

"COCKSHUTT" Footlift Sulky is the Acknowledged Leader of all Sulky Plows for Any Land or Any Purpose

Built to stand all conditions

A boy can handle it

Wide and Narrow Bottoms are supplied with each Plow. They can be changed in a minute to suit any soil, light or heavy.

This Footlift Sulky is a great favorite with farmers in Ontario and the Maritime Provinces. In design, it is very much like our Jewel Sulky, which has become the standard of Sulky Plows in Western Canada. It can be fitted with bottoms suitable for any kind of soil—for clay land the Judy bottom is used, and for loamy soil the No. 21. These bottoms have already made a great name for themselves, and farmers know of them so well that detailed description is unnecessary. But what places this Sulky Plow in a class by itself—makes it distinctive and better than any other make—is the Footlift Attachment, making it so simple to operate, that any boy who is able to drive a team of horses can handle it.

The levers are all conveniently arranged, but are only used for adjusting the plow when starting in the field, for once it is set to width and depth it is operated entirely by the footlift attachment, leaving the operator's hands free to manage the horses. A special device locks the plow when raised from the ground and locks it down when set for work. The plow can be raised by the footlift attachment when obstructions are met with, preventing breakage, which is very useful in stony land. Can be fitted with rolling colter, knife colter or jointer.

This Footlift Sulky embodies every requirement necessary for plowing any kind of soil, and the farmer who buys one will be investing his money where it will bear good interest. Another point—when the operator jumps off his plow at night, he won't feel tired out, but will be well able to do his chores.

There is a Cockshutt Catalogue for every Farmer. Send a Postcard to-day.
