PRIZE WINNERS IN

MUCH PROMPTITUDE

A Large Number Visited the Beautiful Display and Enjoyed Fine Concert Last Evening.

From Wednesday's Daily.) is afternoon the annual flower show In point of the number and qualthe entries the exhibition excels by applauded, and an encore always met ing yet held under the auspices with a ready response. organization. Although accomion had been made for more flowthan last summer, it was found necessary to bring in a number of extra benches at the last minute. The exhib-

AWARDS MADE WITH

Without a doubt the feature is the magnificent dinner table decorations. Collection of greenhouse plants, to cover the competition has always inspired teen rivalry, but on this occasion all interested apparently have entered with the determination to carry off the palm. As a result there are no less than 22 tables in the contest, so that the judge will have a somewhat difficult task when he is called upon to give a The decorations in all cases re most elaborate but the flowers have been used with such taste and judgment that, to the novice, it would seem al- Mrs. M. A. Flewin. most impossible to announce one supeor to another. Among the flowers which seem most popular for table adornment are poppies, sweet peas, shasta daisies, montcretia and a number of other common varieties. Ferns and other evergreens have been used to im-

Never before has such an interest been displayed by either professional or amadisplayed by either professional of the determinant of the result is indeed most gratifying. Numerous magnificent specimens of the begonia, geraniums, palms, rubber plant; etc., may be seen, while at the last show they were not strikingly in evi-dence. Then there also is a profusion of cut flowers, among which are the cover ox7 feet—1st, F. H. wollaston; 21, of cut flowers, among which are the L. Q. Quagliotti.

Ferns, collection of 12—1st, Mrs. Hy. known verieties. Besides these baskets of flowers and bouquets for special prizes are most attractive in themselves and would warrant a visit to the drill The judging did not commence until

among a number of authorities, some taking the entries of professional and Manton are judging the former, while L. Rusell, W. B. Gage and J. P. James will make the awards in the content of the content others the exhibitions of amateur florists. will make the awards in the amateur classes. It is not expected that they will complete the work before to-morrow. show from the standpoint of the entries and their quality is assured. Naturally this is a source of extreme pleasure to officials and members of the Horticultural Association. Mr. Bland in converate some of the features as already outand in conclusion pointed out that all now necessary to make the affair an anqualified success was the patronage of the public. He thought, in view of the bury. erit of the show, that crowds would attend, especially when it was considered that special musical entertainments were arranged for to-night and to-morrow

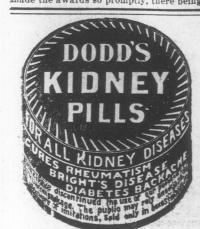

The programme for the concert this evening was published in these columns yesterday. It includes a number of vocal selections by the best local talent. Tomorrow night the Fifth Regiment or chestra will be in attendance.

(From Thursday's Daily.) The interior of the drill hall presented an animated scene last evening, the occasion being the fourth annual show under the auspices of the Victoria Horticultural Association. There was a large attendance, and the exhibition was admired by all, while appreciation of the musical programme was expressed by repeated encores. In short nothing was wanting to make the occasion one of extreme pleasure, and, judging by the approving comments, officials of the society may congratulate themselves upon having provided an entertainment it would be difficult to improve upon.
As mentioned in these columns yester-

day, the show excels that of previous years in every respect. In the first place there are more entries, and, secondly, the quality is particularly fine. Besides this the arrangement is most artistic, potted plants, cut flowers and floral dinner plants, cut flowers and floral tables being spread over the main floor such a manner that all that is most beautiful is brought into prominence. The display must be seen when the immense auditorium is brilliantly lighted to be properly appreciated. None of those present last night speak of it but in the Coleus, 4—1st, Mrs. Wm. Gunter; 2nd, J. st enthusiastic terms, and their praise P. Stewart. should be a sufficient recompense to those who have spent so much time and

trouble in preparation.

Judging was commenced yesterday afternoon and completed last night. Conidering the number of competitors this is certainly very quick, and the officials serve congratulations upon having made the awards so promptly, there being

as having been grown in the Territories being poor in comparison.

Part of the exhibit consisted of fruits in glass jars, floating in preservative fluids, including branches of plums, cherries, currants, berries, peaches, apricots, etc. The fresh fruits consisting of apples, pears, plums, cherries, crabapples, apricots, tomatoes, etc., were commercial packages, neatly packed. The appearance and quality of the fruit were both excellent. The exhibit was made up by the British

Columbia government, and the principal object in view in sending it East was to promote the sale of British Columbia fruits in the Northwest. It was also a onditions of the Pacific province. All the principal fruit growing districts of British Columbia were represented, including the famous Okanagan valley, settlements of Kelowna, Peachland, Summerland and Vernon. Kamloops was well to the fore with fine exhibits of apples, pears and peaches. Victoria made a splendid showing in cherries, tomatoes and apples; there were also apples, plums and blackberries from Hammond, Wharnock and Mt. Lehman, in the Fraser val-

Daily exhibits of fresh fruit from this province arrived by express, and were shown in connection with the main disbeing. "Did all this fruit grow in British

Columbia?" with it on all sides. Mr. Palmer says the demand for the fruit throughout the Northwest already exceeds the supply. In big centres of population, such as in Winnipeg and Brandon, the supply is not sufficient to meet the requirements of trade, and California and Oregon varieties find a place in the market. In the out all parts high prices are ruling, be-

cause of the partial failure of the crops in California and Oregon. Mr. Palmer speaks highly of all the exhibitions he attended. The displays of agricultural machinery were large and very fine. At Winnipeg and Brandon steam ploughs were shown which were capable of turning over from 35 to 45 acres of land a day. In machinery and implements exhibited nearly every factory in Canada and the United States were represented.

On every hand prosperity was evidenced. At Indian Heads a number of farmers are using automobiles. Mr. Palmer reports that there will be a steady movement of people from the Northwest to the Coast A number of hem are coming to see the country and others are coming in search of milder climate. A great many are waiting unfil the harvest is over, and he found many others waiting until the New Westmin-

FOREST FIRES.

In Kootenay Bridges Have Been Destroy ed and Ranches Devastated.

For the last five days the smoke of burning forests has been going up all over the Kootenay. Fires are reported from Ymir, Rossland, Kaslo, Lardeau, Marysville and Cranbrook, says a Nelson dispatch, dated Tuesday. Many a wagon road has been rendered useless through the wiping out of its bridges, and prospectors' cabins and outlying mine buildings have been destroyed. Some ranches have been destroyed and others are in danger. A force of fire-fighters is here, and there tackling the conflagra-tions, but little can really be done now until the rain comes, which is now expected after several weeks' drought, At the time of wiring fire is sweeping for four miles along Kootenay river for three thousand feet up the north face Morning Mountain, along the base which are scattered numerous dairies and ranches, over and around which the

Pills. Try a 25c ox yourself. AN AUDACIOUS RAID.

Sheep Stolen While One Caring For Them Is Covered by Shotgun.

Word comes from Prevost island of a most audacious raid made on the premises of a well known rancher by a party of thieves who came presumably from the American side. Farmers on the islands of the Gulf frequently lose sheep, but it is seldom that one is held up at the point of a gun until the pick of a flock have been taken. This was what occurred to Mr. Gorgeson, the light keeper of Prevost a few days ago. He play, the question most frequently heard saw the strangers land and going to ascertain the object of their visit he was held up by one of the men who The people seemed to be well pleased a shotgun at him, demanded that he ith it on all sides. Mr. Palmer says the should not stir. In the meantime the wanted the whole gang departed. The sheep belonged to Mr. Richardson, the former light keeper, who resigned his position to take charge of R. P. Rithet's ranch at Ladner's Landing. The thieves West, however, more of the British Col-umbia fruit is used. This year throughous occasions visited the islands. A freous occasions visited the islands. A frequent practice is to shoot the sheep as they pasture on the sides of the hills. Grape Fruit, per box The animals when killed roll down the hillside and are then secured with the Peaches, per box least possible risk to those stealing them. These sit in a boat and are prelared for a sudden disappearance if necessary.

Dr. C. J. Fagan, secretary of the provin clal board of health left Wednesday on a tour of England, Ireland and the continent. He will spend a few weeks in his old home in Ireland and will then visit the prominent medical centres of Europe, devoting special attention to the treatment and cure of tuberculosis.

Chas. W. Hills, who has been connected with the Westside for some time as window dresser and advertising manager, has severed his connection with that establishment o accept a position with the George Craig Co., Ltd., of Winnipeg.

THE CITY MARKETS.

The market quotations show very few hanges this week. ocal apples and other small fruits are becoming more dentiful and give evidence of a decline n price at an early date. Island potatoes are dropping as the supply in creases, having changed from \$1.75 to \$1.25 during the past few weeks. California products, especially fruit, are finding a ready sale. The peaches, which Victoria wholesalers have been expecting for some time, have not yet arrived in any quantity, and those obtainable are not of the best quality. Several shipments are looked for during the course of the next few days. There are few other alterations. The complete quotations follow:

MENDRYX CYANIDE PROCESS. Plant in Operation Near Nelson-

Capacity of Mill Will Be Increased. The success of the new Hendryx cyanid process has been demonstrated in British Columbia within ten miles of Nelson, says the Nelson News. Ore of a comparatively low grade is being profita ably treated in the mill of the Reliance Gold Lining Company, the percentage of values saved being over 95. Before he would risk the reputation of his process and machinery, Dr. W. A. Hendryx had the mine examined by an expert in his in-35 terest to satisfy himself of the quantity 28 and quality of the available ore, and of

35 the equipment and management of the chains, thence west 80 chains, thence north Having been satisfied on all these points Dr. Hendryx forwarded the machinery, and has been in Nelson or at the mine for the last three weeks super intending the installation of the plant Land putting it in running order, with all 13% the latest improvements he has added. On Thursday a large party of direc-tors and officials of the company paid a visit to the mine and mill. Dr. Hendryx

18 and D. Lay, the superintendent, met the Lamb, hindquarter 1.25@ 1.75 party and conducted them through the The equipment and arrangements of the mill are ideal. The force of gravity is employed from the first operation to the last, and efficiency and economy to-

gether, are the result. The ore is received in a bin at the feet in length. The coarse ore passes over a slanting grizzly, then to a Blake crusher, and then, with the ore that was already fine, passes between rolls, 36x14. From the rolls, the crushed ore falls to the feed bin, from which, still by gravity, it is passed into the Chilian mill. There it is reduced to pulp and mixed with a cyanide solution. The liquid then passes over amalgration plates on which nearly 60 per cent. of the gold is

The liquid solution then passes through a series of ten storage settlers and thence conveyed by lauders to the Hendryx agitator. After from six to eight hours in the agitator the remain ing gold values are on the plates that are contained in it. In the agitator the solution is continually exposed to the air by the revolution of the propellor, which hastens the separating process.

The solution and the tailings pass from the agitator to a decanter, the bottom of which the tailings are drawn away to the creek. The then clear solution of cyanide passes to a sump tank, from which by centrifugal pumps it is returned to the storage settiers, and from there to the original 1.15 storage tank, so that the same solution 1.15 is available for use again.

In the evening the agitator was stopped and two plates from it were shown to the visitors by Superintendent Lay. On each was a rich deposit of gold. The amount of cyanide required for the process is never more than a pound to a ton of ore and averages two-fifths of a provided for out of the profits. pound. As the same solution may be used repeatedly, with small additions, and as the cost of cyanide is 23 cents a ls often reached with corns. Foolish, pound, it may readily be seen that the process is a decided success, economical in twenty-four hours. Don't put off by as well as mechanically.

D. Lay, the mill superintendent, has get "Putnam's" to-day.

Chief Commissioner of Lands and Works for permission to purchase 640 acres unreserved, unsurveyed Crown land, situated in Coast District, B.C., commencing at a stake about six miles south of François Lake, thence north 80 chains, thence west 80 chains, thence south 30 chains, thence east 80 chains to point of commencement. J. L. BUCK.

August 1st, 1905. Sixty days after date I intend to apply to the Hon. Chief Commissioner of Lands and Works for permission to purchase 640 acres unreserved, unsurveyed Crown land, situated in Coast District, B.C., commencing set all states about 150 to these 80 chains, thence east 80 chains to point of J. M. M'CAW

August 1st, 1905. and precipitate the gold.

Speaking of the process, Dr. Hendryx said: "Here I am perfectly satisfied. The ore is here in unlimited quantities, the values are here, and the management is efficient. Therefore, I consider the per-

fect and continued success of the process assured." Later the whole party traversed, the tunnels in the mine. The development consists of about half a mile of underground work and a deep open cut, exposing a parallel vein of equal, if not greater width and values. At no point lower terminal of the aerial tram, 1,700 in the workings is the ore lost. Extensive crosscutting has been done to prove the width of the ore body. Neither tunnel reaches the end of the ore. The vertical distance between the tunnels is 112 feet, and the greatest dept attained is about 250 feet.

The ore is pyrite and oxidized iron, absolutely free from copper, zinc or ar-senic. The average value, on Mr. Elmendorf's very conservative estimate, is between \$4 and \$5 to the ton. In many places the values run very much higher. The extent of the ore body is still un-known. The property includes six erown granted claims. The main work-ings are on the claims, May and Jennie. Already the sum expended in develop-ing the mine exceeds \$30,000, and a considerably greater sum has been spent on the plant in erecting the mill and tramway, and making other improvements. A further expenditure is now contemplated. The present capacity of the mill is between 50 and 60 tons a day. It is likely that in the very early future the capacity of the mill will be gradually increased to 300 tons a day. The amount of ore already blocked out justifies a mill capacity of 500 tons a day, whenever it

is considered expedient. At a meeting of the directors the other evening the board authorized the management to proceed further to develop the property by having a No. 3 tunnel driven at a depth of 225 feet below the present workings, and extended through the present vein to the north vein, a distance of about 300 feet; this development is to be
