The Only Perfect Hair Brush.

The qualities indispensable for a Hair Brush are its capabilities of cleansing the Hair, and imparting a gloss to its surface with the least possible labour, and without collecting the particles of dust, &c., which it has removed: and also without injuring or irritating the skin of the head, which is well known as the originating cause of scurf, and in many cases of premature baldness. But few Hair Brushes among the many hitherto introduced to the public possess any of these desiderata; and most of them, by improper construction, produce the very consequences it is of the greatest importance to avoid. The patentees and makers of THE PATENT TRICHOCHARON feel peculiar satisfaction, therefore, in presenting to notice their new invention, assured that an examination of its structure will convince the most skeptical, that it possesses all the properties requisite in such an article, and that it is entirely free from those glaring inconveniences and defects.

The subscriber has just received a small lot of the above Hair Brushes, together with a large lot of

JOHN GOSNELL & CO'S

Royal Patent Hair Brushes,

Which are warranted to remove every particle of Scurf Dust, &c., clean, beautify and give the hair a rich, glossy appearance, not to be obtained by the use of any other.

These celebrated Hair Brushes, with the least possible pressure create a quick circulation of the fluids, thereby promoting the growth and beauty of the hair.

Sold with Leather Cases, each containing one pair superior Hair Brushes without handles.

Face Powder Brushes.

Infants' and Children's Hair Brushes, in wood, bone, and solid ivory—just the thing for a basket.

Shaving Brushes, in Badger and Pig's Hair.

Nail Brushes, in great variety, and without handles.

Tooth Brushes—These tooth brushes have been made expressly for the subscriber, by J. Gosnell & Co., London, and will supply a want long experienced, viz., a really good Tooth Brush at a moderate rate.
