

Herewith is a brief record of the examination of the cases which have come under my observation to date.

Age	Married or Single	Children	Miscarriages	Duration of Insanity Years	History of Pelvic Disease	Nature of Pelvic Disease
1 35	M	2	...	3	Pelvic inflammation for six months...	Cystic Prolapsed and Adherent Ovaries.
2 59	M	4	...	14	Ovaritis fifteen years ago.	Lacerated Perineum.
3 47	M	...	...	3	...	Retroversion with dense Pelvic Adhesions
4 20	S	...	...	2	...	No abnormality.
5 44	M	...	...	14	...	Undeveloped condition.
7 45	M	9	3	4	Prolapsus uteri several years ago.	Enlarged uterus, partial descent.
10 38	M	2	...	4	Inflammation after birth of last child.	Cirrhotic and Prolapsed Ovaries.
11 50	M	1	...	14	Pelvic inflammation following miscarriage.	Salpingitic Adhesions.
15 50	M	1	1	1	...	Lacerated Perineum. Retroversion with Adhesions.
16 25	M	3	...	2	...	Lacerated Perineum. Enlarged Right Ovary.
17 59	M	4	...	2	...	Lacerated Perineum, deep.
18 32	N	2	...	6	...	Chronic Ovaries. Salpingitic Adhesions
19 30	N	2	...	2	...	Lacerated Cervix. Retroversion with Adhesions.
20 42	M	4	...	4	Pain in side and back.	Retroversion. Adhesions. Perineum lacerated.
21 32	M	1	...	10	Gonorrhoical inflammation of Pelvis.	Cystic and Adherent Ovaries and Tubes.
25 30	M	3	1	10	...	Lacerated Perineum and Cervix. Enlarged Ovary with Adhesions.
6 28	M	3	2	4	Pelvic pain twelve years.	Lacerated Perineum. Enlarged and cystic ovaries.
8 25	M	2	1	4	"Blood poison" following miscarriage.	Lacerated cervix. Retroversion. Tubo-ovarian adhesions.
9 46	M	4	...	12	"Inflammation" following child-birth.	Lacerated Perineum. Tubo-ovarian abscess.
12 20	N	2	4	few weeks.	...	Deep lacerated cervix.
13 43	N	4	...	few weeks.	...	Lacerated cervix. Enlargement of uterus, adhesions.
22 35	M	...	3	4	"Appendicitis" one year ago.	Tubo-ovarian adhesions.
23 30	M	3	...	3	...	Ovaries enlarged and adherent. Retroversion.
24 42	M	6	3	1	...	Lacerated perineum and cervix. Retroversion and enlarged ovary.
26 18	S	...	...	few weeks	"Appendicitis" one year ago.	Salpingo-ovarian adhesions. Parovarian cyst.
27 62	M	7	...	1	"Falling of womb" for several years.	Lacerated perineum, enlarged uterus cervical polypus.
28 54	M	7	...	4	History of old pelvic inflammation.	Lacerated perineum, bilateral salpingitic adhesions.
29 28	M	4	...	2	...	Lacerated cervix, enlarged ovaries.

I have grouped the examination of thirty-one inmates of a Canadian asylum made in conjunction with the medical superintendent. (Of these, twenty were married and eleven single and all but two showed well marked pelvic disease.

No.	Age	Married or Single	Children	Miscarriages	Duration of Insanity Years	History of Pelvic Disease	Nature of Pelvic Disease
30	50	M	2	?	14	"Tumor of womb" for several years.	Interstitial and also intraligamentous myomata.
31	36	M	4	...	4	...	Cervical laceration, enlarged ovaries.
32 28	S	...	...	...	4	...	Retroversion with adhesions. Cystic ovary.
33 27	M	3	?	4	...	...	Deep laceration of cervix.
34 27	M	3	?	4	...	...	Cervix and perineum lacerated, cystic
35 18	S	...	...	2	...	...	Con. al cervix, pin-hole os, right ovary enlarged.
36 36	M	1	...	7	...	...	Lacerated cervix, salpingitic adhesions.
37 28	S	...	...	3	...	...	Acute antelexion, enlarged uterus.
38 25	S	...	...	2	...	...	Enlarged cervix, enlarged left ovary.
39 58	M	4	4	7	...	...	Lacerated cervix and perineum, orosion of os, left salpingo-ovarian adhesions.
40 30	S	...	...	3	...	...	Retroversion with adhesions. Right ovary enlarged.
41 28	M	1	...	2	...	Was very ill after last confinement.	Lacerated perineum, retroversion, fibr.oid tumor filling up pelvis.
42 54	M	6	...	2	...	...	Lacerated cervix and perineum retroversion with adhesion.
43 38	S	...	...	?	...	...	No abnormality.
44 30	M	...	...	?	...	...	Lacerated perineum. Salpingitic ad-
