

Preface

The Rossland Board of Trade is constantly in receipt of letters from all parts of the world, and more especially Great Britain, asking for information about Rossland and its mines. These enquiries happened to be specially numerous during the recent visit of the Governor-General and Lady Aberdeen, and it occurred to the Board of Trade that the publication of a pamphlet containing general information, in an interesting form, would be very acceptable to the public.

The facts and figures relating to the development of the mines are as complete as could be obtained down to the 1st of August, 1898, and have been furnished by the Mining Engineers or Superintendents in charge of the respective properties.

The photographs reproduced were nearly all specially taken for this publication by Carpenter & Miller of Rossland.

ROSSLAND, BRITISH COLUMBIA,

12th August, 1898.
