

It will improve your heating plant to install an
**Economy Automatic Condensation
Pump and Receiver**

Increases rapidity of circulation by drawing condensation through the system, venting the air and returning water to boiler at high temperature. Eliminates snapping, pounding and cracking in radiators and pipes. Comprised of an expansion tank, automatic switch and centrifugal pump automatically operated by electric motor. Easily installed and increases the efficiency of either high or low pressure system 50 per cent.

An "Economy" Hot Water Circulating Pump

automatically operated by an electric motor will cure that sluggish circulation in your hot water system.
