid any reference to the fact that there is no sessional indemnity in heaven.
A newspaper correspondent was called before the bar of the House of Commons the other day. The speaker, not being provided with a bar tender's badge, was unable to fill the order for a nonpareil slug.
CHICAGO SAUSAGE.
A hunk of hog
And a slice of dog
The ham of a cat
And a sewer rat,
Chopped up fine
Well soaked in brine,
Seasoned like a hot tamal
Made in the spring will last till fall.

A LADY recently presented her husband with twins, and his pride and joy knew no bounds. He called in servants and friends to view and admire his treasures, and lastly came old John, the coachman, who had been in the family for years. John looked the youngsters over carefully, shook his head with a puzzled expression, and went away without a word. The disappointed father was very angry, and his wrath appeared only when John appeared next day and asked to view the babies again. After much deliberation, he soberly pointed out to one of them and said, to the parents' amazement, "I'd keep this wan."
ORDER your two piece suits. Ours are the kind that fit and wear well.—SWIFT BROS.
Dr. and Mrs. E. Monroe Lane, of Pawtucket, R. I., spent a few hours in Dutton while on their way to Chicago on Tuesday last. His many friends in Dutton will be pleased to learn that he has met with much success in his eastern home. The doctor, who was then a boy, left Dutton nineteen years ago, and is naturally surprised at the progress of the village in that time.—Dutton Advance. Dr. Lane resided in Watford for a time and will be remembered by many of our readers, who will be pleased to learn that he is prospering in the home of the Clam Eaters.
DROP in and buy a piece of china or glassware to remember the oldest business establishment in Watford.—MCDONNELL & SON.
BEAUTIFUL sunsets are a feature of the summer weather of this region, but the sunset of Friday last was a phenomenon so remarkable as to attract general attention. The western sky was banked with heavy clouds, which were so illuminated by the descending sun that the whole western horizon, extending almost to the northern and southern points of the compass, was ablaze with a mass of light which bore a yellowish green cast, turning later to golden yellow. From the setting sun long shafts of brilliant light extended towards the zenith, bearing almost the appearance of an aurora. The whole appearance was so strange that many nervous people were much concerned, believing that the phenomenon foretold some unusual weather disturbance.
\$5.00 RAIN coats, a special range, greys and fawns, to clear at \$3.65.—SWIFT BROS.

HICKS—WHITE.
A pretty and fashionable June wedding took place Tuesday afternoon at the residence of Mr. and Mrs. A. H. White, King st., Chatham, when their daughter, Miss Pearl Irene White was united in marriage to Dr. Alfred A. Hicks, also of this city. The ceremony took place at 1:30, the bride entering the parlor leaning on the arm of her father, whom she was given away. The nuptial knot was tied by the Rev. Wm. Rutledge, assisted by the Rev. Dr. Hanson. The decorations for the occasion were of green and white, and ferns and white roses, the bride during the ceremony stood under a bell of orange blossoms.
The bride was assisted by Miss Sue C. Irwin, and the groomsmen by Mr. H. S. Davis, of Toronto.
The bride's costume was of white silk chiffon over Duchesse satin, the gown being entrained. She wore a veil and orange blossoms. The bridesmaid, Miss Irwin, wore a gown of green silk, bobbed of purple. The bride carried a shower of hot roses, while her maid of honor carried lilies.
The groom's gift to the bride was a breast-pin of amethysts and pearls; to the bridesmaid a bar of pearls; to the groomsmen, a pin of rubies and pearls; and to the pianist, a crescent of pearls.
After the wedding the bridal party sat down to a tasty luncheon in the dining room, which was beautifully decorated in green and white for the occasion. The many beautiful presents received were significant of the popularity of the bride and groom.
The guests, numbered about 50.—Chatham Planet.

Robbed of \$1,700.

Detroit, June 6.—A few weeks ago a man by the name of Tilley, after disposing of his farm a few miles from Windsor, came here with the proceeds, nearly \$1,700, in his pocket, to see the sights.
He fell in with a former acquaintance, a man from near Wardsville, Ont. Tilley was robbed of the entire sum, and the local police say his Wardsville friend got it.
The Detroit police tried to secure the arrest of the latter, but got the reply from the authorities at Wardsville that their "hands are tied."

Miss Mabelle Dillon, of Sarnia, graduated as a A. T. C. M., of the Toronto Conservatory of Music, last week.

A TRIP TO COBALT.

Leaving Watford at 3 p. m. you can reach Cobalt at 3 p. m. on the following day. Cobalt is 330 miles north of Toronto, and is pronounced by mining experts to be the greatest silver mining camp in the world. Cobalt is called after the mineral that is so plentifully found there associated with silver. It has been used for many years for coloring purposes, being the only substance that will successfully color earthen and china ware. Now they tell me that Edison is going to use it in his electric storage batteries. The town of Cobalt is not picturesque. It looks as if it had been dropped from the clouds. The place did not exist a year ago last March. Then came the boom and the place was built up before a town site was surveyed. Consequently the houses are placed in all positions and there are no streets. In doing the town one is continually passing through back yards. There are some splendid silver mines around Cobalt. Two years ago, when the new government railway was being pushed on to Liskeard and the north the men had to blast a cut through the rock and in doing so they found native silver. Shortly after this LaRoe, a blacksmith, discovered a vein of silver. He sold a 1/2 interest for \$500, the other 1/2 afterwards for \$28,000. Today the value of the mine is estimated at \$3,000,000. Young Foster, an adventurous spirit from Walkerville, turned up one day at Cobalt. His father wrote in vain for him to come home and finally he went to Cobalt to bring home his wandering boy, but when he arrived there his son persuaded him to stay for a couple of weeks. One morning very early the flies and mosquitoes drove him from his bed, he seized a prospector's pick and started out, in less than half an hour he discovered a vein of silver. This is the origin of the Foster mine and it is considered very rich. Another very valuable mine is the Temiskaming & Hudson Bay Co's mine with ore assaying \$5,000 a ton. In March 1905 their stock sold from 40 to 50c per share. Their first dividend was 200 per cent and today the shares are selling at from \$60 to \$80 per share. Such reports as this have turned the eyes of thousands towards Cobalt and every train going in is packed and the same coming out. Every man goes in with high hopes, but soon gets rid of his delusion. It is a lottery and my impression is that not one in every 1,000 wins. I met many discouraged prospectors there, old prospectors from the Lake of the Woods, who had been looking for weeks and found nothing. The eyes of the prospectors are hard. The adventurous spirits are there. Among the prospectors I met many professional men. Among others Drs. Colter and Wilkinson, Dentists, from this vicinity, a Geologist, and Lawyer Winnett from London, Cobalt and surrounding country is covered with rocks and small timber. What part those rocks take in the economy of nature we cannot understand. Perhaps in future generations some Edison may make use of them. Most of the prospectors are very intelligent men and they will tell you how in past ages the huge glaciers came down from the north pole carried all the soil away, and left nothing but rocks and minerals behind. There are many proofs for this. The timber in New Ontario is small, consisting mostly of birch poplar with some balsam tamarac, spruce and here and there stretches of jack pine. This timber will in time no doubt be valuable for pulp wood. The large white pine has been taken out, the late John Kidd of Brooke, having been a member of a lumbering party up in that country over 40 years ago. I saw no land suitable for farming purposes although I was informed that there is some good agricultural land north of Liskeard, 12 miles north of Cobalt. I cannot understand anyone from Old Ontario going to New Ontario to start farming when it would take a lifetime to clear his farm, while in North-Western Canada a man can have a crop the first season. Let any young man who is dissatisfied with his conditions in Old Ontario take a trip to New Ontario, unless he strikes a silver mine he will be glad to get home again. Cobalt and the neighboring towns, Hatleyburg and Liskeard have had their boom. Real estate went far beyond its actual value, but is now on the decline. There is nothing that I can see to keep them growing. Cobalt will be the making of a Kelly and the undoing of many. R. G. KELLY.
