

We're looking for Engineering and Computing Science graduates who want to develop their resources.

And ours.

Syncrude Canada Ltd. is one of the world's largest and most advanced synthetic fuel producers. And we've barely scratched the surface at current production of 129,000 barrels per day.

Offer us your energy for ours, and we'll offer you participatory management. Which means if you've got something to say, you'll get the chance to say it. Just like our more experienced voices. It's a good change to get farther, faster.

We also encourage continuing education, with more than 400 courses of professional interest. In addition to all the courses you can take just for fun.

And when it's time to relax, you'll find McMurray is a dynamic city, with all sorts of pursuits to interest you. First run theatres, first

class fishing, a fine recreation centre, and a lot of nice people to sport with.

There's something else to keep in mind. The chance to really stretch your mind. We're constantly tackling new things. And you could be the one to make technological history. Things you develop today, could be used by industry professionals for all time. If this appeals to you, complete an application for either permanent or summer employment through your placement office.

Application Deadline September 28, 1982

SYNCRUDE
