

- iv) An Australian instrumentation writer will be included in 1982-83 visiting journalists program;
- v) Selective Canadian instrumentation success or new product stories will be publicized in Australian trade journals;
- vi) Canadian trade shows will also be publicized, highlighting process-control instrumentation with a view to organizing a visit to Canada, under the incoming-buyers program, by a group of influential Australian end-users and agents;
- vii) An instrumentation and process control directory that would highlight the sophisticated instrumentation, supervisory, and process-control techniques developed in Canada, will be prepared;
- viii) A process-control and instrumentation incoming-buyers mission program will be developed.
