

STANDARD BOOKS.

Play and Profit in My Garden.

By E. P. Roe. The author takes us to his garden on the rocky hillsides in the vicinity of West Point, and shows us how out of it, after four years' experience, he evoked a profit of \$1,000, and this while carrying on pastoral and literary labor. It is very rarely that so much literary taste and skill are mated to so much agricultural experience and good sense. Cloth, 12mo. . . . \$1.00

Forest Planting.

By H. Nicholas Jarchow, LL. D. A treatise on the care of woodlands and the restoration of the denuded timberlands on plains and mountains. The author has fully described those European methods which have proved to be most useful in maintaining the superb forests of the old world. This experience has been adapted to the different climates and trees of America, full instructions being given for forest planting of our various kinds of soil and subsoil, whether on mountain or valley. Illustrated, 12mo. . . . \$1.50

Soils and Crops of the Farm.

By George E. Morrow, M. A., and Thomas F. Hunt. The methods of making available the plant food in the soil are described in popular language. A short history of each of the farm crops is accompanied by a discussion of its culture. The useful discoveries of science are explained as applied in the most approved methods of culture. Illustrated. Cloth, 12mo. . . . \$1.00

American Fruit Culturist.

By John J. Thomas. Containing practical directions for the propagation and culture of all the fruits adapted to the United States. Twentieth thoroughly revised and greatly enlarged edition by Wm. H. S. Wood. This new edition makes the work practically almost a new book, containing everything pertaining to large and small fruits as well as sub-tropical and tropical fruits. Richly illustrated by nearly 800 engravings. 758 pp., 12mo. \$2.50

Fertilizers.

By Edward B. Voorhees, director of the New Jersey Agricultural Experiment Station. It has been the aim of the author to point out the underlying principles and to discuss the important subjects connected with the use of fertilizer materials. The natural fertility of the soil, the functions of manures and fertilizers, and the need of artificial fertilizers are exhaustively discussed. Separate chapters are devoted to the various fertilizing elements, to the purchase, chemical analyses, methods of using fertilizers, and the best fertilizers for each of the most important field, garden and orchard crops. 335 pp. . . . \$1.00
