

THE LEADER'S PATTERN SERVICE

LADIES' TUCKERED ETON JACKET. With Elbow Sleeves. PARIS PATTERN NO. 2005. All Seams Allowed.

GIRLS' SUSPENDER DRESS. With One-Piece Plaited Skirt and Separate Gimpes. Paris Pattern No. 1886. All Seams Allowed.

No outside garment that has appeared this season reveals more of the elements that constitute style than this pretty Eton. For development, voile, Panama, serge or mohair, linen, pique and the poplinette will be all found adaptable. As represented, it is made of poplinette with insertion of Richelleu embroidery set into the deep collar and the sleeves.

The pianoforte or suspender style of frock is so becoming to the figures of young girls that mothers are reluctant to relinquish it. This latest addition to that list, made of pale-green English pique and worn with a gimpes of ecru all-over embroidery is a remarkably pretty development of this idea.

The pattern is in 5 sizes—32 to 40 inches bust measure. For 36 inch bust the jacket requires 5 yards of material 20 inches wide, or 2 3/4 yards 36 inches wide, or 2 1/2 yards 42 inches wide, or 1 7/8 yard 54 inches wide; 2 yards of insertion to trim.

The pattern is in 4 sizes—6 to 14 years. For a girl of 10 years the dress requires 5 1/2 yards of goods 20 inches wide, or 2 7/8 36 inches wide, or 2 5/8 yards 42 inches wide, or 2 3/4 yards 48 inches wide, or 2 1/2 yards 54 inches wide; 3/4 yard of edging to trim.

Price of pattern, 10 cents.

MISSISSIPPI GORED SKIRT. With Side-Plaits at Centre of Front and Back and Two Box-Plaits at Each Side. Paris Pattern No. 1976. All Seams Allowed.

The nine-gored skirt offers many advantages in the way of graceful lines and is therefore always popular. As a model for a separate skirt, this one for pongee, serge, cheviot, Panama, brilliantine, mohair, and any of the varieties of Summer silk stands pre-eminent.

The pattern is in three sizes—13 to 17 years. For a girl of 15 years, the skirt, made of goods with nap, requires 7 1/2 yards 20 inches wide, or 4 1/8 yards 36 inches wide, or 3 5/8 yards 42 inches wide, or 2 3/4 yards 54 inches wide; or, of goods without nap, it needs 7 yards 20 inches wide, or 3 7/8 yards 36 inches wide, or 2 1/2 yards 42 inches wide; 3/4 yard of insertion to trim.

Price of pattern, 10 cents.

LADIES' SHIRT-WAIST. With Front Yoke and Long or Three-Quarter Length Sleeves. Paris Pattern No. 2007. All Seams Allowed.

It appears that there never can be variety enough in shirt-waists to suit all tastes. The pretty model illustrated is made of blue-pink polka-dotted flannel relieved with a yoke and cuff-band made of several rows of narrow Cluny insertion.

The pattern is in six sizes—32 to 42 inches bust measure. For 36 bust the waist needs 4 yards of material 20 inches wide, or 3 3/4 yards 27 inches wide, or 2 3/4 yards 36 inches wide, or 2 1/2 yards 42 inches wide; 1/2 yard of insertion to trim.

Price of pattern, 10 cents.

CHILD'S DRESS. With Yokes and Centre-Front in One. Paris Pattern No. 1970. All Seams Allowed.

One of the smartest little frocks for a child of three years old is illustrated. The yoke and panel are not only one of the most charming of styles when used without embroidery, but when it is thus used it is the daintiest little garment imaginable.

The pattern is in 3 sizes—1 to 5 years. For a child of three years old it needs 3 7/8 yards of material 20 inches wide, or 2 yards 36 inches wide, or 1 7/8 yard 42 inches wide; 1/2 yard of insertion to trim.

Price of pattern, 10 cents.

A SLOPPY WAY WITH THE SLOPS

BUT CHINESE LAUNDRIES IN FUTURE ARE TO BE "MOS' AWFLY CLEAN"

From Thursday's Morning Leader The unsanitary state of certain Chinese laundries in the city became known some time ago to Chief Harwood and the sanitary inspector, who tried to persuade the tenants to put a stop to the nuisance. Two further infractions of the by-law occurred however, last week and the offenders had to pay stiffly for their carelessness. The cases were heard yesterday morning by Magistrate McCausland.

Mack Sing, who carries on a business in the corner of Oiler street and Eighth avenue, was defended by J. F. Frame.

J. A. Birtwistle, the inspector of nuisances, stated that he visited the defendant's premises on Monday afternoon, and found them to be in a filthy condition. There was a square hole in the building through which slops were thrown on an adjoining lot.

City Clerk J. Kelo Hunter, produced the original copy of by-law No. 393, which governed the proceedings. Isaac Wright, scavenging contractor, reported that three barrels for the reception of slops stood at the back of the premises.

The defendant was called and kissed the Bible without demur. His solicitor experimented with pigeon English as follows: "You get barrels?" "Yes. Who tell you get these barrels?" "Oh, myself."

"You stop slop in barrels?" "I tell my boy to put all slop in barrels. Did you throw any slop on ground?" "No."

Mr. Birtwistle said he saw you place; he find slop on ground. "No, no slop on ground."

Mr. Frame raised several points affecting the scope of this by-law and maintained that his client had not provided barrels and had not been given negligent. The magistrate said it was quite possible that Mr. Frame or any other lawyer might, to use a well-known saying, "bring the law down."

He imposed a fine of \$10, plus \$4.75 costs, or alternatively, thirty days.

Mr. Frame asked for a minute of the conviction and the magistrate agreed to provide it.

"With a smile that was childlike and bland—a smile which to its credit, did not desert him when he was tried by a \$7.50 fine, Bin Kee, pleaded "a little bit guilty" to having disposed of his slops on July 26, 1907, in a way rather than the right one. It was all the fault of that new boy, he explained.

"We want you to keep the place clean," said the magistrate.

"Oh, yes, I make it mos' awfl' clean," this with an assuring grin. The defendant paid the fine. "Now be a good Chinaman," said the magistrate, bidding the Americans welcome to his Cadmen house. The guests telegraphed their gratitude for the emperor's gracious invitation and warmest admiration of everything they had seen at Cadmen.

The millionaires partook of a banquet given in the emperor's villa, adjoining the factory. During the meal, the emperor, who was in the city, bidding the Americans welcome to his Cadmen house. The guests telegraphed their gratitude for the emperor's gracious invitation and warmest admiration of everything they had seen at Cadmen.

The millionaires congratulated the emperor on the possession of successful factories and prosperous farms, and were warmly welcomed on their arrival by officials of the imperial household. There they were shown the Kaiser's villa, which was a magnificent residence, and also a successful manufacturer, cattle breeder and wheat grower.

Autograph letters of instruction from the emperor showed to the Americans revealed the fact that his majesty personally supervises the various branches of his business at Cadmen.

BIG MANUFACTURER SELECTS REGINA

THE CANADA RACINE SATTLEY CO. WILL MAKE REGINA HEADQUARTERS

From Friday's Morning Leader It is good news for Regina to know that one of the largest concerns in the United States making wagons, drays, plows and every description of agricultural implements, has decided to make Regina its headquarters for the whole of Manitoba, Saskatchewan and Alberta.

Captain Blenkhorn, who in days gone by has seen active service in the British army in the Sudan and elsewhere, will take up his permanent residence in Regina at the present moment. The Captain is in treaty with Alderman Wilkinson for a building in the Wilkinson addition.

The Canadian Racine Sattley Company, Inc., Capt. Blenkhorn will represent in the Queen City, represents a consolidation of two large factories in the building through which slops were thrown on an adjoining lot.

City Clerk J. Kelo Hunter, produced the original copy of by-law No. 393, which governed the proceedings. Isaac Wright, scavenging contractor, reported that three barrels for the reception of slops stood at the back of the premises.

The defendant was called and kissed the Bible without demur. His solicitor experimented with pigeon English as follows: "You get barrels?" "Yes. Who tell you get these barrels?" "Oh, myself."

"You stop slop in barrels?" "I tell my boy to put all slop in barrels. Did you throw any slop on ground?" "No."

Mr. Birtwistle said he saw you place; he find slop on ground. "No, no slop on ground."

Mr. Frame raised several points affecting the scope of this by-law and maintained that his client had not provided barrels and had not been given negligent. The magistrate said it was quite possible that Mr. Frame or any other lawyer might, to use a well-known saying, "bring the law down."

He imposed a fine of \$10, plus \$4.75 costs, or alternatively, thirty days.

DISCOVERY STIRS SCIENTIFIC WORLD

SIR WILLIAM RAMSAY HAS EFFECTED TRANSMUTATION OF METALS

NEW YORK, Aug. 2.—A London dispatch to the Times says that Sir William Ramsay has promised to communicate shortly to the Chemical Society an account of a discovery, which in the words of so conservative a scientific public as the Lancet, in its number issued yesterday, "marks an epoch in the history of science, since his investigations have shown that a given element under the powerful action of radium emanation, undergoes degradation into another."

"In short," adds the Lancet, "the transmutation of elements is actually a fact accomplished."

Reversing the process sought by the ancient alchemists, who believed that there was a substance by means of which the baser metals could be transmuted into the higher, Sir William has effected the degradation of the metals by means of gas evolved from radium.

Sir William, in an interview, said: "I am engaged in writing the results of my research work, which will be published at the end of August. The paper will prove that Sir William has further degraded copper to the first member of its family, namely lithium. In other words, he has effected the transmutation of copper."

The Lancet continues: "For ought we know to the contrary, the time may ultimately come in the course of ages when the metallurgy of the world will be degraded to the alchemy of the ancients, and the metals, which the 'hobnob metals,' are slowly breaking down, and that gold, platinum, uranium, and other elements of high atomic weight, will disappear, and their descendants be common-place elements. This would be a revolution in the metallurgy of the world, exhibiting high atomic weights have, after all, a complex, unstable constitution, the tendency being to resolve into simpler substances."

"Those remarkable discoveries remind us of the alchemists' creation, and presentiments of the ancients and of the presentiments of the alchemists, who evidently had some sort of conviction that after all there is a primary matter from which all other elements are formed by various condensations. He is a bold man who nowadays confesses skepticism about anything. The world has seen men who have said 'Impossible,' and generations who succeeded them will have seen the impossible come to pass."

ACTOR STEALS GEMS WORTH \$75,000

DEPOSITED IN CHARGE OF BERLIN HOTEL MANAGER—CONFISCATED BY POLICE

BERLIN, July 31.—Last night a packet containing jewelry to the value of \$75,000, which had been deposited in the care of a manager of a Berlin hotel, was confiscated by the police. It forms part of the proceeds of a robbery perpetrated a few days ago at Nuremberg by a young actor named Fritz Luetze, who had been appearing at a theatre in that town. The thief himself, together with his supposed accomplice, Fritz Horschel, has disappeared, and his personality is at present engaging the close attention of the police of the Old and the New Worlds.

So far as his record has been investigated, it suggests that Luetze's most recent exploit was only the last in a comparatively long career of international crime. While yet a boy he attracted the notice of a wealthy man, who loaded him with presents of jewelry, and with these he seems to have procured himself a trade connection. At any rate, he was entrusted by a Nuremberg jeweler with pearls and other gems to the value of \$75,000, for which he gave bills. The jewels he took to Vienna and pawned. He then sold the pawn tickets to another jeweler, who redeemed the pledges.

Luetze next told the Viennese jeweler a story of a wealthy relative in Nuremberg who wished to make a large purchase of gems, and persuaded him to allow his sister to accompany him to that town with a box containing not only the redeemed jewelry, but others in addition, to the value of \$25,000. While they were in Nuremberg he had no difficulty in obtaining possession of the case and making off with it.

For some reason not yet fully explained, he returned to the Nuremberg jeweler the gems which he had originally obtained from him, but persuaded him to travel with them to Berlin, where he assured him that the purchaser was to be found. The merchant left the jewels with the manager of his hotel, where they were to be kept until he returned. The remaining \$25,000 worth Luetze pawned for \$7,500 with the state loan office, which, as the result of his transactions, had come to regard him with confidence.

It has already been discovered that Luetze was in the habit of masquerading as a student, and other fashionable pleasure resorts as a man of wealth and family. When down on his luck, he shared with Horschel.

MISSIONARIES WANTED Sixty on Way Out From Britain—Many More Wanted

TORONTO, Aug. 2.—Although 60 missionaries are coming from Great Britain to engage in mission work under the direction of the Presbyterian church in Western Canada, there is need for many more. Rev. Dr. Carmichael has written to Rev. Dr. McLaren that about ninety men will be required for the field in the Manitoba and Saskatchewan synods. Dr. McLaren arranged with fifty to come out when he was in the old country recently, but the latter part of the month.

SHARK WAS VAIN Attempted to Wear Barrel-Hoop Necklace and Choked to Death

Nature fakers, attention Here is the story of a vain shark that attempted to wear a barrel hoop as a necklace and choked herself to death. Of course, it must have been a female shark. She was found dead on the beach at Rockaway recently, having arrived at night with the high tide.

The shark was about ten feet long, fitting closely a and her neck was a barrel hoop and hanging from a post where her Adam's apple ought to be. If a shark had an Adam's apple, was a barrel hoop and hanging from a post where her Adam's apple ought to be. If a shark had an Adam's apple, was a barrel hoop and hanging from a post where her Adam's apple ought to be.

"It is all very plain," he explained. "We know that sharks frequent the ocean only because the garbage scows are dumped. This was probably a social leader of the school."

"Some time yesterday she encountered this stave and hoop floating on the waves. The idea of decorating herself occurred to her. She slipped the loop over her head and held a reception, in the course of which refreshments were served."

"After partaking freely of the refreshments her shark ladyship attempted to remove the necklace, but discovered that it had become attached to her. Those marks around the hoop show where her maid and her husband made vain attempts to remove the ornament. Finally, discovering that the resources of her habit were insufficient to rid her of her decoration, she hurried for Rockaway, in the hope that Bill Devery might run across her and take it away from her."

At the conclusion of the lecture of the deep sea Sherlock Holmes those in the audience fell upon the remains of the vain shark and despoiled them. Commuters, under the inspiration of the signs they read every morning on the painless dentistry emporium across from the Atlantic Avenue Station of Long Island Road, removed the teeth. Others hacked off the tail and fins. Various boarding house keepers were noted hovering in the distance awaiting the departure of the souvenir hunters and various astronomical novelties will undoubtedly appear on the tables of some Rockaway feeding places this evening.

An enterprising showman endeavored to corral the carcass for purposes of exhibition, but was deterred by the recital of the experiences of a couple of amateur P. T. Barnums who ran a show consisting of a decaying shark at Coney Island some eight or ten years ago. Between the board of health and the exhibit they were driven into bankruptcy, one losing \$4 and a tent, and other a straw hat and a megaphone.
