

Antiphlogistine

(Inflammation's Antidote.)

PNEUMONIA

Apply over the thoracic walls, front, sides and back, and cover with a cotton-lined cheesecloth jacket, as shown in the illustration.

BRONCHITIS

Apply over and well beyond the sterno clavicular region. If a dressing is put on when symptoms of bronchial irritation first appear, a serious development may be prevented.

PLEURISY

Apply over and well beyond the boundaries of the inflammation.

In all cases Antiphlogistine must be applied at least $\frac{1}{8}$ inch thick, as hot as the patient can bear comfortably and be covered with a plentiful supply of absorbent cotton and a bandage.
