### "BACK TO THE LAND" POLICY OF THE C.P.R.

A Statement by Sir Thomas Shaughnessy on the Project

EQUIPMENT OF FARMS

Particulars of the Plan and Comment by Bradstreet's on the Leasing of Money Necessary—Views it Favorably

Sir Thomas Shaughnessy, on his return to Montreal from the south, announced in an interview that the C. P. R., pursuing its policy of encouraging those interested in land to come "back to the land," would devote as much money as necessary for the full equipment of twenty-five farms of 100 acres each, which were to be used towards demonstrating the advantages of mixed farming in Western Canada.

This scheme is the logical outcome of the ready-made farms for the British and the more recent colonization project by which the company proposes to loan to American farmers a sum of half a million dollars, in sums of \$2,000 each for the improvement of farms which they purchase from the C. P. R. under certain conditions.

When the Canadian Pacific Railway Company announced its ready-made farms in the irrigation district of the west, it recognized this handicap by offering to place the settlers not only on a ready-made farm, but in the ready-made houses, with barns, to be paid for in instalments, running over a series of years. This step proved highly successful.

The company in this instance will select from its unused land in districts to be determined upon in Manitoba, Saskatchewan and Alberta sufficient land for the purpose. These farms will be fenced and on each there will be provided a suitable dwelling, stable, granary, small dairy, well, and if considered desirable, a silo, as well as the requisite farming implements for the growth of such wheat, oats, root crops and forage as may be deemed necessary for the purpose to be attained. The farm will also be stocked with the best of high grade cattle, pigs, chickens, etc., so that the settler may be placed on a profit paying basis from the first.

The crop of every acre will be planned by the expert, and only when the farmer has demonstrated his ability to properly handle the enterprise, will he be permitted to purchase the farm, with its buildings and stock, at the cost price to the company, with the privilege of paying in six or eight equal instalments, charging the usual rate of interest.

If these twenty-five farms succeed, the policy will be extended, and by this means the C. P. R. is endeavoring to solve a purely economic problem in offering to the back to the land man the one chance that philanthropists have been demanding for many years.

Canada has drawn very many of our farmers to its prairie provinces. It will continue to attract many others. The movement is a natural one. It is somewhat of a realizing and re-investing movement. New land is bought at low prices after selling our western land at high figures. Most of the husbandmen who have gone forth to our northern neighbor did not leave empty-handed. They went with sufficient funds to begin anew in a country of promise. They left with divers other assets, and to us there remain so many minus signs. Of course, other settlers must have bought the lands vacated by the emigrants, so that our loss is more apparent than real. But the point is that Canada wants more of the types it has taken. It is just as anxious to get them as we are to keep them. But Canada is now calling with added insistence. One of the dominant leading railway companies has land in the northwest to sell, and it wants to get revenue producers along its line. To procure results this railway

company, the Canadian Pacific, is to lend a helping hand to married men who are working rented farms. It will make individual loans of \$2,000 at 6 per cent. to a certain number who will migrate to Canada, the loan to mature in ten years. The applicant must make personal selection, must own free and clear sufficient furniture, live stock and farm implements to begin active cultivation, and in addition he must have enough money to pay 10 per cent. of the purchase price of the land selected, as well as sufficient to maintain his family for one year. The \$2,000 loan will be added to the purchase price of the land, but the railway company will expend it for the erection of a house, barn, fencing and other essentials, as well as pay them current rates for the work done. The proposition rings clear, and it will no doubt bring in many tenant farmers. Incidentally, the propaganda will serve as an example for American roads, many of which are now doing good work in pointing out the natural advantages possessed by almost every section of our own country.

### DELEGATES ARE CHOSEN IN THE WARDS OF CITY

Fine Attendance and Keen Interest Shown—Enthusiastic Over Policy Announced by Mr. Copp

Liberal primaries held in all the city wards last evening were well attended, and the workers turned out in a hopeful and enthusiastic spirit. Particularly large crowds attended the election of delegates for the large wards in the city proper, and it is evident that great interest is being taken in the nomination of candidates in opposition to the provincial government.

The chief topic for discussion appeared to be the progressive policies laid down by the popular opposition leader in his rousing speech at the Hamilton convention on Thursday, and the idea seems to be gaining favor that Mr. Copp is to prove the apostle of direct rule by the people as opposed to government rule by bosses and corporations such as now prevails in New Brunswick.

The workers feel that they have ample material in carrying on the campaign for a change in the government, and the delegates chosen last evening accepted the responsibility of choosing a strong and winning ticket in the city, with great enthusiasm.

### DOCTORS' FEES

The St. John Medical Society has recently published a small pamphlet containing a tariff of fees dated with the year 1912. Some of the prices quoted are considerably higher than those published in the year 1890. The book states that the price for an ordinary visit is from \$2 to \$3, instead of \$1 to \$2. Amputations of fingers and toes will be from \$10 to \$20, instead of \$5 to \$10. The pamphlet states that in applying the new prices due consideration should be made for those in poor as well as those in affluent circumstances.

Father Christmas is so called in England. In Russia he is known as Little Father Nicholas, Santa Claus in Germany, and San Nicolo in Italy.
