

PRACTICAL PROOF

ST. GEORGE, ONT., JAN. 16TH, 1902.

The De Laval Separator Company, Toronto.

DEAR SIRS.—As Superintendent of the Canadian Dairy cattle at the Pan-American Exposition, Buffalo, 1901, I had access to every part of the Model Dairy and Laboratories at all times. As a result of my daily observations of the work of the U. S. and De Laval Separators, I was thoroughly convinced of the absolute superiority of the De Laval in every respect.

It was regularly operated by the attaches of the Model Dairy, and its work, under such ordinary conditions, was much more satisfactory than that of the competing machine in the hands of experts under the most favorable conditions of this cream and excessive speed. During the first run of the U. S. there was complaint from the Breed Managers on account of its poor work. In the second run, it required experts and abnormal and unpractical conditions to produce better results.

I have since purchased a No. 2 De Laval Separator, and having used it for some time, will state that it fully meets my expectations, and pleases me in every particular.

Yours truly,

G. W. CLEMENS.
