Farm Machinery -- Its Development.

Continued from page 10

have been known since 1836, but they are now much improved and built to cut from 16 to 40 feet.

British and American practices in threshing machines are radically unlike. The original Scottish thresher contained a drum with beaters acting upon the grain in the sheaf which was fed between rollers. This was afterward improved by making the beating drum work in concave, the grain and the straw being rubbed between the two and then carried to the shaker. "The Western improvement upon this apparatus," says a high authority, "consists mainly, besides numerous details which secure speed, lightness and effectiveness in having upon the drum spikes or teeth which pass between fixed spikes on the concave; the English still adhere to the flat beaters like narrow wings or slats placed longitudinally, with edges projecting outwardly from the drum."

HAYING TOOLS.

The tedder is another form of implement which was first patented and used in England; but the English tedder was too cumbersome for Western farmers and our inventors soon produced the light and efficient implements now employed. The horse rake was invented about the beginning of the nineteenth century. In its crude state it was estimated that it did the work of six men. Patents were granted for hay rakes as follows. A flop-over rake in 1822, spring-tooth rake in 1839, dumping sulky rake in 1848. In very recent years there have been numerous patents for side delivery and other improved forms of horse rakes. Machines for baling hay and straw date from 1853. The continuous press was invented in 1872, and is now in quite common use among farmers, especially in its mounted form, wherever it is desired to prepare hay and straw for long distance shipments. Hay presses at first operated by horse power are now moved by steam or gasoline engines. A later improvement in this connection was the self-tying device, which contributes to the elimination of labor.

DRY FARMING!

Dry Farming just a few years ago meant sure crop failure.

Today all through the great semiarid belt where in 1880 to 1895 thousands of husky, ambitious men with their families were forced to give up their homesteads in poverty and despair, and millions upon millions of eastern money vanished because of continued crop failure from drought. A marvelous change has come, not by accident or because of climatic changes, but

CAMPBELL, THE FATHER OF DRY FARMING.

Yes, H. W. Campbell, the world wide recognized Father of the Great Revolutionizing Process of tilling the soil, known universally as the Campbell system of soil culture, has spent over 30 years farming in the West observing and directing soil tillage experiments.

FOR 20 YEARS CAMPBELL WAS CALLED A CRANK

Farming the world over is now being moved by this CRANK.

Twenty years ago Campbell said the whole semi-arid belt could be successfully farmed, others sniggered with great disgust.

Today it is being successfully farmed and all are sniggering with great pleasure.

Five years ago Campbell said the average yield of the farms in every state in the Union could be doubled by his Soil Culture. He is proving it. Are you interested?

No matter where you farm, Texas, Canada, California, or Indiana, with irrigation or without, you can learn how to increase your crop from Campbell's Soil Culture. Sample copy, latest issue, 10 cents. Yearly subscription, \$1.00. A postal card will bring free circulars describing his Text-Books, and other publications. They are interesting.

THE CAMPBELL SOIL CULTURE COMPANY,

317 Insurance Building, Lincoln, Nebr.

"SAVE THE HORSE" SPAVIN CURE.

The most perfect and superior remedy or method known, with greater power to penetrate, absorb and cure than anything discovered in veterinary medical science or practice. Besides being the most humane, "Save-the-Horse" is the most infallible of all known treatments. It is effective from the first application, making a blister, or leaving a particle of after effect. Armstrong, Mo.,—Enclosed \$5. Please send me bottle of "Save-the-Horse." I used your medicine on a horse that was lame in the hind leg. I had a severe case with the results hoped for. I gladly recommend it. Ship at once and enclose. Yours truly, GEORGE W. LANGRISH, Route 4, Allen, B. C.—Last year, with one-half bottle only of "Save-the-Horse" Spavin Cure, a customer of mine treated a sprained hock of four years' standing. The horse had not been lame for some time. Many other remedies had been applied without success. "Save-the-Horse" effected a complete cure. Yours truly, C. B. BOURNE, Drugs and Stationery, \$5.00 a bottle, with signed guarantee or contract. Send for copy, booklet and letters from business men and trainers on every kind of case. Permanently cures Spavin, Thoroughbred, Bloodstock (except low), Curb, Splint, Capped Hock, Windpuffs, Bone Sore, Fevered Tendons & all Lameness. No cure or loss of hair. Shave neck and legs. For full details, send 10¢ Van Horn St., Toronto, Ont. and Birmingham, N.Y.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweny, Capped Hock, Strained Tendons, Sprained Wind Puffs, and all lamenesses from Spavin, Ringbones and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give positive relief. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. (For proof of descriptive circulars, testimonials, etc. Address The Lawrence-Williams Co., Toronto, Ont.)
