FRESH AIR
One hour of bad air will do more harm than good air for the under twenty-three hours will do. Therefore, keep baby's room well ventilated night and day. If the rooms in the house open into each other, one or two open windows in the proper place will furnish fresh air for the whole house. In a small apartment keep baby in a room where the windows may be opened top and bottom, and from which the fresh air may circulate without causing too much of a breeze. At any cost keep the air good every moment of the time.

Miss Sneath's Recital

Last evening a recital was given at the Toronto Conservatory of Music by Miss Isabel Sneath, A.T.C.M., pupil of Dr. Edward Fisher, assisted by Miss Jean Mitchell Hunter, solo violinist, and by Miss Mary Morley, A.T.C.M., at second piano. The selections chosen by Miss Sneath embraced a clever mingling of old and new, the program opening with Mendelssohn's Scherzo Capriccio, and closing with Schutt's F minor Concerto, the numbers in between being a group by Chopin and pieces by Debussy, Schumann and Moszkowski. In all these Miss Sneath displayed an exceptional wealth of technical resource, coupled with a grace and vivacity of movement quite her own, which rendered her performance captivating in the extreme. She also revealed powers of expression and sentiment in the G major nocturne and romance by Schumann, and altogether reflected the highest credit on her instructor, Dr. Fisher, who for so long has been identified with the art of piano-playing. Miss Sneath was admirably sound and musically attractive in Tartini Sonata and in a group of shorter pieces, and Miss Mary Morley played the second part of the Schutt concerto with her accustomed dash.

HORSE SHOW SEATS

The reserve seat sale for the Horse Show will start this morning, at Tyr-My's King street east, and will continue until 6 o'clock each day of the show. The entry list is the largest of any show ever held in Canada, and as the quantity is represented, the show should go down in history as one of the best ever held in the Dominion. His Honor, Lieut-Governor D. C. Cameron of Manitoba, is the first of the out of town exhibitors to arrive, and the others have written that they will be here by the last of the week, while their exhibits will arrive sooner, in order that they may have a few days to get accustomed to the ring. Invitations for the luncheon on Tuesday afternoon, at the Armouries, have been issued and are meeting with hearty responses.

Woman in Pain For Three Years

With an Aching Shoulder and Lame Back That Seemed Incurable.
Tells of Her Remarkable Cure.
"Very few people could so patiently suffer for three years as I did," writes Mrs. M. D. Durand, from her home in August. "Sometimes I did feel very discouraged, but knew that a remedy would some day turn up with the power to relieve my sufferings. Nervine was the one thing that ever did me real good. It had the power to sink into my stiff, sore muscles, and it drew out the pain and gave me relief from such distress as few people know. My condition was largely Rheumatic, and on this account I do urge every person with Rheumatic tendencies to use Nervine—rub it in frequently and bind a hot flannel cloth over the aching parts. This is very soothing and will surely cure."
It is just such cases as this that have made Nervine famous in many lands. No ailment is so penetrating, so strong, so pain-subduing, its influence over Neuralgia, Lumbago, Sciatica and Rheumatism is simply a marvel. Thousands of actual permanent cures prove this. In the home Nervine is so useful because it can be taken internally with sure results, for cramps, stomach pains, and diarrhoea. It stops vomiting, cures nausea and sick headache.
No home complete without Nervine. Family size bottles 50c; trial size 25c; at all storekeepers and druggists, or The Catarroch Co., Buffalo, N. Y.

heads. Overheating is very common in the city, especially in apartment houses. In the country the mistake is generally drafty floors and cold halls. Babies, beginning at six weeks, should be taken out for their airing every day. In the winter, at the time when the sun is warmest; in summer, when it is coolest. At first one hour every day is enough, then one hour in the morning and another in the afternoon. At six months three or four hours in the open air is a necessity every day. After that, the more, the better. Of course, the baby that sleeps in the open every day does not need to be wheeled about the dusty streets, except for the sake of exercising his mother. But if you are fortunate enough to live near a park, a real park of trees and springy grass, take the children there every day for as long a playtime as you find possible. High Park is the greatest place I know, for babies and grownups, too.

The sleeping room should have one or more windows wide open at top and bottom throughout the year. The bed should be as far away from the windows as possible, in a corner out of direct draft. If the air is very cold, the blanket should be pulled around the crib, and have the bed-clothing very warm. This applies to well babies remember, and to those over six weeks of age. However, the day of shutting up weak babies in close, hot rooms is past, and the delicate child often requires more fresh air than the well child. The appetite is improved and the strength increased by good, pure air, and many a restless baby falls into a slumber as soon as he is put outdoors. Sleeping porches are a splendid institution. Have one if it is at all possible, and don't forget what I said in a previous article about a sun-sleep and complete rest for mother as well as baby in the middle of the day.

Recipes for Wrinkles and Bad Complexions

(From Art and Nature.)
Of all the beauty recipes in my scrap book, here are two that have always given complete satisfaction.
Wrinkle Remover—One ounce powdered zinc oxide, dissolved in 1/2 pint witch hazel. Use as a wash lotion. It brings instantaneous results.
Face Peeler—Pure mercuric wax, applied at night, cleanses the skin, and rubs in; wash off in the morning. It rubs the worn-out scarf skin to come off in tiny, almost invisible flakes, a little each day, until the fresh young under-skin is wholly in evidence. The beautiful rose-tinted complexion thus obtained is not to be compared with one made over with cosmetics. If the old skin is treated with freckles, pimples or other blemishes, these defects are of course discarded with the skin itself. An ounce of the wax is sufficient in any case. The ingredients named are inexpensive and can be found in any drug store.—Louise Leslie.

Gas Domes FOR Dining-rooms

The invention of the inverted gas mantle has opened possibilities for Artistic Effects in Gas Illumination hitherto undreamed of. The Dining-room Dome here illustrated is only one design in many carried at our salesroom. The inverted Dome also is one of the many creations displayed, showing that the field for Decorative Designs is practically unlimited. Drop Clusters, Wall Brackets, Reading Lamps, many with art-glass fittings, are now offered for your inspection. Artistic Illumination is the crowning glory of the beautiful home.

Health and Beauty Answers

By Mrs. Mae Martyn
Eather: I was glad to read that you are recommending my almond wrinkle-removing jelly recipe to your friends. The shampoo recipe you ask for consists only of one teaspoonful of canthrox dissolved in a cup of hot water. It lathers freely and will thoroughly cleanse the scalp and make the hair feel good. By shampooing the hair with canthrox every two or three weeks, it will remain soft and fluffy. Canthrox also relieves itching and irritation of the scalp. (If troubled with dandruff, read answer to Eith.)

Worried: Waste no time on liquid preparations. Use a delatone paste, made by mixing together delatone, vasoline and water. Apply to hairs not wanted, and in two or three minutes rub off, wash the skin, and the hairs are entirely dissolved. This is a quick, harmless method, but be sure you get the delatone in an original package.

Mrs. G.: Try proxin on your eyebrows, and you will be delighted on how thickly they will grow. By the same treatment you can make short, straggly eyelashes come out curly. Apply the proxin at lash-roots with thumb and forefinger. You can buy proxin in a small, ornate tin, very few use and don't get anywhere no hair is wanted.

Birdie: I agree with you. A bright, clear, youthful eye is always attractive and admired. Most girls neglect to give the eyes proper care. Very few use an eye-tonic, which I think essential in caring for the eyes. I have found the following tonic to be fine for weak, tired and inflamed eyes: Go to your druggist and get one ounce of crystals and dissolve in a pint of water. Use two or three drops in each eye night and morning. It will not smart. The inexpensive eye-tonic will do you lots of good and relieve you of that dull, tired feeling above the eyes.

Beulah: You are not the only girl with a sallow complexion and oily skin who cannot find a face powder that pleases her. But you need not despair. There are other aids to beauty more satisfactory than face powder, and the use of washes is becoming more popular everywhere. Here is a recipe for a wash that, much less than any manufactured brand, and add two ounces of spumax in a half-pint of witch hazel or of water, and add two teaspoonfuls of glycerine. This will make a complexion beautifier that whitens and softens the skin, without the use of powder, and it also tends to remove pimples, tan and freckles.

HAND EMBROIDERY IN COLORS

This dress shows one of the new bolero effects, also the flowers crudely embroidered in gay colors, which are accredited to the Bulgarian peasant costumes.

A new weave of crepe voile is the material used, it being white for the greater part of the rows and a water-melon pink for the tinted portions. A girle of a pink, decidedly brighter, fastens at the back under a bow.

The skirt is draped a little at the side and the large rose is embroidered over the folds of the drapery. Natural colors are used for the flowers.

IF THIS IS YOUR BIRTHDAY

Avoid pleasures in crowds and attend to things of more use to you. Your year holds more than ordinary chances of success with corresponding risks and trouble. Strict attention and foresight will show you the way.

Those born today will have frivolous tendencies, but wonderful talents for constructive mathematics, sciences and exact calculations. If these are encouraged in youth they will furnish some serious purpose to save the career from going to pieces in the shallows of society.

What one woman does

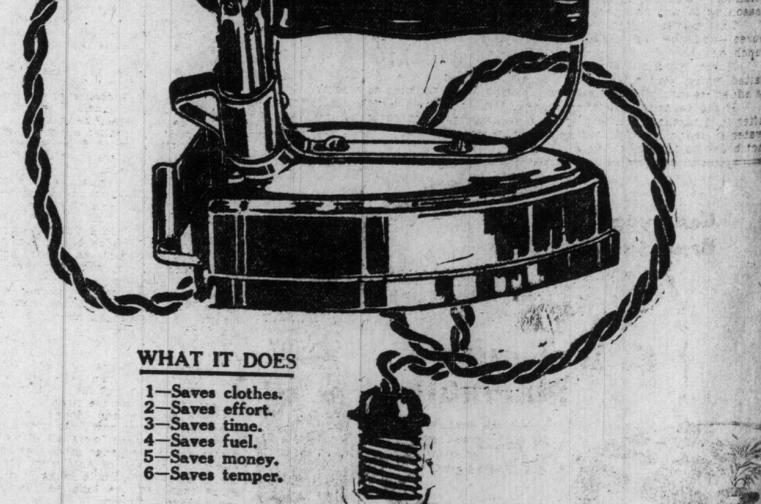

Every Tuesday during the warm weather she takes her basket of clothes, ironing board and Electric Iron out on the verandah and sits down while she does a whole family ironing in cool comfort.

She does better work and she saves her strength for her other duties, because the iron, being always at right heat, there's no hard rubbing. "Why," said she when she stopped to chat to the demonstrator one day, "why, there's no comparison between the old and new way of ironing. All the drudgery has gone out of it!" But imagine sitting down to an ironing! Did you ever hear of it before? That just gives you an inkling of what the Electric Iron will do for you.
