

Tongue covered with a white fur, voice husky. Has a slight cough with bronchial expectoration. Cheeks flushed.

Temperature this evening $104\frac{1}{2}^{\circ}$. Ordered pulv. dover gr. x.

Jan. 30th.—Temperature $100\frac{1}{2}^{\circ}$. Complains of headache. Ordered a purgative. Evening temperature $102\frac{1}{2}^{\circ}$.

31st.—Temperature 99° . Feels well and expects to be able to go out soon. Voice still husky, and he has a cough with frothy expectoration. Lungs on examination found to be free from any physical signs of disease. Evening temperature $103\frac{3}{4}^{\circ}$. Complains of pain in head and back, particularly the latter. Vomited once.

Feb. 1st.—Temperature $103\frac{1}{2}^{\circ}$. Complains of pain in back. An eruption of reddish spots, not raised, appeared to-day on the abdomen and chest, which was mistaken for a copious typhoid rash. No diarrhœa. Slight tenderness of abdomen which is not confined to the right iliac region. Evening temperature $104\frac{1}{2}^{\circ}$; pulse 92.

2nd.—Temperature 102° . Did not sleep last night. Eruption has extended to all parts of the trunk, legs and forearms. It is not in the face and neck. It resembles the rash of measles more than anything I have ever seen. The spots are dusky, irregular, not raised, most of them looking like a mottling under the skin. They do not altogether disappear on pressure. The patient complains very much of pain in the back. Evening temperature $106\frac{2}{3}^{\circ}$. Pulse 88. Ordered Quin. gr. xxx.

4th.—Temperature $104\frac{1}{2}^{\circ}$; pulse 112, full but compressible. Tongue very dry and brown. Sordes beginning to collect about the mouth. Ordered 2 oz. whiskey. Rash less distinct. Abdomen still spotted, the spots not raised at all. Evening temperature $104\frac{3}{4}^{\circ}$; pulse 124.

6th.—Temperature $106\frac{1}{2}^{\circ}$; pulse 120. Patient lies constantly on his back, extremely prostrate. His eyes are injected. There is subsultus tendinum and stretching of the hands—a picking motion. Tongue is with difficulty protruded, is dry, brown and cracked. The mouth is filled with a quantity of sticky
