To the Editor of the Monitor: STR,—So long as the ridiculous charges made against our late celebration were con-fined to the county papers I did not reply, simply because the author or inspirer was so well known, and his metive so thoroughly

well known, and his metive so thoroughly understood, that it was unnecessary. Emboldened by silence, however, and mistaking it for weakness, he has grown reckless, and the recent contributions to the St. John Progress and the Herald have so grossly misrepresented the facts, and so shamefully distorted conversations, that, for the credit of the town, and in justice to myself, I can no longer refrain. of the town, and in justice to myself, I can no longer refrain.

As a prelude, I may say that the whole trouble arose through Judge Savary's excellent, but unasked for, speech being declined. Whether the attraction committee, composed of thirteen of our leading citizens, were wise in so refusing this much offered address, is, as Kiplings says, another story. They did, however, and their decision should have been final.

To understand the matter it is necessary

To understand the matter it is necessary to go back to the beginning. When the attraction committee was appointed, early in May, they asked the Hon. F. W. Borden te give an address, and though not a member, at their request, I also saw him. He replied he would be glad to do so, if his health permitted, but that on account of it, he would have to be very brief. The committee also asked the Hon. A. R. Dickey to speak, which he kindly consented to do, and the large bills were thereupon printed and distributed.

distributed.

The allegation that the committee knew from the first Dr. Borden would be unable to attend, and that his name was used for advertising purposes, is, I need hardly say, a malicious falsehood. The first intimation we had he would not be here was in a letter received from him by Mr. King, on the 10th of June, in which he stated he was convinced he should not on account of his health. I then wrote, srging him to come, even if he only said a few words, but his reply, received on the I7th, stated it would be impossible, for the above reason.

ceived on the 17th, stated it would be impossible, for the above reason.

From that date, Judge Savary "assiduously pressed" different members of the committee to let him take Dr. Borden's place, and when refused, came to my office and asked me to use my influence on his behalf. The reported conversation with me in Saturday's Herald is, to put it mildly, misleading and untrue. I never stated that "the management about speeches was all with King and Atlee, the attractions committee, and that there was no time for speeches." It would have been both untrue and absurd, as the names of all thirteen members had been published in our local paper a number of times. What I did say was, that the matter rested with the attraction committee, matter rested with the attraction committee, of which Mr. Attee was chairman, and that I had heard him say there was no time for more speeches. I deny, in the most unqualified terms, that I stated "we are going to wire Dickey to ascertain whether he is going to speak more than half an hour." Such an idea never entered my head, nor would I have done so if it had.

The werds "we never expected Dr. Ror.

The words "we never expected Dr. Bor-den to speak for more than five minutes" are quite correct, so far as they go, but I added the reason. As to refusing to take the judge's address to read, I only said I was sorry I had not time to look at it then, as I had to go to the lime in the property of the said to be the said to go to the lime in the said to go to y I nad not time to look at it then, as I had to go to the train in a few moments. So far as Mr. Dickey is concerned I deny bsolutely that he was ever asked, either rectly or indirectly, by any of the comttee, not to exceed half an hour, or to rten his address in any way. mittee, not to exceed half an hour, or to shorten his address in any way. When on the afternoon of the day he asked me how long he was expected to speak, I told him there was no limit, that it was a matter entirely for himself, and to make it as long or

as short as he wished.

The following telegram effectually disposes of this absurd charge:

To W. M. deBlois, Esg., Annapolis:
Your telegram received. The colebration committee in no way finited me as to length of address. I shortened it of my own motion, in view of the circumstances under which it was delivered.\* Please, therefore, exonerate the committee.

A. R. DICKEY.

\*Referring to the high wind, which made "Referring to the high wind, which made it very hard to speak.

With regard to the other features of the celebration I have little to say, except that the assertion that the mayor and council had charge of it, is untrue. Disappointments were many, especially with regard to the sports; and mistakes there were, of course, but they were errors of judgment only; and the insinuation that certain things were done on account of two members of a large committee having certain privileges, is large committee having certain privileges, is a cowardly falsehood, and insulting to the

In conclusion, sir, I have to express my regret that the irate correspondent allowed his feelings to over-ride his judgment. I am sorry to introduce a personal element into this discussion, but it has been forced upon W. M. DEBLOIS, Mayo Annapolis Royal, July 22nd.

Relieved at Last. Sentinels have accomplished wonders of faithfulness and endurance, but the service of a sentinel on the island of Rugen, as reported by himself, is a unique example of patience. A detachment of the French General Daveust's army was stationed on the litimmediately was received, and the soldiers embarked and sailed away with the greatest

ste. One man was forgotten. He was on sentinel duty. Back and forth he marched for hours after it was time for some one to relieve him. Finally he lost patience and returned to headquarters and found the post deserted. His company had departed in obedience to imperative I am lost, ruined, disgraced," he exclaimed; "I shall be sent for and shot as a

fellow who witnessed it, and he took home with him, cheered him up, and adopted him into his family. As time passed, and no summons came from

France, the soldier took heart and became a good citizen of Rugen. He endeared himself to his adopted family, and married the daughter of his protector. Five years after the departure of the

French soldiers, a sail was sighted from the island, and it soon was discovered that the men on the approaching ships wore French "They have come for me!" cried the ex

sentinel. A happy thought struck him. He ran home; hurried into his old uniform, seized his arms, and by the time the French were ready to disembark he was solemnly marching back and forth on the shore. Who goes there?" he demanded in a voice of thunder, as the soldiers were about

"Who goes there yourself?" replied the astonished Frenchman. "Who are you any-

A sentinel!" "How long have you been on duty?" As might be expected such a model of pa-

As might be expected such a model of pa-tience and perseverance was relieved from duty until his case should be inquired into, and when the matter was reported to Gener-al Davoust, he laughed heartily, and saying that the fellow must need rest, gave him his Heart Pain.

Dr. Agnew's Cure for the Heart Defies the Most Interese Pains—No Matter How Long Standing the Trouble, it Masters Disease in Half an Hour, and in the Case of John Crow Five Bottles Cured Heart Disease of Ten Years' Standing—Here's His Testi-mony Unsolicited:—

mony Unsolicited:—

John Crow, son of Mr. George Crow, farmer, near the village of Tara, Ont., writes:

"I was alarmingly afflicted with palpitation and enlargement of the heart for nearly ten years. I doctored with best physicians and tried numerous remedies with very little benefit. In our local papers I noticed Dr. Agnew's Cure for the Heart advertised, and I determined to give it a trial. Inside of half an hour I had relief. I have taken about five bottles, and feel to-day that I am as well as ever I was. I am completely cured." Sold ever I was. I am completely cured. by S. N. Weare.

—At the point where the Mississippi river flows out of Lake Itasca it is only 10 feet wide and 18 inches deep.

-Minard's Liniment for Rheumatism.

HELPLESS FOR A YEAR. Bowed Down With Rheumatism

Records like the following carry conviction with them and in a practical sense it might be said that this is still the age of mirac Mr. Edward Downey, of Maccan, N. B., says:-"I have been a resident of Cumberand Co. some years. I have been a great sufferer for upwards of ten years with sciatic pains which at times would become almost unbearable, and I think I suffered almost everything a man can suffer and live. I was so crippled that I could not work and part I became so weak, and my system so run down that I despaired of ever getting better. My case was an almost hopeless one, and as I had abandoned work I was almost helpless for over a year. I heard of Dr. Williams' Pink Pills and I was induced to at least give them a trial. In a short time I began to recover, and the agonizing pains left my back and limbs, so that I was enabled to walk out of doors. Before I had used more than half a dozen boxes I was almost entirely well and could do a hard day's work. I had a good appetite and began to gain flesh and feel like a new man. I am free from aches and pains for it all." The reporter could not help feeling that Mr. Downey's case was a strik ing one, as he now presents a stout well built figure, straight limbed and as smart in his movements as a young man of twenty.

OW A FATHER ESTIMATED ON THE VALUE OF A MARRIAGEABLE DAUGHTER. Fathers who are well acquainted canno nelp being confidential. They may concea their pride and disappointment in the bosom of their family, but when alone together they talk with much the same freedom a poarding school girls. Two rather veneroble looking specimens of the species met the other day and were discussing the much vexed matrimonial question as bearing upon

their daughters. familiarity of old friendship, "how did you get rid of that young fellow who was bent on marrying Maggie? When I undertake to interfere with a match in which one of my daughters is involved there's no such thing as living comfortably with the family."

"Simple enough," laughed Bob. "The thing had gone as far as an engagement before I knew anything about it, and there was'nt the slightest use of trying the autocratic. The situation called for diplor When the young fellow called on me I made no protest at all, but expressed a determina ion to be honest with him, and told how several of my investments promised to result very disastrously. If they miscarried, Maggie would be portionless. Inside of a month he had managed to cool the girl's affections so that she jilted him."

"But what investments did you refer to? "Well, I had Maggie herself particularly n mind. You know that \$10,000 is a very low estimate for raising a baby girl until sh becomes a marriageable woman. Looking upon her as a cold business proposition knew she would be a miserably poor invest signing and avaricious youngster."

o-called failures," said a well-known artist addressing his class. "They are only stepping stones to success, the premiums we must pay for experience. I may say, with out vanity, that I have been fairly successful in my profession, and yet to one canvas that succeeded there have been as many as forty which I have scraped down with my palette knife in disgust. Even if a student never succeeds, his very failures may be noble!" It is not only to art that this exhortation might apply. In every career, in every walk Failures are not failures really; they are les sons; they are stepping-stones; they should not for a moment be associated with despon dency or hopelessness. Just as a child tum-bles and picks himself up as a matter of course and runs gaily on, so should we children of a larger growth regard the ups and downs of life, never losing courage, however often we tumble. Young people, especially, should be taught that it is not always suc cess to succeed, and that disappoint should be taken philosophically. The idea tle island of Rugen. An order to leave it of a booby prize in games is a good one; there are many prizes in life for those that appar ently fail; and even in worldly matters the last shall be first and the first shall be last in nine cases out of ten.

### Maintaining Soil Fertility.

One of the most important points in main taining soil fertility is to keep the soil in condition to absorb and retain water. Amer can Cultivator explains: The effect of continued cultivation is to expose the surface so to the depth of the furrow to light, air and ains. These wash away the lighter particles of soil, which are always the remains of decomposed vegetable matter. When this is out of the soil, its mineral elements soon become compacted, so that even ploughing only breaks them into clods. If the subsoil also be heavy, that should be subsoiled at least once in four or five years. This subsoiling is particularly important as a preparation for clover seeding. When we began under draining, more than forty years ago, the notable fact at first was the extra heavy clover growth just over the line of the drain. Yes vithout doubt for several feet each side of the drain the water was drawn off as tho oughly as where the drain ran. Afterward we learned that subsoiling after draining extended this beneficial effect to the clover over the whole surface, between the drains as well as over them.

-A few days ago Alex. Cochrane, the tim smith, went to the Congregational church in Deep River to put the furnace in order for the winter, and was accompanied by his dog. When he opened the furnace door six skunks sprang out almost in his face, and ran for orner of the cellar. The dog mixed in with and the result can be easily imagined. Man and dog finally became victors, but the cellar and the whole church fairly reeked with awful stench. It is supposed that the skunk got into the furnace by crawling through one of the cold air pipes, the openings of which are in the basement wall outside the church.

—Norwich Bulletin.

Long Distance Conversation

The air is so clear in the arctic region that conservation can be carried on easily by persons two miles apart. It has also been asserted on good authority that at Gibraltar the human voice has been distinctly heard at a distance of ten miles.

—In a Manchester (N. H.) boarding house a day or two ago one of the boarders noticed a large speck in his glass of milk, which proved to be a live fish, and as the milkman and the landlady both deny the knowledge of the fish, the blame, of course, rests on the cow.

—Physical strength and energy contribute to strength of character, and both may be had by taking Hood's Sarsaparilla.

## Agricultural.

VETERAN POULTRY FANCIER GIVES

for over 50 years, but how little I know." Even the best of us must confess this with me, looking from our own standpoint of what is perfect knowledge in poultry culture.

Yet at all events there are millions who know

less than we do, and it is to these—the young

breeders, the beginners—that I wish to speak. Supposing my reader is now a boy of 12. If you will hatch and raise 25 chickens each year, winter 12 females and a male and will follow my directions for 30 years, at 42 you may have in bank or invested in a farm \$3,000, and at my age \$10,000 to leave to your children, and you can do it all before breakfast and after supper and attend to all other necessary control of your business or your play. How? Even you, my boy, can build a fowlhouse large enough to quarter that many fowls. You can build two chicken coops 30 by 30 inches square, with sides 15 inches high, double roof, with slats put on in front, with the rear boards like sides and top, making a nice nest on the ground in April, place ing these coops over them, setting two hens, when they hatch giving all the chicks to one hen and setting the other one over again. These three sittings will secure for you as a rule the 25 chicks you desire. In July sell all the males but the best two you choose to keep. In September sell the old set and clear your fowlhouse for the pullets, that they may enter upon their yearly task of furnishing you eggs. The market for pour try meat and eggs, if you live in Natick.

your flock would lay for-Thirty cents a dozen-144 dozen at small cocks in July......
The 12 old hens in September.....

would enable you to sell the 144 dozen eggs

Put that sum at interest at 6 per cent. I rill grant you are smart enough to make it do better, but at that, reckoned for 30 years by decimal fractions (you know the decimal system is my way of judging), and should you each year put \$47.80 in the bank, it will 30 years amount to \$3,669.04. But I have forgotten a little item—that if

you are not willing to use a little extra effort o get that which would cost nothing but laor at such times as you could not sell it for anything, taking it out of your recreation, the he cost of keeping those chickens for the four or five months of their lives would be abou \$6. Now, for 30 years it would be \$180, and 5 years' interest on that amount, \$374.60, nust come out of your \$3,669.04, leaving \$3,294.44. You see you have your \$3,000 eft and \$294.44 to go to the worlds' fair or spend going to the poultry show, where you nay learn how you can breed chicks fine and horoughbred, and thus be enabled to sell stock for breeding purposes to treble or quadruple—yes, to make that little plant of yours

earn ten times that money.

But, my young friend, go all through the omputations and see if I am not right. You ask, do you know of a boy that has done this? Well, I know a boy who commenced with the 12 hens and a cockerel, but he did not put his money in the bank. If he had, he would have been worth dollars where he is now worth cents. But that road is open to you. Yes, a larger and wider scope is open to you, for if you commence with thoroughbred stee and put the care and love for the flock into the scales, that sum may reach proportions that will care for the remainder of your life -after you have reached 50 years of age. The habit you acquire in saving for the flock will have its influence on your other business. and it may be that thus con with 12 chickens will be the grand circumstance that at 60 may place you where your ompetence and example will make your las day your best day and your children call you lessed .- I. K. Felch in Rural New Yorker.

## The Benefit of Wood Ashes

I had h of an acre on a gravelly knoll which ore only June grass, very small and thin at that. I put on 3 barrels of wood ashes and clover started well. The next year I put on nore ashes and had a fair crop of clover. I put the ashes directly on the turf. A man bought a farm of some 50 acres adjoining nine, and as the old saying is, "could no raise beans." He could only keep one cow and a horse the first year, but he made what nanure he could and put on about 4 barrels of ashes to the acre. He followed this for three or four years, and during his six years' stay he bought about \$25 worth of manure The last two years he cut a heavy hay crop, kept four cows and two horses, raised 60 ushels of oats, considerable corn and potaoes for his own use and some to sell. He paid \$800 and seld for \$1200. He says he is not much of a farmer either. - W. J. Ruder n American Agriculturist.

Things We Ought to Know. That nausea and indigestion may be grea

relieved by taking a cup of hot water That a glass which has held milk that sliced in cold water before washing.

That sliced tomatoes dipped in a batter and then fried make a delicious entree. That no one should wear the same under

garments at night that they do during the That women may frequently cure then

reat deal to do with forming their character.

That the boys like pretty things and tidy oms just as well as the girls, although they

That an old bedstead which is shabby may be greatly beautified by the judicious use of a little paint of delicate color, and a coat of enamel. That many a boy ruins his prospects for life by thinking that people do not notice the kind of companions he chooses. That after cleaning silver it should be rub-

ed with the juice of a lemon. It will the take on that clear white color so desirable. That if glasses are laid sidewise in ho water they are not apt to break. That a little lemon juice squeezed ove strawberries before the sugar is sprinkled ver them gives a delicious flavor. That lamp wicks should be rubbed, not

The average parent is too apt to consider he milder contagious diseases of childhood imply as inconveniences—of only temporary letriment to their victim. But we ecognize the scientific fact that no disease ver leaves the physical system absolutely nimpaired. To this we must add the fac that with healthy children growth is constant, and that the arresting of that growth by any disease really diminishes to just such a degre as it extends the ultimate size and vigor of the child who suffers from the disease. Con tagious diseases, however harmless they may seem, should never be knowingly incurred, for even their least injurious results are unknown quantities, militating against the development of the child, while there is always risk of more serious manifestations, whose evil consequences may extend through the whole life of the child and seriously impair both its usefulness and happiness. Therefore it is only our plain duty to guard against contagious disease as long and as far as may be. This is now possible to an extent never before conceived of. We at present under-

stand, to a degree at least, the nature of con-

tagious diseases, and out of this knowledge

It is easy to develop charity, benevolence and unselfishness in children, if one begins early enough. A case occurred recently in which two words were sufficient rebuke. A tiny little fellow was shamed by these two words into repentance for a childish act of selfish greed. He had incontinently devoured not only his own, but his elder sister's share of some choice fruit, and the mother only looked at him seriously and said very slowly and quietly, "Poor Daisy!" The look and the peculiar emphasis were enough. A scarlet flush overspread the little boy's round face, and he never forgot the

Five or six years before, that mother had been a flippant society girl, but maternity had brought out latent judgment and the wisdom of Solomon. In those two words, "Poor Daisy!" she embodied a whole kindergarten treatise. "Wax to receive and marble to retain!"

Late lemons till I was as sour as I looked.
I took more kinds of medicine than you can
find in any one drug store. I was in a boiled state for six months from hot baths. I was massaged into a pulp. I travelled three hundred miles to have the disease charmed away and had it worse coming back than I had going. One day I met a little old man that must have been a hundred. He was as that must have been a hundred. He was as spry as a kitten, yet assured me that from the time he was from fifty to seventy there was nothing of him but rheumatism. Even his hair ached. He advised me to steal a

dish rag and rub myself thoroughly with it every morning. There was no virtue in the treatment unless I stole the rag. "I would have robbed a bank to get relief One afternoon I slipped through the back dish rag and started to limp away. A 200on a ray and started to him away. A 200-pound hired girl let out a Tipperary screech and took after me with a mop stick. By the time she had clouted me once or twice I was running like a professional and at the end of half a block I was out out of reach of her weapon. I've never had a twinge since. I don't know whether the hired girl, the pounding, the running or the dish rag cured me. I'm rather disposed to thing that the rheumatism was scared out of me."

#### At Washington's Tomb.

There are times when bathos is showered only upon the dead. T. F. Silleck says that on one of his holiday excursions he visited Mount Vernon, and there, in the grounds, he came upon a middle aged lady, kneeling before a building at some distance from the nonument. She was bathed in tears. Mr. Silleck walked up to her and asked if she were in trouble.

"No, sir," said she, "thank you very much. am not in trouble, but my patr feelings overcome me when I gaze upon the tomb of the Father of His Country." "I quite understand," said Mr. Silleck made a mistake. This is not the tomb of Washington. It is over yonder. This is
