TEN PAGES—ONE CENT

CUT GRADES ON I.C.R. IS PLAN OF NEW MANAGER

Gutelius Aims at Six-Tenths Over Whole Line

HAUL MORE, GREATER SPEED

Idea is to do Work at Rate of 100 Miles a Year, Most of it in Nova Scotia—New Engineer of Bridges For Road Has Been Appointed

(Canadian Press)

Montreal, June 30.—The aim of the I. C. R. management is to create a six-tenths grade from Montreal to Halifax and Sydney and this change can be brought about at the rate of 100 miles each year, according to F. P. Gutelius, general manager of the government railway system, in an official statement after a trip over the system accompanying the minister of railways and canals.

What impressed the new general manager more than anything else, he said, about the physical condition of the railway. When the change as to grade was accomplished the hauling power of each locomotive would be 100 per cent. in excess of the present capacity.

The change of grade will be brought about on short stretches of the I. C. R. For instance, some twenty miles of the line from Point Tupper to Sydney will have to be rebuilt, but this would not be more than twenty-five per cent. of the distance from the Strait of Canso to Sydney.

The big change will be made between Truro, N. S., and Amherst, which section takes in the famous Foleigh Mountain stretch. Engineers are going over the road, said Mr. Gutelius. There are several projects on foot to remedy this heavy grade, one being the southern route and another to the north but, whatever is done, the six-tenths grade both ways will be achieved and when completed at the rate of 100 miles each year, a very high rate of speed will be obtained on the government railway between this city, St. John and Halifax.

New Chief Engineer of Bridges Mr. Gutelius expressed pleasure at the co-operation he had received from David Pottinger, chief engineer of the different commercial bodies in the three provinces, all apparently indicating that a united effort was to be made on behalf of this railway. He announced the appointment of W. A. Wolf as chief engineer of bridges of the I. C. R., having just concluded an engagement on the Transcontinental as assistant chief engineer. He will at once go over the bridges from one end of the system to the other.

The double tracking of the I. C. R. will come in for a good deal of consideration and much of this work will be taken up by the committee of the year's demand. The piece from Levis to Chaudiere, about thirteen miles, will be done this season. Other sections will be taken up in the near future.

The question of building hotels along the line of the I. C. R. has not yet been discussed by the new management. The general manager will be in Ottawa on Tuesday and he will take up his headquarters in Moncton as soon as possible.

LAY TRACK TO BROAD STREET Council Resolution For Providing Facilities For Local Men

After deliberation in committee the city commissioners have decided to grant permission to the I. C. R. to lay a spur track for use as a siding along the foot of Charlotte street extension, from the Ballast wharf to Broad street and a resolution to this effect will be presented to the council this afternoon.

The permission is given at the request of the local manufacturers and other business men who have been accustomed to use the sidings at the Ballast wharf and who have been hampered by the removal of the sidings which were located on the site taken over by the Atlantic Sugar Refinery.

MILITANTS TRY TO BLOW UP LABOR EXCHANGE Newcastle, Eng., June 30.—Militant suffragettes tried to blow up the labor exchange here on Saturday. A canister of powder was placed in the main entrance to the building and the fuse lighted, but was discovered and the fuse extinguished. "Votes for Women" literature was found scattered all round the place.

WEATHER BULLETIN Issued by authority of the Department of Marine and Fisheries, E. P. Stewart, director of meteorological service

Synopsis—Fine weather prevails this morning throughout Canada except on the British Columbia coast, where rain is falling. During yesterday showers occurred in many parts of the western provinces.

Fine and Warm Maritime—Light to moderate southerly winds fine and warm today and on Tuesday.

SAYS HE IS 149

Chinese Veteran, in New York on Way to Canada, Says That is His Age

New York, June 30.—With 149 years resting lightly on his queasy head, Dr. Cho Choy, who arrived here yesterday on his way to Canada, is undoubtedly the oldest man in the world, if his claim to longevity is true.

He was really angry with the skeptics among the newspaper reporters who thought he might possibly be a few years younger than 149, and stoutly declared that he was born in 1764 at Shan Hai Kwan on the borders of Manchuria, where the great wall of China runs down to the seashore on the Gulf of Choo-Lai.

The aged Manchu arrived in bond with seven other prosperous Chinese, the youngest of whom was seventy, from Cuba to Toronto. Doctor Cho Choy was the leader of the party in every particular. He is more than six feet tall, notwithstanding a slight stoop; is bald while his features are a web of gray wrinkles. He lived for fifty years in his native land and says he spent nearly 100 years in Cuba practicing medicine among the Chinese there. He acquired considerable wealth.

While on Ellis Island the doctor accepted a few dollars and was given a ticket for a valuable lot in charge of a young man on his way to P. E. Island.

A carload of furs, including ten pairs of pure black wolf many thousands of dollars was attached to the Montreal express which passed through the city today. The shipment is meant for the end of a 4,000 mile journey from the middle of the north west to Prince Edward Island. The black foxes, are the property of M. Holland, who is personally taking care of them.

Mr. Holland who is aged about twenty-six, had to travel north as far as Montreal Lake to secure his prizes. He brought some very interesting relics of his trip back with him, one a walrus tusk more than two feet in length which had been broken in two by the Eskimoes—work which, on account of their inefficient tools, took them many months to accomplish. The other a large black bear was another notable trophy.

The greatest caution has been exercised in order to keep the animals, which are very valuable, in good health and appetite. If this is not done there is liability of loss. Last week, Mr. Holland said, in one lot of furs being shipped to Montreal there was a loss of twenty-five through loss of proper watchfulness.

The black foxes which Mr. Holland had in the car will be placed on his extensive ranch near Sumner side. In addition to the blacks he was taking forty pairs of "hatches" or ordinary foxes consigned to different people on the island. The trade in all varieties of furs there is still very brisk.

The men are under martial law for twenty-four hours on the occasion of a bill reducing the penalties inflicted by courts martial when mitigating circumstances exist will be passed unanimously by the house and the chancellor promised to give his support to it when it reaches the federal council.

Only the Socialists, the Poles and Alstonians in parliament voted against the bill which increases the peace strength of the German army by approximately 4,000 men, and 117,000 privates, bringing the total of the permanent force up to nearly 870,000 men.

The third feature of the exciting closing sitting of the parliament before its adjournment for the summer vacation, was the feature of discussion of the bill for raising the necessary money to cover the new military expenditure. This was a feature of discussion of the bill for raising the necessary money to cover the new military expenditure.

The German government, in announcing the feature of discussion of the bill for raising the necessary money to cover the new military expenditure, was a feature of discussion of the bill for raising the necessary money to cover the new military expenditure.

The German government, in announcing the feature of discussion of the bill for raising the necessary money to cover the new military expenditure, was a feature of discussion of the bill for raising the narrow skirts with trouser effect.

New York, June 30.—The much-mooted question of the proper fit for women's fashion is a feature of discussion of the National Ladies' Tailors and Dressmakers Convention here with delegates present from all over the country.

It appeared a general opinion that narrow lines would continue to hold popular with the trouser effect, and the New York delegates were firm for skirts a yard around while Chicago representatives insisted upon a little more leeway—a yard and a quarter with two slashes, one at the front and one at the back.

Louisiana delegates were the most conservative, sticking for a two-yard skirt, no slashes, and blouses, instead of a three piece suit.

The pistol pocket was an innovation credited to the Chicago tailors, and seemed to be generally accepted as a good idea.

One or two patch-pockets were suggested, and if women did not care for the pistol, they might carry their powder puff in one and their purse in the other.

PRINCE ALBERT TO START HOME WEDNESDAY St. John, Nfld., June 30.—After a week spent in fishing on the west coast, Prince Albert attended religious services yesterday on the British wharf at St. John's, and later toured the city in an automobile. The prince is to sail for England on the Cumberland on Wednesday morning.

Married People Live Longest Chicago, June 30.—Married persons live longer than those who are single, according to Dr. C. Clair Drake, of the city health department.

The doctor has figured out that the death-rate of Chicago bachelors is 29 1/2 per cent higher than that of married men. He sets the mortality rate of unmarried women at 40 per cent, higher than that of married women.

KILLS LOVER, EATS HIS HEART

Berlin, June 30.—The existence of cannibalism in Germany came to light last week during the trial of a widow named Kockert, who on Saturday was sentenced to death for murdering her lover. His remains she mutilated and burned. The woman confessed having baked the heart of her victim and eaten it.

THROUGH ST. JOHN TODAY WITH FOXES FROM THE FAR WEST

Valuable Lot in Charge of Young man on His Way to P. E. Island

Firebug Destroys One Of Scotland's Finest Castles

Cost Half Million and Contained 100 Rooms—Suffragettes At Work Again

Glasgow, Scotland, June 30.—Ballindrain Castle at Balfour, Stirlingshire, one of the largest in Scotland, was gutted by fire this morning, only the bare walls remaining. The fire seems to have been incendiary as the private fire apparatus had been cut and rendered useless.

The usual rumors laying the blame for the outrage on the militant suffragettes, who were at work on the castle walls, were not connected with it. The castle cost \$500,000 and was built by Sir Archibald Ernest Orr Ewing. It contained 100 rooms. It had been unoccupied for some time.

Leuchars, Scotland, June 30.—The important railway junction here connecting Edinburgh with Dundee and Aberdeen, and within a few miles of St. Andrew's golf links, was burned to the ground today. The authorities believe the fire was started by militant suffragettes, who are in strong force in Dundee, across the Tay.

London, June 30.—Four men arrested yesterday while participating in a militant suffragette raid on the official residence of Premier Asquith and Mr. Lloyds George were fined \$10 each with the alternative of fourteen days' imprisonment. A fifth man who had taken a minor part in the disturbance, was fined \$5 or a week in prison.

(Canadian Press) Three Rivers, Que., June 30.—The supremacy of the Church in matters moral and religious, its right to be sole director of the education of its youth, and the necessity of a united Catholic party in Canada, instead of the old division of Liberals and Conservatives are among the matters which today's session of the congress of the "Association Catholique De La Jeunesse Canadienne Francophone" will consider.

These doctrines were advanced at Saturday evening's opening meeting of the congress. "The Church," said Dr. Baril of Laval, "has the sacred right to direct the education of its youth and to see that none of the books of instruction are allowed to contain anything in the least injurious to the doctrines of the Catholic Church. It is the business of the state to give protection and financial assistance, if need be, but not to take charge of national education."

Bishop Cloutier Cites Free Masons and Jewish Immigration as Inimical to Church—Also Alarmed at Growth of Critical Spirit Among Laity (Canadian Press)
