sole object I have in view, is to induce others who have more time to go on and improve upon my experience. To those having a true love of horticulture nothing can be pleasanter than watching the tree fruiting for the first time, and testing the fruit in comparison with other fine varieties, or seeing the rose-bud expanding, and wondering if it will be equal or superior to the older sorts.

The apple and pear take a number of years to test, though this can be greatly accelerated by grafting shoots trom the promising seedlings on bearing trees; but the plum, cherry, peach, grapes, gooseberries, and other small fruits, as also roses, and other ornamental shrubs and flowers, can be proved in the course of a few years from the seed. I feel now that my time has been wasted in the cares of business, which might have been more profitably and pleasantly employed in raising seedlings; but still, though verging on man's allotted span, I have many seedlings coming on which will fruit in a year or two, and I will plant many more seeds this year for myself or others to test.

Finally, all that is required for wonderful success is to secure the very best varieties of fruits and flowers to propagate from, plant them near together, without any of inferior quality to mix with them; save and plant the seeds from these, and the bees will do all the rest far better and more scientifically than man can do it, and with far better results.

HORTICULTURAL GOSSIP. VI.

BY L. WOOLVERTON, M. A., GRIMSBY.

OUR WINTER MEETINGS.—We notice that the Horticultural Society of Ohio have published in the papers a schedule of their approaching annual meeting at Dayton. It is to occupy three days, the time being occupied somewhat as is customary at most conventions or conferences. Essays are to be read by prominent members on stated subjects, and each is to be followed by a free discussion; besides this, reports will be received concerning the fruit crops in various places, and the meeting will close with the election of officers.

The question has already been brought up among us, whether a winter meeting of more than one day would not be advisable, and the answer depends upon the wishes of members. Perhaps our discussions
