means by which that support is sought to be given; the unfair and unequitable mode of universal taxation proposed, does not coincide our views of right and justice evident that the movers, aiders and abetters of this scheme are to use a slang term "going it blind," for Mr. Editor what body of men in their sane, sober senses would agree to pay \$10,000 in hand coin for a purpose which has

To being ! no existence!

We confess we were infinitely surprised to see gentlemen who have always hither to acted with such extrem equition in matters of a put lie nature (we will except one teiling instance ".he Deep Sea Wharf;") genth men in fac who invariably turn a sixpence over two of three times to make sure that it is not a shift ling, act so lavishly with public funds as the were prepared to do on the occasion, in ques not for a certainty, nor rearcely even a probability of its ever being returned to then ci her directly or indirectly. The most dar-ing speculator or gambler would not for a mo-

ent hazard such a chance. Let us calmly, dispassionately and seriously consider: what are the chances of the Rai way being kept open after this enormous burden on ax has been taken upon us . We cannot fin a better solution to the problem than in the words of the Manager of the Rulway, given we will admit fairly, and we believe truthful ly, he says : -"I can gonrantee you nothis excepting that while I continue in office I wi agree to pay 6 per cent, interest on the money. I may be removed from my position and I can not say whether my successor, will continu uarantee or not The road may change hands and the new proprietors finding that this end of it is not paying, may n with the same complacency as I do, and wil trassfer the whole traffic over the St. S. Branch making St. Stephen the termious, by which arrangement they would, according to present arrangement they would, according to present Po-tmas statistics, save \$10,000 per annua. These Maryland. are the facts of the case, gentlemen, I don't wish to decrive you. It is impossible for me to guarantee the running of the Road one month after you have assisted me to repair it. I am only prepared to answer for my indiviothers, but this much I wil say to you, that I think that there is a probamy being able to continue its working if you will only assist me." And yet afte ndid declaration, and in the eye and face of this mass of uncertainties our wise acres agree to swallow the bat without the slightest hesitation, let the consequences be what they may.

Surely Ratepayers of the Town of St Andrews you will not obdorse such a b ind, mad, suicidal policy as this. Be propared to assist the Railway by every means in your power but in such a way, that whilst scenning to aid and support, you will ensure beyond the shadow of a doubt, its usefulness and advantages to yourselves; this is a duty, which it ing, you should be actuat sense of its responsibilities not only to your selves, but to those who will come after you; for rest assured that many of your children will feel the good or bad effects of this men We are now led into a consideration of this proposed assessment, and we infer that the idea is to assess the Ratepayers of the Town indiscriminately in proportion to the property (real or personal) which they may own. Now then to our mind there is a number who should take the largest share of the responsibility up Who are they? the merchants, sh powners, ho el keepers, ex
