OZENA.

Ozena is the professional or technical name given to an advanced form of catarrh in which ulceration has eaten through the membrane lining of the hose to the cartilage of the bone. Any case of catarrh may end in ozone, but it most frequently occurs in those who are naturally scrotulous. The discharge takes place through the nostrils or through the throat, and is generally of a yellowish or greenlish yellow color, frenquently tinged with blood, and hlmost always attended by an offensive smell. In the language of Dr. Wood, of Philadelphia, "the disease is one of the most obdurate and disagreeable which the physicians has to encounter. In bad cases the breath of the patient becomes so revolting as to issolate him from society, and to rende him an object of disgust even to himself."

In some instances pieces of bone become separate and though off, leaving deep, unhealthy ulcers which secrete a blood matter, and are extremely difficult to heal.

Pains in the head and over the frontal sinus

ain tubes to the internal ear.

Pains in the head and over the frontal sinuses, imprring memory, and even insanity, frequent'y spring from its extension to the brain.

The greatest danger, however, because the most common, is that it will extend downward and affect the lungs. In most cases of pulmonary disease catarrh is present in some degree, and in many instances it causes a large share of the patient's discomfort.

Besides these grave consequences, all of which are liable to spring from scrofulous catarrh or Ozena, there are others which, if less dangerous, are sufficiently unpleasant. It occasions great unhapiness to thousands of both sexes, by isolating them and preventing their settlement in life. An offensive running from the nose, with foul breath, is about as great a calamity as can befall young people.

The treatment of this disease requires much care and perseverance to conduct it to a successful issue. The remedies must be carefully adapted to the stage of the disease in each case, and applied directly to the parts affected, which may be done by the patients themselves, whereever they may be, and without hindrance to their daily occupation.

I have seen so many of those cases saved by inhalation that I cannot doubt its curative powers or regard any case necessarily hopeless unless both lungs are extensively involved. The great vrlue of natation that I cannot doubt its curative powers regard any case necessarily hopeless unless bot lungs are extensively involved. The great vrlue of inhalation in the treatment of all head, threat an lung complaints has been indorsed by all the leadin medical journals of England, France and Germany If possible call personally for consultation an examination, but if impossible to do so, write for a "List of Questions" and "Medical Treatise. Charge Against Squire Peters. LONDON, Feb. 6. - There is trouble among the county magistrates here owing to some of them trying London East cases after the passage of a bylaw establishing a police court in the village. It is charged that there is a great deal of irregularity in the magistrates' courts, and Squire Peters is accused of serving a summons on a prisoner brought before him and charging him 25 cents for the service. It is held that this action, besides being infracting, was illegal, as a justice has no legal power to assess costs upon any party to a case till after it is decided.

A Boom in Cotton Mills. MONTREAL, Feb. 6.—At the annual meeting of the shareholders of the Montreal THE LOCAL LEGISLATURE.

There was nothing of very much interest n the proceedings of the local house yesterday. The well-worn Mercer case was again talked over. Two motions by private members stood over for the government to obtain information, one by Mr. Gibson of Hamilton, who is the repre-

statement of the cost of the Mercer reformatory. He said the amount of the estate was \$185,000. The expenditure up to the end of 1880 was \$160,000, but this was provincial money advanced on the security of the estate, for the estate was not yet realized. Was it the attorney governor were relized. Was it the attorney general's money he had advanced as administrator of the estate or had he given an unauthorized order on or had he given an unauthorized order on provincial funds. The government had been precipitate in expending money against the opinions of some of their own supporters. The estate had been used for pickings for friends of the ministers; Mr. Edgar and his firm had received \$7000. \$14,000 in all had been spent in law costs, and the case was not concluded yet. He did not believe the province had any right to for need of the money. Because young Mercer could not prove the marriage of his father and mother he had been deprived of the property by an old feudal law. The province had voted \$90,000 and \$10,000, but it was out of the funds of the Mercer estate. He was certain neither the Dominion nor imperial governments would have done

nor imperial governments would have done as the Ontario government.

Mr. Mowat said there was very little new in what Mr. Lauder said. It would new in what Mr. Lauder said. It would be monstrous if in a christian country there was no difference between bastardy and legitimacy. A CAPTAIN FINED For Disobeying the Quaratine Laws at Halifax

HALIFAX, N. S., Feb. 6,-Mayor Fraser this morning had a consultation with Dr. Wickwires health officer of this port, and Dr. Moren, city medical officer, regarding the action of Captain Ritchie of the Peruvian, in taking his steamer to the wharf in spite of the warning of the pilot that she should be anchored in quarantine when there was disease such as smallpox on board. The captain has also this afternoon allowed steerage passengers to land against Dr. Wickwire's orders, that gertleman's instructions being to permit only saloon passengers to come ashore. It was decided that Capt. Ritchie had certainly been guilty of a breach of the quarantine laws, and Mayor Fraser requested Dr. Wickwire to see that the fine of \$400 provided by the act was imposed upon him.
