William Grandine whose labors in and around the city were much appreciated. But he was not allowed to prosecute his work in peace, and at the instigation of the minister of the Church of England he was arrested as a lawbreaker and had to give bonds to appear at the Supreme Court. His experience was somewhat similar to that of the Rev. Mr. Earley at Sussex, speaking of that gentleman mention among the indignities to which he was subjected was that of being compelled trate to ride seven miles on horseback with his face towards the horse's tail. As Mr. Grandine's offense had been committed in the neighborhood where was then at Sheffield, hearing of the years he was the leader of the choir arrest, went at once to Fredericton and in company with Duncan Blair waited sciences dictated that His Excellency admitted their claim and dismissed them with words of kindness and approval of their work. While Fredericton appears in the minsuit as early as 1794, it was not long centinued as such, and there does not seem to have been any one regularly stationed there until 1810. But the little flock was not left wholly uncared for. The ministers of that day were real itinerants, made the most of their time and opportunities and covered much ground. Thus it was they might be in one place today and miles away the next, and while such ministrations and the attendance large, while the multitude of Chinese lamps lent to were in many ways unsatisfactory, they were the only ones possible under the then existing conditions. "No stranger leaves Fredericton without visiting the grounds of Governor Wilmot, which are always open to the public. It is one of the most delightful spots I have ever seen. We boast of our handsome gardens and grounds in the suburbs of Boston, but it has never been my fortune to see any which in the magnificence of flowers, in the exquisite taste of their arrangement could ompare with these gardens. Besides the flower gardens there are three extensive croquet grounds with beautiful rustic arbors, quiet walks, beneath tall elms and pines, and spacious lawns. * * It has been charged by some of his opponents (politically) that he has deoted his time to the study of theology small number of ministers the work and around the city was entrusted and around the city was entrusted a local preacher, Thomas D. Stokoe, in the latter he must be a very able theologian. * * * It was the good fortune of our party to spend an evening at his residence, and the result of the visit was to deepen the impression previously received that the people of New Brunswick have abundant reason to be thankful that they have such a man at the head of their government, a man of large experience and broad and frequently used for the holding of bazaars, picnics, etc., and I was told that while between three and four thousand persons have attended these gatherings not a flower has been taken, or a single trespass committed. I doubt if such a thing could be true of Boston. The Methodists of Fredericton have raised over \$6,000 at festivals held

their beautiful church, besides large sums raised for other purposes." Fredericton has had its jokers who have not hesitated to use the church and the minister as means to an end. One of these called attention to the figure of a man's hand on the top of the steeple, with the index finger pointing upwards while the others pointed downwards, and intimated that only one Methodist in every five found their way to heaven. Another after hearing a rather doleful account of the state of the church in one of the outside sections, remarked, "What else was to That moment came to Mr. Wilmot in be expected when the interests of the former of which he was invited by Mr. three excellent young preachers, with whose work no fault could be found.

LONDON, Nov. 10 .- If the Public Congress has accomplished Health othing else, it has coined a new word for the London fog.

Heretofore that peculiarly London nstitution will be known as "smog," a combination of "smoke" and "fog." The new word was coined by Dr. H. A. Des Voeux of the Coal Smoke

The kitchen fire, charged with being one of the causes of "smog," was place. The forenoon text, was Rev. tried, found guilty, and sentenced to eternal banishment by two eminent

Dr. Des Voeux even professed to be able to detect three distinct diurnal fogs-the breakfast, the luncheon, and the dinner fog. For years the fac-tory chimney had suffered for the misdeeds of the kitchen fire, he said. He observed that on Sunday, when the kitchen fire was lighted later in the day, the early morning fog was an hour late.
"The time has nearly come when

legislation should demand that all cooking should be done without smoke," he said. As electricity was cheapened, he added, the electric fire would gradually take the place of the coal fire. As it was, the number of gas fires used for cooking had in creased by 470,000. Smokeless cooking would remove not fewer than 600,000 moking chimneys.
