<i>Stromatopora</i> (Pappilatta)	- - - -	"
<i>Beatricea</i> (Undulata)	- - - -	Anticosti.

(This species is placed by S. A. Miller with these forms.)

Each one of these forms has been highly polished, so that the structure can be distinctly seen.

The Museum has been kept open every Saturday afternoon from half-past 2 to 5 o'clock throughout the year, and a large number of friends from all parts of the Province have visited it, also a great number of the city school pupils.

ALEX. GAVILLER,  
Curator.
