Letter to the Honorable the Secretary of State, Washington	v
Letter to the Most Honorable the Marquis of Lansdowne, Governor-General of Canada	vi

INTRODUCTION.

A Brief History of the Bernoulli Table	vii
The Interchangeable Quantities in the Bernoulli Table	viii
The Interchangeable Figures of the United States and Canadian Records of International Trade	ix
The Tables I, II, III and IV	i
What has become of the Duties?	x
The Mathematical Formula	x
The Cotton and Woolen "Imports" and "Entries for Home Consumption" in Canadian Trade Tables grouped in the form of an Endless Arithmetical Progression	xi

TABLE I.

From James Bernoulli's Treatise—DE ARTE CONJECTANDI.
Bernoulli's 12th Property.
8th

TABLE II.

STATEMENT No. I.—The forged Canadian Imports from 1867 to 1873.	
STATEMENT No. II.—The origin of the "Fire-brick and Clay Series," so named from the substitution of 11,184 dollars worth of "Fire-brick and Clay" for Fish.	
STATEMENT No. III.—The "Fire-brick and Clay Series."	
STATEMENT No. IV.—The items grouped, showing that all the larger terms are sums of the smaller terms.	
STATEMENT No. V.—The "Fire-brick and Clay Series" in the form of an indefinite Arithmetical Progression.	

TABLE III.

STATEMENT No. VI.—Dr. Edward Young's United States Domestic and Foreign Fish EXPORTS for the Fiscal Year 1872-3.	
STATEMENT No. VII.—Dr. Edward Young's Export Fish Trade Figures arranged in the order of Magnitude.	
Section No. I.—Dr. Edward Young's Fish Trade Figures in terms of the "Fire-brick and Clay Series."	
Section No. II.—His Fish Trade Figures grouped, showing that the larger terms are sums of the smaller terms.	
Section No. III.—His Fish Trade Figures further grouped, in the form of an indefinite Arithmetical Progression—First, with 10 as a Common Difference; Second, with 100 as a Common Difference; Third, with 1000 as a Common Difference. These Fish Trade Figures being reciprocally interchangeable with the Canadian "Fire-brick and Clay Series."	

TABLE IV.

STATEMENT No. VIII.—Dr. Edward Young's United States Fish and Fish Oil IMPORTS from British America for the Fiscal Year 1872-73.	
Section No. I.—Showing that Dr. Edward Young's United States Import Fish Figures from British America are made up from sums of Dr. Edward Young's EXPORT Fish Figures to British America.	
Section No. II.—Showing that Dr. Edward Young's United States IMPORT Fish Figures from British America are sums of the terms of the Canadian "Fire-brick and Clay Series."	
STATEMENT No. IX.—Dr. Edward Young's United States EXPORTS of Fish, Shell Fish, Fish Oil and Products of the Sea to British America for 1873-74, with the Canadian reciprocal statement of IMPORTS from the United States, by J. Johnson, Canadian Commissioner of Customs.	
Section No. I.—Showing that the United States Fish Trade Figures are sums of the Canadian Fish Trade Figures, and that both of these are interchangeable with the "Fire-brick and Clay Series," from 1867 to 1873.	

CHAPTER I.

STATEMENT No. X.—The Canadian differences between "Imports" and "Entries for Home Consumption," for the year 1878, in respect of Cottons and Woolens—grouped.	
Section I.—In the form of a continuous Arithmetical Progression	2
Section II.—In terms of the "Fire-brick and Clay" Series	3
Section III.—In Terms of Dr. Edward Young's Fish, Fish Oil, Shell Fish and Products of the Sea, United States Exports to British America in 1872-73	3
The Bernoulli Table	4
The Relation between Bernoulli's Column IV, Dr. Edward Young's Fish Trade Figures of 1872-73 and the Canadian "Differences" for 1878	5
Section IV.—	
Section V.—	
Section VI.—	
Section VII.—	
Exhibiting the relations	5
An Important Property of Bernoulli's Table	6
