

Heart Trouble Cured.

Through one cause or another a large majority of the people are troubled with some form of heart trouble.

The system becomes run down, the heart palpitates. You have weak and dissy spells, a smothering feeling, cold clammy hands and feet, shortness of breath, sensation of pins and needles, rush of blood to the head, etc.

Wherever there are sickly people with weak hearts Milburn's Heart and Nerve Pills will be found an effectual medicine.

Mrs. Wm. Elliott, Angus, Ont., writes:—"It is with the greatest of pleasure I write you stating the benefit I have received by using Milburn's Heart and Nerve Pills. I suffered greatly from heart trouble, weakness and smothering spells. I used a great deal of doctor's medicines but received no benefit. A friend advised me to buy a box of your pills, which I did, and soon found great relief. I highly recommend these pills to anyone suffering from heart trouble."

Price 50 cents per box, or 3 boxes for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

ARE YOU IN WANT OF A CHOICE BULL TO HEAD YOUR HERD?

We are offering choice bull calves sired by Fountain's Boyle, who won first prize at Toronto, London and Ottawa, who also headed first-prize herd at Toronto and Ottawa. Also offering some choice heifers.

D. DUNCAN, DON, ONT.
DUNCAN STATION, C. N. O.

Professor—Jones, will you differentiate between the words "discover" and "invent"?

Jones—Well—er—Peary discovered the Pole, and Cook invented it.

QUESTIONS AND ANSWERS. Miscellaneous.

SELECTING BREED OF SHEEP —STRAWBERRY CULTURE.

1. Whether are Shropshire or Leicester sheep the best to keep? I have had no experience with sheep.

2. What is the best way to care for strawberries the first year?

A NEW BEGINNER.

Ans.—1. There is no best breed of sheep. Both those mentioned are good. It is well to keep the same breed as is commonly kept in the district, as buyers of stock sheep are attracted where there are numbers to be procured.

2. Cultivation should begin soon after strawberries are planted, and continued throughout the summer. Some hand hoeing will be needed also. Blossoms ought to be pinched off the first season, so that strength may go into runners. Allow matted rows to a width of two feet to form, keeping space between rows cultivated. It pays to place runners where they are wanted as they form, as the earlier the plants root, the better will be the next season's crop.

CORN FODDER FOR HORSES.

My farm is a rented one and small. The meadows are very badly overrun with wiregrass, and I am very scarce of hay for the coming winter.

1. Are cornstalks injurious to horses? Some say they are, and others claim to be able to keep horses fat on them.

2. What feeding value has fodder corn, sown thickly, chiefly for a bulk of feed, compared with timothy hay, for horses?

3. What feeding value has hill corn, sown thinly, say an average crop, with grain on, for horses? E. A. F.

Ans.—1. Cornstalks are wholesome food for horses, if well cured and free from smut.

2. Prof. Henry, in "Feeds and Feeding," says that for brood mares, idle horses, and colts, fodder corn of good quality will be found an economical substitute for timothy hay. It should not, we think, be fed alone. This also should be considered, that horses will eat the leaves and softer parts only. But Prof. Henry thinks that, admitting this, the much greater tonnage of fodder corn over that of timothy hay produced from a given area, makes it a more economical food.

3. Few horsemen feed corn in this way, though some ears of corn with a ration of oats do very well, and the stalks may be fed to advantage in moderation.

APPLE PACKING: WHO IS RESPONSIBLE?

A, a local apple-buyer, sells B, a distant apple-operator, 1,000 barrels of apples yet unpicked and unbought. The contract stipulates that the price agreed upon, \$1.75 per barrel, may be increased 15c. per barrel, if the price to be paid by A to the farmers is higher than he anticipated at the time of making the bargain. The contract stipulates, also, that the apples shall be f. o. b. at this price at stations named; and that B's name shall appear on the barrels, and that B shall supply a man to oversee the packing and attend to the shipping.

In case of fraudulent packing, who is responsible under the Inspection and Sale Act (Fruit Marks Act)?

SUBSCRIBER.

Ans.—The Dominion Fruit Inspectors do not interpret the law nor examine contracts, but in case of fraudulent packing, they recommend a prosecution against the person whose name appears upon the barrels.

In this particular case, B would be held liable under Section 321.

A would be liable under Section 320, for not placing his name and address upon the barrels, as required by Section 320(a).

A would be liable also for an additional charge under Section 321, if B produced evidence showing that he bought the apples packed, and that A was the owner of them at the time of packing.

It has cost several apple-operators a large sum of money this year to defend suits from the fact that they placed their names upon barrels, representing themselves as the packers, although they were not the packers (the owners at the time of packing).

A. McNEILL.

MAKE DAIRYING PAY BETTER

Strain your milk as it leaves the cow, not afterwards, and see that you strain milk only, not milk, dirt and bacteria. You can make pure milk an absolute certainty by using the

STERILAC SANITARY PAIL

Note its clever construction. The funnel is detachable. As the milk falls on the slant towards the milk, it passes direct to the strainer into the pail. All dirt falling in to the opening is caught on a deep metal shelf inside the funnel—not on the strainer—thus milk and dirt never come in contact. You can use ordinary cheese-cloth for straining. Capacity 14 quarts, no joints on the inside; it is easily cleaned. Price, \$2.50. Used by all up-to-date farmers and dairymen.

PURITY MILK COOLER-AERATOR

Cools milk rapidly, within 2 degrees of running ice water, well or spring water, whichever you use. Rapid cooling and thorough aeration ensures milk keeping sweet for 48 hours and destroys odors. The milk flows through the perforated pail on top on to the corrugated body which ensures the milk running down slowly so that it is perfectly cool when it reaches the retainer pan. There are outlets at each side of this pan. This cooler is well made, has ordered seams, is easy to clean and simple to operate. Will last for years. Price, \$6.50. Guaranteed as represented. Write for large catalogue of dairy supplies, FREE.
