The final game of the series between the Torontos and ¿Uticas was really a magnificent exhibition of ball playing. The universal opinion of those who were lucky enough to be present was that it was the finest game ever played in Toronto. On the part of the home team it was errorless. Halpin, however, was guilty of four out of the five errors charged against the Uticas. Hengle fumbled a grounder from Osterhout in the fatal seventh and Toronto's second run was due to an error by McKeough. In the fourth innings Halpin assisted Faatz out at first, Spill followed with a two-bagger and on the throw in, Halpin at tempted to catch the runner at third burth three wildly and Spill scored. Osterhout flied out to right field. McGuckin followed with a hit to Shindle behind third and beast the ball to first. Halpin let an easy one from Weir pass and McGuckin was the temptation to catch Weir on the way to second, which was finally accomplished, Halpin, Hengle and Latham taking a hand in, but in the meantime McGucken crossed the plate. Subscriber. He is now playing because he was released nearly two months ago, because, it is to be presumed, the management thought be could be improved upon.

The Torontos will have their hands full on Sept. 7. Guelph has won half a hundred games and lost one. Utica has also won half a hundred games, but when it came to a real test of trength she lost to Toronto, thanks to Veach and his support. If a player is fined for bad lay, why shouldn't he be rewarded for good?

Fancy a game without an error, a passed ball. Fancy a game without an error, a passed ball as a wild pitch and only three hits against the leaders of the league. That's Toronto's record resterday, Good luck has played for Utica and and luck for Toronto, but a team that can play as ours did yesterday deserves encouragement from the people. Go and see them tackle Osweg to day at 4 o'clock and to morrow aftermon at 3.30.

A Terror to Hostife fron-Clads.

From the New York Times.

We do not see how an iron-clad can be successfully defended against torpedo-boats like the Peacemaker. Derigible torpedoes have been devised that can be driven a long distance with great accuracy, but the steel netting used by men-of-war is still a formidable obstacle in the path of inventors. Some of the structure must be exposed above the surface of the structure must be exposed above the surface of the water. It may disappear from the surface of the water. It may disappear from the surface of the water. It may disappear from the surface, move for a mile at that depth and then rise again, at all times obedient to those who are carried in it. A vessel of this kind does not fear a man-of-war's guns. It is not checked by a netting. Its approach is not disclosed by anything that is seen on the surface. It can be driven to a point twenty feet below the keel of an iron clad, and from that point can release the torpedoes, which will immediately become attached to the vessel's bottle of the structure disclosed by anything that is seen on the surface. "Oh! But I Salivated him?"

"was the actual exclamation of an honest physician, spoken of one of his patients to whom he had given calomel for the cure of biliousness and a diseased liver. And he had salivated him for certain, from which he never recovered. All these distressing consequences are avoided by the use of Dr. Pierce's "Pleasant Purgative Pellets" a purely vegetable remedy that will not salivate, but produce the most pleasing effect, invigorate the liver, cure headache, dyspepsia, biliousness, constipation and piles.
