NATIONALISTS AND TRUSTS WELL REPRESENTED IN NEW GOVERNMENT

Ottawa, Oct. 11.—At 6 o'clock last night Mr. Borden was still wavering as to his final choice of ministers and the portfolios had not been definitely allotted. At that time Armand Lavergne was spending towards Ottawa from Quebec on a special train, and before the final slate was to be submitted to his excellency, the extreme exponent of the Nationalist views was to be consulted. However, time was pressing and delays only meant more embarrassments. So after 11 o'clock Mr. Borden finally sought his excellency after the latter's return from the theatre to Rideau Hall,

submitted his slate to him for approval, and at 1:30 a.m. this morning the list was handed out to the Conservative press. Mr. Lavergne could not then have effected any change, but it is difficult to see in any case, what more the Nationalists could have asked for or obtained.

Nationalists Land the Plums.

Mr. Monk has been given the chief spending department. Mr. Pelletier, who had the Nationalist backing in preference to Mr. Casgrain, the nominee of Mr. Forget, and the straight Tory influence of Montreal, has

been given the post office department, which has immense patronage and political influence. Mr. Nantel, whose right to cabinet preference is admittedly based only on the Nationalist influence, has been given the inland revenue department.

Finally, Mr. Perley, the representative of the Protestant element in Quebec, has been left without a portfolio.

For the first time since confederation Quebec has been left practically without a Protestant minister. The principal comment heard here today in connection with the new ministry is that the Nationalists

have won out handsomely in the first round of the struggle for political influence and prestige in the new administration.

The Forget faction is openly disgusted and disgruntled. Mr. Borden wanted Mr. Forget to come in without portfolio but the latter, after he found out yesterday afternoon that the Nationalists were in command of Mr. Borden's Quebec ear-

left the city, announcing that he had declined a cabinet position. The ostensible reason given is that he is financially interested in the securing of a certificate for

La Banque Internationale, the application for which is now pending.

Split Predicted.

What compromise, if any, Mr. Borden has reached with the Nationalists on the naval question is still unknown. The best informed opinion is that the whole matter has been conveniently left over for the time being, and an effort will be made later to reach some basis on which the present divergent imperial and anti-imperial elements can agree. At present the question is to be temporized with as long as possible. Politicians here predict a

sure split between the Ontario and Quebec ends of the cabinet sooner or later.

The Ontario representation is also causing much comment. The turning down of Andrew Broder in favor of Dr. Reid was explained in yesterday's dispatch, as was also the selection of Col. Sam Hughes for the militia portfolio.

The choice of Mr. Crothers for the labor portfolio was also a last hour change. On Saturday Mr. Middleboro was Mr. Borden's choice, though Mr. Crothers had been the favorite at first. The friends of Jos. E. Armstrong, including himself, had also almost succeeded on Saturday in getting

him into the cabinet, thus satisfying his long-cherished ambitions. Mr. Crothers was to have been selected with the speaking of the commons. On Sunday the kaleidoscope turned again and Mr. Crothers was summoned. His inclusion gives western Ontario a representative though his special qualifications for the labor portfolio are somewhat hard to see.

The desire of Senator Longheed to be left without the worry of administering a portfolio made it possible for Mr. Borden to give Ontario a sixth portfolio, instead of five, as originally intended, and also

(Continued on page 8, fifth column.)
