Anasthesia, by Nitrous Oxide, acts as a healthy stimulant, unstreaded like other stimulants, by sub-equent depression. By superoxidizing the blood it gives to the patient a vigor for resisting the exhausting effects of the operation. Ether and Chloroform on the contrary deoxodize the blood, and acts as reditives to depress rather than elevate the tone of the system.

The Directors have reluctantly declined 131 Proposals; this has been done after careful examination. The policy acted upon from the first ness, Consumption in its early stages, and all Diseases of the Throat and Lungs. This remedy is too well known and two highly esteemed to require commendation here. It is regarded a necessity in every household, and is heartily indorsed by the medical faculty, clergy-men of every denomination, anthors, editors, members of Congress, and many of our most

distinguished men in public and private life.
