

Every American Manufacturer

who contemplates opening a branch factory in Canada, to share in the big and growing Canadian trade, and to enjoy the British Imperial Preferential Tariff

Is Welcome to Our Service

W E have a complete register of all Canadian industrial centres, and will supply interested manufacturers, free of charge, with detailed information concerning the specific advantages offered by various Canadian cities and towns. This comprises reliable and up-to-date information covering: Shipping Facilities, Power Rates, Labour Conditions, Raw Materials, Existing Industries, Factory Sites, Municipal Inducements, etc.

We have complete details, plans and photographs of over 70 available vacant factories.

INDEPENDENT LOCATION SERVICE

O UR advice has the unusual merit of being unbiased because we have no reason to extol the advantages of any one town to the detriment of others. On the contrary, our own best interests are consulted by giving candid recommendations, entirely suited to the needs of our clients, without reference to the conflicting claims of rival interests and competing municipalities.

Our fees are paid by the Municipality where you locate. The information we offer cannot be obtained from any other single source.

Save Time and Money

O NE hour spent in consulting our files will save weeks of unguided travel. Our introductions are valuable. Your enquiry will bring a concise explanation of our service. If you state the general character of your business, class of labour employed, and other particulars pertinent to your business, it will help us in directing you to a suitable Canadian location.
