HE WORLD'S MINING PAGE.

Whitewater silver mine in the Slocan country. Some ore taken out is said to assay 3242 ounces in silver alone. E. H. Tomlinson, owner of the Last hance, Blizzard and other Slocan silver mines, is in Vancouver, organizing the Last Chance Mining Company, ith a capital of half a million dolors.

The Morrow group on Bear Creek has been bonded to an English syndi-cate for the sum of \$48,000 by George

Dozois.

Mr. Philip Nile, the veteran prospector, has discovered a vein of lead, silver and galena ore, carrying a high percentage, at Crow's (Page's) lagoon, just around the point from Departure Bay Heads, and about five miles in a straight line from Nanaimo. On the surface the vein is two inches thick with every indication of opening out as depth is obtained. This is a practically new region for such a find.

A Carlboo Mine.

A carlboo Mine.

According to The Victoria Times the Horsefiy Hydraulic Company's cleanup in Carlboo was \$250. In consequence of encountering large quantities of cement gravel, the company restricted operations, devoting its attention to a thorough prospecting of the gravel to ascertain what proportion of it is cement, as much gold contained in the cement passes through the sluices to the dump. With a stamp mill the cement could be crushed and the gold saved. An assay of the cement shows over \$10 in gold per ton, nearly all of which is lost at present. It is probable that a 20-stamp mill will be erected before next season, if the prospecting now being done shows a quantity of cement to make such arangement advisable.

Strike on Red Mountain.

Strike on Red Mountain.

Says The Rossland Miner: Three or our shots were fired about 3 o'clock ind these blew off the rusty capping and thed up half a carload of ore which will run from \$60 to \$75 in gold, copper and silver. opper and silver.
The vein is about 20 inches wide,

opper and silver.

The vein is about 20 inches wide, brobably wider in some places, but the fissure is perfect, there being a lear separation between the ore and he walls.

The same paper asserts that one of the very finest surface showings ever een in the camp has been opened up by the St. Elmo people on the Con. St. Elmo ground close to the dividing line between the two properties.

English Syndicate Secures 30 Claims.

Recently Frederick W. North and E.G. lovan, the English mining experts, ame over from London as the repreentatives of the company organized to ake over the War Eagle mine, but as here are certain formalities yet to e executed before this deal is closed hey may not wait for the final transer. They also represent a developing yndicate, and have secured for that yndicate about 30 claims in the vicinty of Rossland. Their plan of operations is as follows: They pay little r no cash down, but where a claim as reasonable promise they agree to pend whatever money is necessary to etermine whether it is a mine or not, and if it is a mine they agree to oranize a company in London, placing he shares on the London market and aking half the shares themselves and iving the other half to the owner or wners of the claim. The theory is nat the shares will become very valuble as soon as they go on the London tarket, owing to the backing of a powerful syndicate. It is a very good plan or a certain class of properties and lessrs. North and Govan have no ouble in making contracts.

They will begin developing opera-

or a certain class of properties and tessrs. North and Govan have no couble in making contracts.

They will begin developing operations in a short time and will distribute a great deal of money in the amp for wages and supplies. The agnitude of the enterprise they have ndertaken may not at first be appreated. It means the employment of larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than is attached to any other concern in the larger number of miners than it is attached to any other concern in the larger number of miners than it is attached to any other concern in the larger number of miners than it is attached to any other concern in the larger number of miners than it is attached to any other concern in the larger number of miners than it is attached to any other concern in the larger number of miners than its attached number of miners than its attached number of miners that number of miners than its attached number of miners than its attach extensive operations. It is the time English capital has taken

companies.

Advices from Grand Forks, B. C., are to the effect that splendid strikes of gold, silver and copper are being made in that neighborhood.

In the Coeur d'Alenes region there is not as much activity as the rich deposits of silver and lead would seem to warrant.

The Horne-Payne syndicate has made several purchases in the Trout Lake section. It now owns the Broadview, \$20,000; Phillipsburg, \$6000; Old Conoma, \$9000; and the Tower and Sunlight, \$35,000, making a total of \$70,000.

THE SILVER BELL MINING COMPANY, of Rossland, B.C., is organized under the laws of British Columbia, for the development of the following mineral claims, viz.: NANCY LEE, LONE JACK and SILVER BELL FRACTION—all adjoining and together forming one compact body BELL FRACTION—all adjoining and together forming one containing ninety acres.

These claims are situated on the west slope of Beer Park Mountain, about three-quarters of a mile from the famous Lily May and Deer Park mines, and about two miles from the town of Rossland.

Four assays made from samples of surface ore taken at different places across the vein gave returns as follows: Gold, silver and lead, total values, \$85.26; \$24.35; \$42.96, and \$42.29. These samples are above the average of those found on the surface of any of the great mines of the camp. Indeed, but few, if any, of the selected surface ores gave as high returns.

your money in any Mining Company, no matter how inviting their properties may seem, unless you are assured that the men in charge of the venture are practical business men, and that they intend proceeding at once with the ACTUAL WORK OF DEVELOPMENT. The English-Canadian Gold Mining Company, operating

announced some days ago that their Rossland manager, Mr. T. R. Morrow, was on his way with men and money to commence work on THE JULIET.

Yesterday Mr. S. J. Sharp, 78 Yonge-street, Secretary-Treasurer of this Company, received the following letter:

Rossland, B.C., September 21, 1896. S. J. SHARP, Esq., Secretary-Treasurer English-Canadian Gold Mining Company,

78 Yonge Street, Toronto:

RE JULIET. My DEAR SIR,-Work on THE JULIET goes forward as fast as possible, although I have experienced considerable difficulty in getting things into shape. Mr. Monaghan, late superintendent of the Le Roi, leaves with me to inspect the mine and instruct us as to the best mode of operation. He is considered to be the best mining man in camp. By next mail I hope to be able to send you some photographs of scenes on The Juliet, with plant and machinery in operation.

Yours faithfully,

P.S.—Mr. Bauer, a local broker, sold a block of 500 shares of Juliet stock at 8 cents here to-day to

George Wright, Rossland, B.C. This is the most satisfactory evidence that the proprietors of THE JULIET mean business. Their miners and plant are actually on the ground and at work. The postseript to

Mr. Morrow's letter is also significant, as it shows that Juliet stock is being sold Read the Prospectus and take an intelligent interest in On- right on the ground to those who are surely in a position to compare, and who consider in conjunction with the strong indications of the presence of a large JULIET AT 12 CENTS THE BEST BUY IN SIGHT. Present indications are that after next assay is taken "JULIET" stock

The Juliet consists of a full claim of about 52 acres, and is situated in the now celebrated Rossland and Trail Creek mining district. The Company hold a clear title. The Juliet and on application to the Provisional Secretary-Treasurer of the Company: many other claims are situated on the now famous Red Mountain range. Among them and adjoining this property is the Romeo, recently bonded by an English syndicate. The Juliet shows large deposits of the precious metal, and from expert reports obtained the company believe this property alone will yield to its shareholders greater profits than those of any mining property in Rossland district. The Romeo is now shipping paying ore. The same vein of ore can be traced through the Juliet, running north and south. This is a business man's speculation, and is owned and controlled by business men who have no "axes to grind" but who are depending on developments, believing that it is not a question, Will money be made, but "How much will be made?" Buy shares to-day-to-morrow they may advance.

Six miners are at work under the direct supervision of MR. THOMAS R. MORROW of Rossland, B.C., and work will be continued without interruption all winter. The facilities opment and Invest- for shipping ore from the Juliet are much better than any working mine in Trail Creek camp; the main tunnel opens up into the Columbia River, where the ore can be dumped on a barge and floated to Trail Creek smelter, a distance of 31/2 miles. A railway runs directly back of the Juliet; there is also water and wood in abundance. This effects a great saving in the cost of handling ore. The Juliet ore, it is believed, can be mined and smelted for about \$13 per ton when further developed.

The promoters and largest shareholders in the company have by resolution agreed not to place any portion of their stock upon the market until sufficient treasury stock has been disposed of to properly develop the mine. 30,000 shares of the capital stock, fully paid up and non-assessable, have by by-law of the Company been set apart for development purposes.

The following are a few of the shareholders from whom the officers and trustees will be selected: JOHN HENDERSON, Manager Lyman GEO. H. MAURER, Manager AgriculBros. & Co., Toronto.
