FRUIT-RANCHING IN BRITISH COLUMBIA

Large Crown 8vo., Cloth, with 32 Page Illustrations
from photographs

"Much has been heard within recent years of the possibilities of British Columbia for fruit-growing. Mr. J. T. Bealby has put these to the test, and he tells a story of his experiences with such frankness and fulness that the volume will prove highly serviceable to any who contemplate trying their fortunes in the same region. Indeed, the story of his experiences is eminently calculated to induce others to follow his example. To any so inclined his book will be most useful, for it is obviously an unvarnished tale of actual experiences."—*Scotsman*.
