Pineapple juice has been found to be a splendid help in throat trouble.

It has been a pronounced success in Diphtheria and Bronchitis. Most people do not need any reason for using Pine-apples, outside of their delicious flavor. Combining this fine flavor with so much goodness, has brought them very largely into use.

ber of citizens present at the meeting, and W. D. Sheldon presided.

Preliminary steps were taken to form a company, obtain a charter, select a site for the building and also to obtain stock for the company. If enough money can be obtained a combination curling and hockey rink will be built. It is proposed to have it in use this winter. A lot of stock has already been subscribed, and it is thought that there will be no difficulty in getting the remainder.

Prescott Identified.

Toronto, Oct. 7. — Thomas E. Smith, office secretary of Bewick, Moring & Co., London, representatives of the Great Fingall Consolidated, Limited, came to Toronto Monday night, to determine whether A. P. S. Prescott is Anthony Stanley Rowe, wanted by the English police for extensive embezzlement from the Great Fingall Consolidated.

Yesterday Mr. Smith and Detective Slemin went out to the jail and the officer asked the Governor to bring out Albert P. S. Prescott, who was first brought to the jail about a month ago.

The prisoner, when he appeared, glanced at Smith, but there was no sign of recognition upon his features. To a question by the Governor, Mr. Smith at once replied that the man before him was Anthony S. Rowe.

ILLEGAL SHOOTING

As boys and others have been illegally shooting meadowlarks, doves, robins and other insectionous birds protected by law, it might be well to warn them before they have a heavy fine to pay, that the only birds it is legal to shoot are game birds in their proper season, and hawks, blackbirds, crows and English sparrows. As the insectionous birds act was passed to preserve those birds that destroy insects so destructive to fruit, grain and vegedestructive to fruit, grain and vege-tation of all kinds, and as they are

the best friend to the farmer. It is to be hoped that prowling boys with guns who are not happy unless killing useful birds, will be warned off by farmers.

The deputy wardens have been instructed to see that the insectionous birds are protected. The fine is not less than \$5 nor more than \$25 for each bird killed.
