Outbreak Deliberately Planned. FOR HIS HEALTH. No Political Significance in Pope's Projected Trip. Rome, June 18.—The Observatore Cattolico, of Milan, the leading authoritative organ of the Vatican, commenting upon the usual rumors that the Pope intends to spend the summer months at Castel Gandolfo, affirms that the Pope actually does leave the Vatican and goes to his country seat at Castel Gandolfo, which is also Papal territory.

It concludes with this significant statement: "The passage of years does not alter any rights, but modifies the situation. Hence the fact, which ten years ago would have had only one meaning, can be differently interpreted now. If the Pope, following his doctor's orders, goes to Castel Gandolfo, thus safeguarding his health in the interest of the church, his position remains unchanged."

STUART GUILTY.

PERPETRATED MURDEROUS ASSAULT ON SYDENHAM FARMER.

Fired Three Shots at Man, One of Which Shattered Eyeball and Leaves Sight Permanently Affected—Admits Robbing T. E. Vanstone's Store.

Oven Sound despatch: At 11 o'clock to-night, after having been out almost an hour, the jury brought in a verdict of guilty in the case against Albert Stuart, who was charged with wounding Mr. James Morrison by means of a revolver while he was on his way home from here on the night of the 21st of February last.

Mr. Morrison, the victim of the murderous assault, told how he had been going home on the evening night and had noticed a man walking beside his wagon, when about four miles north of here. He had invited him to ride, and the invitation was accepted, but his companion had shown a desire to do no talking, and refused to get on the seat.

Mr. Morrison, as well as Wm. Burr, who saw the man in the wagon at the post-office, positively identified the prisoner as the man who had ridden in his rig that night. Other parties identified him as having been seen walking in that direction earlier in the day. Evidence was also produced as to his past bad record.

The defence rested on Stuart's own tale of his doings that day, except that one witness was brought who was sure of having seen him elsewhere, and that was sometime earlier. In his evidence he admitted having on the same night entered and robbed the store of T. E. Vanstone on Poulett street.

HOW DOES A MOSQUITO BITE YOU?

She Carries a Set of Lancets, and Her "Bite" is in Reality a Surgical Operation.

Perhaps up to this time you have been content to be bitten by Miss Mosquito—for only the female mosquito bites—and have never taken the trouble to find out how she does it. Sketch No. 1 will show you how the mosquito's head looks when greatly magnified. A to E are four sharp lancets. Upon settling on your skin, Miss Mosquito brings these lancets into one close bunch and presses their united points through your skin. Then she pulls out the lancets, puts in her proboscis, or trunk (D), and sucks up the blood. Not content with that, she inserts a drop of an irritating fluid, and it is this that causes the keen smarting and itching.

You see, therefore, that every mosquito bite is in reality a small cut, and that into every cut drops a drop of irritating fluid. Here is just what Zam-Buk does. Zam-Buk is not only a healing balm, which soothes, closes up and heals cuts, wounds, etc., in a marvelously short time; but it is also an antiseptic. What harm may poison in a wound do it is well known that mosquitoes spread fever by injecting their poison! Zam-Buk is good for insect stings, but it is good in a far wider sense. It prevents harm arising from puncture in any wound, not only in the bites or stings of insects.

After a long series of experiments, testing the effects of Zam-Buk on harmful and poisonous bacteria and disease germs, Mr. W. Lassalle-Scott, the noted analyst, reported that "the antiseptic and bacteriocidal powers of Zam-Buk exceed those of the caustic carbolic acid of commerce." Think what that means! Everybody knows that what that means! Everybody knows that Zam-Buk has more power to kill germs than this highly caustic substance, and still it can be applied to wounds, ulcers, blisters, stings and skin diseases, and injuries of all kinds. When so applied it soothes the pain, while its antiseptic power acts in full operation. It stimulates the cells immediately under the epidermis and builds up new, healthy skin. It combines germ-killing power of the highest order with soothing and healing. While being one of the most powerful antiseptics yet discovered, it is so mild and so soothing that the skin of a newly born babe is benefited by its application. "My baby had a rash on the skin some-

thing like eczema, writes Mrs. J. Rosson, of Aurora. It was very troublesome and made the child very ill. I tried all sorts of ointments and salves, but no good came of their use. Then Zam-Buk was brought to me and the third supply cured the little one completely. "I never saw anything heal so quickly in my life as a deep cut on my husband's chin healed when we applied Zam-Buk," says Mrs. H. T. Parks, of Wabash, Ont.

Mrs. J. F. Baker, of Antwerp, says: "I think Zam-Buk just fine for skin diseases. Having once proved it, I would not be without it in the house. The ex-champion wrestler of America, Mr. Hugh Lawson says of it: "Zam-Buk heals cuts and bruises as nothing else does that I have even met with. I had a piece of flesh badly torn on my arm, and anticipated being unable to use my arm for a long time. In two days Zam-Buk closed the wound and in a few days it was covered with new skin. I shall always give Zam-Buk a good name."

The Rev. W. C. Leeper, of Mella Rectory, Enfield, says: "For years I suffered from piles, but Zam-Buk cured me. I have great confidence in recommending it."

And so, wherever you may be, or in whatever station of life, you inquire, Zam-Buk is praised by all. It is made from vegetable essences and contains no trace of any animal fat or any mineral coloring matter. It is easy to apply, is always clean, never stains or dyes, and in all ways is an ideal balm. All druggists sell it at 50 cents a box, or you may obtain it direct from the Zam-Buk Co., Colborne St., Toronto, upon receipt of price. While of general service for all skin injuries in insect cases, Zam-Buk is especially good for insect bites and stings, cuts, burns, bruises, eczema, pimples, running sores, spreading sores, scalp diseases, poisoned wounds, festering sores, piles, ulcers, bad legs, abscesses, boils, ringworms, erysipelas, scrofula, psoriasis, barber's rash, stiffness, rheumatism, and all injured, chafed, diseased or inflamed conditions of skin and tissue.

To obtain a free trial box cut out this article and write across it the name and address of the person to whom you wish the company at above address, together with your full name and address, and a one-cent stamp to pay return postage. Your application will then receive immediate attention.

PROVINCIAL POLICE. FOUND BODY IN OLD WELL.

THE QUESTION SAID TO BE UNDER CONSIDERATION NOW.

Would Be Properly Paid and Organized and Work in Conjunction With the Staff of Inspectors—Rumors of a Reorganization.

Toronto despatch: Rumors regarding the reorganization of the Provincial detective force have been revived since the death of Inspector Murray. So far as can be ascertained, there seems to be little foundation for stories to the effect that the force is to be considerably increased and the whole working system reorganized. It was reported in apparently well-informed quarters yesterday that the intention of the Government is to add only one man to the existing staff, consisting of Inspectors Joseph E. Rogers and William Greer, and that he will not be selected from any of the many gentlemen who have lately been mentioned.

A real difficulty in the administration of justice lies, however, in the lack of a fully-selected and properly paid Provincial police. It has been suggested, and it is said that the Government is giving the idea serious consideration, that a carefully-selected and adequately-paid Provincial police force should be maintained, with at least one man in every county, and in some of the larger counties more, as well as those now in the unorganized districts on the frontier. Such a force, acting in conjunction with the Provincial inspectors, would, it is urged, be invaluable in checking crime, as well as in capturing many criminals who now escape.

BOMB KILLED THIRTY-THREE.

Result of Attempt at Assassination of King Alfonso. Madrid, June 18.—An official report states that 33 deaths resulted from the throwing of a bomb by the Anarchist Moral on the occasion of King Alfonso's wedding. Nine of the persons injured are not likely to recover.

The Government has appointed a special commission to ascertain the source of a fund of \$100,000, which, it is alleged, was placed at Moral's disposal for the purpose of assassinating the king. Six Anarchists have been arrested at Barcelona for publishing a letter congratulating Editor Nakens, of El Motin, for hiding Moral after his attempt on the life of the king.
