Heligoland

Heligoland is a name seen frequently in the newspapers despatches at this time. for it belongs to an important naval base in the North Sea. Its horizon, so small in fact, that one can command its entire boundary from one spot on it and take in the sea-line in one great circle. It is only one mile long and a quarter of a mile wide at its widest place, and in shape might be likened to a grand piano.

The name Heligoland means Holy Island. For what reason the island was thus named has not been satisfactorily explained. It is mentioned in history as far back as the Roman historian, Tacitus. Since then it has had many owners. It was for a considerable time claimed by Denmark, but was captured by England in 1807. It At the royal ch.na factory in Copen- was ceded to Germany in 1890 in exhagen one may obtain beautiful little change for some African possessions nodels of Thorwaldsen's works in bis- of that country.
