## Murray-Mogridge Mines

Accomplishing Excellent Results From Development Work—Good Values Expected in Yell—Increasing Interest in Gold Issues \$18-250.

For some time interest in the market for the shares of gold mining companies has been steadily increasing and from the showing that these issues are making it is apparent that a substantial gain in market value is about to be received.

During the period of industrial depression with the resultant neglect of securities in general, the stocks of gold mining companies were entirely overlooked as the true situation underlying these issues were ignored. It was not generally remembered that every step in the process of development of conditions was a benefit to those companies, as it aided in bringing about lower operating costs in the way of cheaper material used in mining operation and cheaper and more efficient labor.

Gold is a staple commodity, commanding a fixed price and a market for every ounce that can be produced. In view of all these facts, it is not surprising that gold mining stocks should be exhibiting robust strength at this time. As a matter of fact, it is surprising that these issues did not begin to show greater activity and sell at higher levels long before this, but, nevertheless, the present activity presages higher levels for gold stocks, and it would seem to be good judgment to give these issues careful consideration at this time.

In the group there are one or two which appear to offer greater possibilities in the way of market price than others, and the most prominent issue is, undoubtedly, the stock of the Murray-Mogridge Mines, Limited, which is a shareable consideration strength on the outside market at its present price of 48 cents bid, 50 cents asked.

This company was organized under the laws of Ontario in 1919 and took over the properties of the Murray-Mogridge Mining Company located in the great gold producing area about 50 miles southeast of the famous Porcupine camp and nine miles north-east of the Kirkland Lake Camp. These properties consist of approximately 650 acres on which, up to the present time, five distinct vein systems have been discovered. The development work on the property to date consists of thousands of feet of surface trenching, and all the mine veins exposed carry good values. Two shafts have been sunk at a distance of 3,600 feet apart, one of which is down to a depth of 50 feet and the other of 235 feet.

From the latter shaft, known as No. 2, 500 feet of drifting and cross-cutting at the 50, 100 and 200 foot levels has been accomplished, showing satisfactory results. In one drift where a fault zone appears to the face of the south drift the assays show an average of \$18.50 of gold per ton for over a width of 55 inches and from the fault to the face of the north drift an average of \$12.50 a ton for a width of 58 inches.

From reports of engineers who have examined the property it is seen that the veins carry to considerable depth.

The company is well managed and its officers and directors include some of the most prominent men of the highest repute in Canada. The president of the company is Gordon Grant, vice-president, C. G. F. McFarland, and A. E. Marks, secretary and treasurer. The Hon. F. B. Carroll, chairman Dominion of Canada Railway Board; William L. Banfield, vice-president; W. H. Banfield & Sons, Ltd.; Douglas Murray, D. L. Grant, J. R. Starr, W. W. Sloan and J. L. MacDowell are on the board of directors.

The stock in the last year has ranged between 45 cents and 63 cents a share, while in the past two years its high price has been 77 cents and its low level 45 cents.

In view of the development work and excellent results now being realized and the increasing interest in gold mining stocks, the shares of Murray-Mogridge Mines, Limited, at current levels offer speculative possibilities of an upward start.

For shares and further information investors will please communicate with Murray-Mogridge Mines, Box 55, West, P. O. City.

## Juvenile Offenders.

## SENTENCED TO PENITENTIARY.

James Furlong, aged 10 years, and Arthur Young, arrived by yesterday's express from St. George's in the custody of Police Sergeant Goodland. They will serve sentences of 3 months and 6 months respectively for burglary. Furlong, despite his tender years, is an incorrigible and specializes in the burning of barns and hay ricks. The present charge against him is of breaking into the Royal Bank at Port au Port. Young was sentenced for breaking into the Log Cabin at Stephenville. A man who was sentenced to 6 months for larceny at Grand Falls, arrived yesterday in the custody of Constable Martin of that town.

## Women's Secret Society.

American women now have their own secret society. The members seem to aim at rivaling Freemasonry. "The Daughters of the Nile" is the name of the order. The membership is limited strictly to women, and Mrs. Harding, the wife of the President, is claimed as one of the latest initiates. The organization is really the counterpart for women of the Order of the Mystic Shrine, known only in America and Canada, of which President Harding is a member.

The presiding officer is known as the Supreme Queen, and her subordinate is called Princess Royal, Princess Thral, Princess Badoura, Princess Marshal, Princess Recorder, Princess Banker, and Princess Chaplain.

There are various "Ladies in Waiting," each of whom is known as a "Princess," the Lady of the Keys, the Lady of the Gates, and Junior Past Queen.

## Spurgeon and the Madman.

"On three occasions," writes the Rev. W. Y. Fullerton, in his biography of the great Nonconformist minister, "Mr. Spurgeon had interviews with madmen under dangerous conditions. One entered the vestry at the Tabernacle, shut the door, and declared that he had come to cut Mr. Spurgeon's throat. 'I would not do that,' said Spurgeon. 'See what a mess it would make on the carpet.' 'Oh, I never thought of that!' said the madman, who eventually was led quietly out of the room."

"The second occasion was when he was lying ill at the Hotel des Anglaises at Mentone. He had persuaded his friends to go for a walk. Scarcely had they left when a man, evidently mad, rushed in and said, 'I want you to save my soul.' With remarkable presence of mind, Spurgeon told him to kneel down by the bed, and he prayed as best he could. Then he told the man to go away and return in half an hour. It turned out that he had eluded the vigilance of his keepers. As soon as he had gone the doctors and servants were summoned, but he had stabbed someone in the street before he could be overtaken."

"On another occasion Spurgeon happened to be in the entrance hall when someone knocked loudly at the door. He opened it himself. A man with a huge stick rushed in, slammed the door, and stood with his back against it, declaring that he had come to kill Mr. Spurgeon. The great thing was to get rid of him, so Spurgeon said, 'You must mean my brother; his name is Spurgeon.'"

"Ah," said the man, "It is the man who makes jokes I mean to kill." Then you must mean my brother. He makes jokes," said Spurgeon.

"The unwelcome visitor drew himself up and said, 'No, I believe you are the man,' and then he asked Spurgeon whether he knew a certain asylum. 'That's where I live, and it takes two men to hold me. Are you strong?'"

"Yes," said Spurgeon. "You don't know how strong I am. Give me that stick."

"Thoroughly cowed, the man obeyed, and Spurgeon, opening the door, told him that if he was not out of the house in less than a minute he would break every bone in his body. The man fled, and as a result of information given to the police he was soon under restraint."

C. C. C. Band Dance (by permission O.C.). C. C. C. Hall, Tuesday next, Sept. 6th (eve whole holiday). Music by full band. All latest hits. Tickets—Ladies, 80c; Gent's, \$1.20; Double, \$1.50.—Sep. 1st.

## Flying Torpedoes.

Experiments, throwing a new light on the problems of aerial war, are reported as having taken place with great secrecy near Paris.

Small heavier-than-air machines, really torpedoes with wings, are sent up into the air under their own power, and entirely piloted, and are then controlled by wireless telegraph.

Machines are flown for considerable distances and made to carry out manoeuvres while under wireless direction from the ground.

A further development contemplated is for a method to be perfected by means of which a pilot in an aeroplane can control the movements of one of these air torpedoes.

This would mean that after a torpedo had been launched and controlled up to a certain height by the land station, its direction would be taken over by a pilot in a special aeroplane, who would send it on ahead until he had guided it to its target, he himself remaining at some distance.

ROLLER SKATING RINK.—The Prince's Rink will be opened for roller skating sometime next week, and men are now at work getting the floor ready. Mr. P. E. Outerbridge has recently been appointed Secretary-Treasurer of the Rink.

In stock:

"GRIP" and "PINK," also

ICE CREAM FRUITS.

P. E. OUTERBRIDGE, King's Road, Telephone 96, 1711, 1705.

## Ladies' English Brogue Shoes

in Popular Ox Blood Shades

All the rage this season and may be worn right up to late fall. Solid leather throughout, prettily perforated overlay, double sole and shows the overlapping fringed tongue. You have seen them and admired them. Possess a pair.

Our Price

\$14.00 Pair

Sizes 4 1-2, 5, 5 1-2, 6

James Baird LIMITED

## Rules for Foretelling the Weather.

What Barometric Changes and Shifting of the Wind Indicate Under Certain Conditions.

The following rules are adapted for use with aneroid barometers:—

A Rising Barometer.—A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in summer, indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and low temperature indicates wind and rain from the northward.

A rise with southerly wind indicates fine weather.

A Steady Barometer.—With dry air and seasonable temperature, indicates a continuance of very fine weather.

A Falling Barometer.—A rapid fall indicates stormy weather.

A rapid fall with westerly winds indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in summer and snow in winter.

A fall with increased moisture in the air, and the heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing indicates wind and rain from the southward.

A fall with dry air and cold increasing in winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northern wind, including from northwest-by-north to the eastward, for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast-by-south to the westward, for wet weather, for stronger wind, or for more than any of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

Weather Indications.

If the wind "backs" that is, shifts around with the sun, expect better weather. If the wind "backs," that is, shifts around against the sun, be fairly sure of worse weather.

When objects at a distance can be seen very clearly, look for a hard blow by the following night or day.

A "mackerel back" sky, or "mares' tails," are the forerunners of a blow, several hours away.

Flying scud seen in the upper air going in a different direction from the surface wind betokens a violent change of direction. Flying scud on the surface of the clouds generally brings a strong breeze at once.

Small clouds, distinctly separated, appearing in the northwest sky in the evening during the summer season, almost invariably precede a fine day.

A rainbow in the morning means bad weather; and in the evening good weather. A ring around the moon generally precedes wet weather; so do, in the summer, exceedingly bright stars.

A north-east wind, in the fall

months, starting about or a little after sunrise, generally means a gale by the middle of the forenoon.

An easterly wind in the winter, followed by a "mell" or fog, is almost surely the precursor of a stormy westerly gale, sudden and violent.

When the sun is seen through, or just about a thickness that is neither cloud or fog, yet denies one a sight of the horizon, and may be seen in color from gay to blueblack, it is time to seek the nearest shelter. So it is when an indescribable low, roaring noise can be heard all over the water, with no apparent cause; this is at times called "the birth pang of the storm."

All or any signs may fall. I have steered seaward in a dense fog through occasional rifts in which could be seen overhead a ragged, brown scud flying with dreadful rapidity from the south-east, and, though we got torrents of rain, not even an offshoot from the blow above penetrated to the calm on the surface.

A very dark red sky in the morning means bad weather and a gray morning sky, fine weather.

A rolling line of cloud across the sky is bringing a hard squall and so is a very large black cloud, particularly if the darkness of the cloud fades away into a grayness that reaches downward toward the earth.

Rain or snow falling in the distance can always be told by the softer gray below the clouds that reaches toward the earth in either perpendicular or in slanting lines.

With the wind anywhere from the eastward, a fine drizzle is generally the beginning of a hard storm.

If the sun takes its first look at you from under clouds that are low on the horizon, the day is apt to be fair; but if from over some clouds, bad weather is apt to follow.

Soft clouds indicate soft, easy weather, and sharp, well defined clouds, with decided coloring, hard weather. But, when you see little clouds, red, purple, green or copper colored, seeming around under large heavy cloud-masses, run for shelter.—Canadian Motor Boat.

## Personal.

Mr. T. Rendell of Heart's Content came to town yesterday, bringing his little son to enter General Hospital for a slight operation.

Mr. James Rendell left by this morning's train for points in Trinity Bay on a short business trip.

## First on the Appetite List

ONCE the crispness and charm of Grape-Nuts have been tested by the family, there's one item that stands prominently out in the marketing list thereafter.

That's Grape-Nuts.

The twenty hours of continuous baking have produced, from the natural richness of wheat and malted barley, a food that is uniquely sweet with sugar developed from the grains themselves, and whose crispness and flavor make a delightful appeal to every member of the family.

And Grape-Nuts is soundly nourishing—a great builder of health and strength.

Served with cream or milk, as a cereal for breakfast or lunch, or made into a pudding for dinner.

See that your marketing list includes this delicious, economical food, today. All grocers.

"There's a Reason" for Grape-Nuts

Made by Canadian Postum Cereal Co., Ltd. Windsor, Ontario
