THE LIBRARY

—: OF :—

CHOICE LITERATURE.

The Distinctive Points of the Book.

1st. This work aims at providing the public with something never before attempted, viz.: to give in a compact library, at moderate cost, a chosen representation of every standard author, from

HOMER TO LONGFELLOW AND CARLYLE.

2nd. The Selections are made, not only with a view to *instruct*, but also, to *amuse*, and with special care for Family Study, so that parents and guardians may feel perfectly secure in placing the work in the hands of youthful readers.

3rd. To the great majority, who have no library at their hand, this work will be of a *VALUE* which cannot be over-estimated ; and especially will it prove a "short cut" to a general knowledge of Universal Literature.
