

TO THE MEDICAL PROFESSION.

EMULSION OF COD LIVER OIL

— AND THE —

Hypophosphites of Lime and Soda.**GUARANTEED NOT TO SEPARATE NOR SPOIL IN ANY CLIMATE.**

This Preparation is a compound of the purest Norwegian Cod Liver Oil and the Hypophosphites of Lime and Soda with Glycerine.

By combining the Hypophosphites in this manner with the Oil, not only the remedial power of all are increased, but we are enabled to administer the Phosphorous that is loosely combined in them, in a form that will be most readily assimilated; the stomach receives it without irritation, and it is taken up along with other food and carried into the economy to be there resolved and to supply the waste which often constitutes the first link in a chain of morbid action.

In cases of consumption and all pulmonary diseases, with emaciation, cough, debility, hemorrhage, and the whole train of too well-known symptoms, the benefits of this article are most manifest.

Cod Liver Oil in its natural form alone, cannot be very well borne by the stomach from want of digestive power in that organ; it causes eructations, and is apt to derange the digestive organs, and even causes vomiting and diarrhoea, and so strong is the disgust it excites at times that, although the patient stands in the greatest need of it, the use of the remedy has often to be discontinued.

Recognizing this fact, we have succeeded in putting it in a form that the most susceptible stomach will tolerate, it **BEING A PERFECT EMULSION**, sweet and **PALATABLE AS CREAM**.

PREPARED BY

DAVIS & LAWRENCE CO'Y., Limited, Manufacturing Chemists,
MONTREAL, CANADA.

WYETH'S
LIQUID MALT EXTRACT.

Containing all the Nutrient Properties of Malt, with the least possible Amount of Alcohol.

This is a perfectly pure, and extremely agreeable preparation of malted-barley with hops, combining the nutritive and digestive properties of malt, with the well-known bitter-tonic qualities of hops. The very low percentage of alcohol contained in it (less than three per cent.), and the large amount of nutritious extractive matter (fifteen per cent.), render it the most desirable preparation for administration to nursing women invalids, children, etc. In the usual dose of a wineglassful three or four times daily, it excites a copious flow of milk, and supplies strength to meet the great drain upon the system experienced during lactation.

The diastatic principles of the malt render this preparation of great service in cases of malnutrition, dyspepsia, etc., causing the assimilation of starchy foods, increasing the appetite, storing up fat, etc., etc.

The rapidly increasing demand for the **MALT EXTRACT** in the Dominion of Canada, has induced us to start its manufacture in the city of Montreal, on account of which we are enabled to supply the demand at greatly reduced prices.

Single Bottle 40 cts. One Dozen, \$3.00.
