generator cylinder, a receptacle for gas producing material within said cylinder and a closure within said cylinder between the magazine and said receptacle, substantially as shown and described.

#### No. 68,871. Hasp Lock for Boxes.

(Moraillon pour serrures de boîtes.)

Fig. 1.

Fig. 2. 68871

William Tassie Tassie, Toronto, Ontario, Canada, 2nd October, 1900; 6 years. (Filed 15th September, 1900.)

*Claim.*—1st. As a hasp lock for boxes, a latch pivoted at one end upon the box lid and having an enlargement formed at the other, in combination with a keeper secured to the box below the latch and provided with a horizontally extending tongue to engage the latch, substantially as and for the purpose specified. 2nd. As a hasp lock for boxes, a latch pivoted at one end upon the box lid and having an enlargement formed at the other, in combination with a keeper comprising a flat plate secured to the box and a horizontally extending tongue stamped up out of the said plate and adapted to engage the latch, substantially as and for the purpose specified. 3rd. As a hasp lock for boxes, a latch pivoted at one end upon the box lid and having an enlargement formed at the other, in combination with a keeper secured to the box below the latch and provided with a horizontally extending tongue to engage the latch, a rib or flange formed on the box above the keeper, and a washer around the pivot of the latch, substantially as and for the purpose specified.

#### No. 68,872. Bottle Case or Cover.

(Etui et couvercle de bouteilles.)

68872

Carl Degemeyer, Bremen, Germany, 2nd October, 1900; 6 years. (Filed 14th September, 1900.)

*Claim.*—1st. A bottle casing or cover in one piece, of ribbed or corrugated paper, pasteboard or the like, consisting of two half shells fitting each in its shape the form of a half bottle and which are connected together along their cylindrical part so as to form a hinge or bend, substantially as hereinbefore set forth. 2nd. A bottle casing or cover of paper, pasteboard or the like, consisting of two half shells fitting each the form of a half bottle, and which are connected together along their cylindrical part so as to form a hinge or bend, the substance of the casing having corrugations, ribs or grooves which do not extend to the edges of the casing or to the bending place or hinge with the object of making the edge more resistant and to allow of the bending taking place without the fracture, substantially as described.

#### No. 68,873. Knitting Machine. (Machine à tricoter.)

68873

George Frederick Sturgess, Leicester, England, 2nd October, 1900; 6 years. (Filed 8th May, 1899.)
