

Know the make-up of roofing you buy
On the make-up depends how long it will last, and how little it costs you in the end.

Genasco
THE TRINIDAD-LAKE-ASPHALT
Ready Roofing

is made of *genuine* asphalt, produced by Nature in Nature's slow sure way. It has the lasting life that gives it greatest resistance to weather.

Genasco costs about the same as ordinary roofings in the beginning, and costs less in the end, because it lasts so long.

Comes in rolls with either mineral or smooth surface. Ready and easy to lay. Ask your dealer for Genasco. Write us for the valuable Good Roof Guide Book and samples—free.

The Kant-leak Kleet, for smooth-surface roofings, does away with cement and prevents nail-leaks.

SYNOPSIS OF DOMINION LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency of the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section along side his homestead. Price, \$3.00 per acre.

Duties—Must reside upon the homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price, \$3.00 per acre. **Duties**—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. CORY,

Deputy of the Minister of the Interior

An IHC Manure Spreader is An Investment—Not an Expense

A MACHINE that makes two dollars where only one was made before is a good investment. Careful tests made at the Ohio Experiment Station showed an average increased crop yield of \$15 an acre when eight loads of manure were properly spread. Spreading with a fork, it would take at least sixteen loads to an acre to produce the same result. It is easy to see that by fertilizing twice as much ground with the same quantity of manure, an IHC manure spreader soon pays for itself. Add to this saving an increase of \$15 an acre in the value of your crops, and you at once see why we urge the purchase of an

**IHC Manure Spreader
Corn King or Cloverleaf**

IHC spreaders are made to do their work well. Ask the IHC local dealer to show you the self-aligning removable boxes on the main axle; notice that the axles have roller bearings to reduce the draft; study the apron construction, and note the large rollers on which it runs. These rollers lighten the work of the team to a very great extent.

There are a number of other features which are exclusive to the IHC line of spreaders. If you appreciate machines of extra merit, machines that spread manure in ample range of quantities; machines which can be equipped with drilling attachments for use on market gardens, and above all, machines which are made in sizes convenient for every farm, investigate IHC spreaders. Go to the local IHC agent and look carefully over the machine he shows you. Get catalogues and full information from him, or, write the nearest branch house.

Guelph, Ontario

BAKER WIND ENGINES

Are built for hard, steady work, and keep at it year in and year out.

IT IS the reputation which "BAKER" Wind Engines have fairly won and steadily held ever since their first appearance on the market, 30 years ago, that should be considered. They are famous for their durability, simplicity of construction and easy running. "BAKER" Wind Engines are so designed that the gears cannot wear out of mesh. The wheel is built on a hub revolved on a long stationary steel spindle, requiring no babbitting. It has a large number of small sails which develop the full power of the wind and enable them to pump in the lightest breezes. Has ball-bearing turn-table and self-regulating device, and all the working parts are covered with a cast shield, protecting same from ice and sleet. The above are only a few of the many features that have placed "BAKER" Mills in the lead. Let the H.-A. Co. agent give you complete information, or write direct for booklet.

We make a full line of Steel Towers, Galvanized Steel Tanks, Pumps, Pneumatic Water Systems, Spray Pumps and Gas and Gasoline Engines.

WINDSOR, ONTARIO

DON'T BURN UP MONEY

Don't waste your trees for cord-wood. Get an "American" Portable Saw Mill and turn them into lumber worth many times what cord-wood is. Plenty of fire-wood in the limbs and stags left over from the lumber and nothing better than our "Clipper" Wood Saw to saw it up. You may not need lumber yourself, but there is always a ready market at good prices among your neighbors or in town. Get your neighbors to let you saw lumber and cord-wood out of their timber, too. A small outlay for an "American" Portable Saw Mill will put you in an independent and profitable lumber business that you can run when the farm doesn't need you. Our new book, No. 32 tells how to go about it. Write to our nearest office for it today.
