## Use A Fertilizer— Says Gov't. Agricultural Dept.

Why fly in the face of Providence? The sound advice, contained in the bulletins of the Department of Agriculture, is based on the knowledge of the best agricultural experts in the country and the accumulated experiences of thousands of farmers.

Almost every soil lacks some element of the plant food necessary for a maximum crop, and each crop leaves the soil poorer. Therefore, these important sustainers of plant life—potash, nitrogen and phosphoric acid—must be put back into the soil in the form of a fertilizer.

## Gunns Shur-Gain Fertilizer

Is in growing demand amongst farmers who want the best. It gives much more satisfactory results than a home mixed fertilizer because the ingredients are scientifically proportioned to meet the requirements of both soil and crop and are blended into a perfectly balanced plant food. Expert chemists have prepared these formulas, checked by Government analysts, and the mixing is done under careful supervision.

Gunns Shur-Gain Fertilizer is finely ground, making it more economical to use and easier to apply. It will not burn or sour the soil, and is very rich in humus. There is a formula to fit the requirements of every soil and every crop. These are fully explained in our booklet, "Bumper Crops," and also general directions for their use. A copy is ready for you, if you will ask for it.
