THE VICTORIA TIMES, FRIDAY, MARCH 12. 1897.

A VALUABLE DISCOVERY.

2

Discovery of the fact that ore from the Le Roi mine which could not be profitably smelted can yet be profitably milled is naturally gratifying to the people of Trail Creek district. How much the fact may mean in the way of added thinking man-the contempt of every values it is not possible to estimate at all closely. The Rossland Miner hazards the opinion that at least 50 per. cent. is added to the prospective value of the mines in general, and it deals further with the matter in this

way: "The test made at the O. K. mill by the managers of the Le Roi mine demonthe managers of the Le Rol mine demon-strates that the low grade silicious ore The first named asks for authority to still the ozone peculiar to that district the salient features of the legislation of strates that the low grade silicious ore use and divert from the Okanagan river must have had a beneficial effect, (if the present administration, strongly concentrating instead of a smelting pro- and tributaries thereof "so much of the Mr. Rithet's ability as a physician is position. The revolution that this dis-covery will effect in this camp will be taking." which may mean every drop of taking," which may mean every drop of enormous, as it is certain that many, if water in the said river and all its not most of the other mines in the camp, have ore of the same character and in water of Kootenay river, Murphy Creek, many cases in even greater quantity. Kettle river, Boundary Creek and trib. The treatment of our low grade ores is utaries thereof, to furnish the motive practically solved at a stroke.

power to operate tramways, generate "The importance of this discovery is so stupendous that the Miner shrinks from electric energy, etc. Many other extraorfollowing it out to its logical conclusion. dinary powers are asked for, but our We have always had faith in Rossland, interest for the moment is in that phase and from our knowledge of its ore of the charters that seeks to obtain a bodies and their values we have never control, which the companies would afentertained any doubts as to the greatness of its future, and yet in our most terwards seek to make absolute and to the government by some of its sup-less life." monopolistic, of the waters of the great porters-a little ambiguous. hopeful moods we never dreamt of the possibility of ore averaging less than \$7 mining region of Kootenay and Yale. per ton being worked at a profit. It is The franchises asked for are simply prenow clearly within the range of possiposterously large and can be granted bility that ore averaging from \$2 to \$3 per ton may be worked.

as demonstrating that all our silicious lature is clear. The government may drop to drink." Hence their petition reores are free milling or susceptible of shirk its responsibility to submit a gen- ceived yesterday. concentration. Other tests will be neeral act regulating and conserving the cessary before it can be definitely determined just what ores will yield as use of the water for the people, for good results in a mill as has the Le nothing better may be expected from Now, however, that it is found Mr. Turner and his colleagues when mortgage tax. Since listening to the that such unpromising looking ore has combinations of powerful friends are given such unexpected results, other demanding special privileges; but the mine managers will enter on similar exhouse owes a duty to the country that periments with their ores and we feel it dare not shirk.
