

## EDITORIAL COMMERCIAL NOTES.

WE congratulate the New York Clinical School of Medicine upon having installed so able a man and skilled a surgeon as Dr. Thomas Manley in the chair of Surgery of that institution.—*Medical Brief.*

S. H. KENNEDY's Concentrated Extract of Oak Bark (*Quercus Alba*) can be supplied to members of the profession through Lyman Bros. & Co., Toronto, who are wholesale agents for this firm. When a man of the standing of Dr. J. Marion Sims recommends an article to his brethren in the profession, it can be taken for granted that it is worth more than an ordinary trial.

FOR years past members of the profession have allowed themselves to be talked into subscribing to all kinds of collecting agencies, the representative professing that they could collect any account, no matter how bad. We know how the majority of those companies at least have turned out. After looking into the system adopted by the Standard Mercantile Agency, Ltd., whose advertisement appears on page xxvi. of this issue, we think that we are safe in saying that physicians will find the same to be most satisfactory, that doctors will, instead of sinking their subscription fee (which this company only deducts from the amount collected, otherwise not at all), get returns for the investment.

## The First Step

in the treatment of Diphtheria should be the administration of

### ANTITOXIN

It "should be administered as early as possible on a clinical diagnosis, not waiting for a bacteriological culture," says the

#### Report of the American Pediatric Society

The society also recommends "the most concentrated strength of an absolutely reliable preparation."

## Mulford's Antitoxin

as stated in the report of the Bacteriologists of the Pennsylvania and Massachusetts State Boards of Health, meets all requirements.
