

ATTACHMENT B

MANAGEMENT OF NORTHERN BOUNDARY COHO

1. The Government of Canada and the Government of the United States (the "Parties") agree on the following actions to be taken by their respective management authorities in implementation of the conservation provisions of the Pacific Salmon Treaty.
2. If projected all-gear commercial catch of coho salmon in Southeast Alaska is less than 1.1 million wild fish (as determined from the historical relationship between average catch per boat day in the Alaska troll fishery during statistical weeks 28 and 29 and the total all-gear coho catch in Southeast Alaska), then Alaska will close its troll fishery for up to seven days beginning on or about July 25. If Alaska closes its troll fishery based on this assessment, Canada will close its troll fishery in Areas 1, 3, 4, 5 and adjacent offshore areas for the same time period.
3. If the Alaska Fisheries Performance District ("FPD") Area 6 troll fishery statistical week 27, 28 and 29 average catch per boat day is:
 - (a) less than 10, Alaska will close its troll during statistical weeks 31, 32 and 33 in waters south of a line from
